CANADIAN TRADE.

Formerly, under the operation of the British FATAL ACCIDENT. - Some days ago, Mr. ral products were exported to Canada and change in this trade. By expensive and unpostant improvements, the navigation of the St. La Arence has been mape comparatively merly went to Europe by that channel. The only equivalent gained for this loss, is the Vermont trade in Western produce, which the quantities of our Ind an corh, pork, lard, &c., | this Guy. 4 for her own consumption, while a large portion of the staple articles of their rich grain growing country of Upper Canada, now pass

through our canals in bond for expost from ! By the liberal Legislation of the British Government as well as our own, nearly the whole Canadian trade with the mother conntry, excepting the lumber trade, has been ! transferred from British to American bottoms. By the same cause a ma ket has been opened for the vast Western, production of Indian corn, formerly not worth raising. Yet it is said the Canadians have no claim on our

liberality for a reciprocity of trade. We have before us some statistics of Canadian commerce, showing the change that has I taken place within a few years. In 1815 there was not a bushel of wheat ner a batret of flour imported into Oswego from Canada; and very little of any kind of agricultural productions. In 1849, among our Canadian Imports were 200,000 barrels of flour, 618,-240 bushels of wheat and considerable quantitles of oats, peas, butter, ashes, seeds &c. The Canadian lumber trade, although not difrectly affected by the same causes which have influenced the course of breadstuffs, thas increased wonderfully within the last ten The Imports of Canadian sawed lumber, principally pine, into Oswego, were

in the three years indicated as follows: 1840 ..... 1,909 250 feet ...... 6,098 951 ...

1849......44 157.287 " Our Imports of Canadian lumber will reach sixty millions feet the present season, and our Imports, for 1850 will show a large increase in all the articles enumerated above Our Canadian Exports will show a scarcely less rapid increase. The large Imports have induced Exports of American manufactured productions into Canada, and under the operation of our Warehousing and Drawback laws, the Canadian importations of English manufactured goods are made to a large extent by New York and Boston, and through the lake ports-mostly through Oswego. The Canadian Importers ship their English goods in the winter so as to reach New York and Boston on or before the opening of the canals, and forward them by canal or railroad on the The editress of the Lancaster Literary opening of lake navigation so as to receive Gazette says she would as soon nestie her noze them some two months earlier than they can in a rat's nest of swingle tow, as to allow a be obtained by the St. Lawrence.
