FAT AND THIN MEN. -- I have known a few thin men to succede, but the laurel crown scarcely ever awarded to them in a hearty and genial way. They get on as vampires and ghouls get on, by sucking the blood of innumerable victims. Their fellow creatures are to this class of adventures just so many oysters. They swallow them, but they do not fatten upon them. Neither did the late Mr. Dando. It any scheme be atout for farming mankind for the profit of a few of course a fat man will be the chairman, but a thin man wil P Deniss, oil and fish, 27 cabin and 63 undertake the general management of the buisness .- Once a Week.

Business at the port of Oswego has been unusually brisk the present season. The arrivals of grain from the West, lumber Conquest, Johnson, 3rd June, Rio de Ja- trom Michigan and Canada, salt from Saltna, and coal from Pennsylvania, are immense. The supply of Eastward bound treight still seems to be in excess of the Brig Governor. Spencer, 21st May, Malaga, carrying facilities. The tolls received on the Oswego Canal to the 1st of July were \$120,187 95, or \$22,501 more than has ever before been received on the Canal up to that date in preceding seasons.

SPECIAL NOTICE.

We would call attention to the advertisement of 'Worcester's Hlustrated time to give it a hasty examination, but care say this much, that it is a most splendid volume, and, we doubt not, is the latest, the largest, the best.' We are glad to see that it contains none of those crue! innovations of 'Webster,' but gives the English

language as it is written and spoken by our best scholars in England and America. His Royal Highness, Prince Albert, We notice, has been presented with a copy, and speaks in high terms of the same. We hereafter. It can be obtained in the different styles of binding at the City Book Store.
