THE CELEBRATED
COOK'S FRIEND
BAKING POWDER

IS A PURE FRUIT ACID POWDER. It contains neither alum, lime, nor ammonia, and may be used by the most delicate constitutions with perfect safety. Its great success arising from its being intrinsically THE BEST VALUE IN THE MARKET, as well as thoroughly adapted to the wants of the kitchen, has excited envious imitations of its name and appearance. Beware of such.

No addition to or variation from the simple name:

COOK'S FRIEND IS GENUINE.

MAKE YOUR HOMES COMFORTABLE

BY PURCHASING THE IMPROVED

Automatic Weather Strip FOR YOUR DOORS.

This arrangement is different from all others. It is an undoubted saver of fuel, and it effectually prevents all cold drafts or snow drifts from entering in the winter. It is also equally effective in excluding rain or dust in the summer. It will securely bolt the door, is warranted not to get out of order from damp, heat or frost, and the longer in use the closer the rubber fits. When the door is opened the strip raises up and frees itself from the threshold, and travels unobstructed with the door. Agents are canvassing the city with a working model. County rights for sale. Address communications or call at 174 and 176 Ontario Street, next Burnet House. Cost price for above \$1.50. Nov. 9

YOUNG FOLKS' COLUMN.

GYMNASTIC EXERCISES SUITED TO INDOOR PRACTICE.

Discoveries Made by Accident Which Have Benefited the Whole World—An Instructive Recreation That May Be Introduced by Young Scientists.

An entertaining scientific recreation of interest to young readers is the one here illustrated.

A SCIENTIFIC RECREATION.

Take a piece of wood an inch or so in thickness and cut a hole through it of the shape shown in the illustration. By blowing through the larger end at a candle it is at once extinguished in the usual manner, but by blowing in the opposite direction, through the smaller opening, the current of air upon emerging is so spread out that a partial vacuum is formed, and instead of the candle being extinguished the flame is actually drawn toward the opening. A piece of cardboard rolled up into the proper form will answer equally well for the experiment. The same principle may also be shown in several other ways, as by bending down the ends of a visiting card so that it will stand like a stool about three-eighths of an inch high. Place it on a table and it will be found almost impossible to blow it over, as the air, rushing underneath it, causes a sufficient vacuum and downward pressure to keep it in place. It can, however, be accomplished by blowing upon the table two or three inches in front of the card, when the blast will be reflected at such an angle as to overturn it at once; or, take a short piece of glass tubing or quill and attach a disk of cardboard to one end of it even with the opening. Place a similar disk of cardboard upon the first, and, on blowing through the tube, it will be found impossible to blow it off. The second disk should have a pin thrust through it, extending down into the tube, to prevent its sliding off. The principle is the same as in the other cases, a vacuum being formed between the two disks by the current of air rushing between them.

Athletic Feats.

There are many feats of activity and strength that may be performed by any boy who will take the trouble to practice them. The ones here described are peculiarly adapted for wet weather, as they may be performed indoors.

JUMPING THROUGH THE FINGERS.

The illustration teaches how to jump through the fingers. Hold a rod or piece of wood between the forefingers of each hand, as represented in the cut, and without letting go, try and jump over it, both forward and backward. With a little practice this can be readily done, the hardest part of the feat consisting in clearing the heels; indeed with high heeled boots it is next to impossible to achieve it. You may also jump over your middle fingers placed together, without touching or separating them with your feet.

What is commonly known as the "finger feat" is performed as follows: Place your hands horizontally across and close to your breast, and put the tips of your forefingers together; another player should then endeavor to separate them, by pulling at each arm, but if you hold them firmly in the manner described, he will be unable to achieve it, although he may be much bigger and stronger than you are. It is not proper for the second player to use sudden or violent jerks in his attempts, he must employ only a steady, regular pull.

Accidental Discoveries.

Accident has been a suggester of a number of important scientific discoveries in the world's history. These accidents occurred, however, before eyes that looked out from observant, thinking brains.

Doubtless many before Galileo had witnessed a weight suspended in air swinging with measured beat; but to them it meant nothing. Yet when, in the cathedral at Pisa, one of the vergers, after replenishing a lamp with oil, accidentally left it swinging to and fro, Galileo, then a youth of 18, noticed it, and conceived therefrom his invention of the pendulum, which he completed after fifty years' attentive study and labor.

A tiny spider's web suggested to Capt. Samuel Brown, of England, the invention of the suspension bridge, and the peculiar shape of the shell of a lobster gave James Watt the solution of the problem of how to carry water by pipes along the uneven bed of the river Clyde.

And so, also, Sir Isambert Brunel, in reproducing upon a larger scale the movements of the little ship worm, which perforates the wood in one direction and then in another until the archway is complete, constructed successfully the great Thames tunnel, a triumph of engineering.—Golden Days.

White House Guests in Jackson's Time

President Jackson's table manners were as democratic as would be desired. He had at each plate two forks, one of which was of silver and the other of steel. The president used a steel fork himself, and after his dinner

he always smoked his tobacco from a long handled corn cob pipe. Andrew Jackson entertained lavishly on the night of his first inauguration. The carpets of the east room were ruined by the orange punch and lemonade which were served to the crowd which came to his reception. Barrels of this punch were made, and it was brought into the room in buckets. At last the people began to rush for the waiters as soon as they entered the room. Glasses were broken and ladies' dresses ruined. Tubs of punch were finally taken into the garden, and in this way the throng was drawn off and it was possible to serve cake and wine to the ladies.

At Jackson's farewell reception a monster cheese, as big as a hoghead in circumference and nearly a yard thick, was cut with saw blades made into knives and served out to the guests. Each guest received three pounds of cheese. The event was the talk of the nation, and when Van Buren became president his New York friends, emulative of Jackson, sent him a big cheese. It was cut up in the east room. The greasy crumbs falling upon the carpet were trampled into it, and the ruin of the furniture during these two administrations led the later presidents to discontinue the practice of serving tables at general receptions. Now no guest comes to a dinner at the White House unless invited.—Frank G. Carpenter in Lippincott's Magazine.

Dr. J. Collis Browne's Chlorodyne.

THE ORIGINAL AND ONLY GENUINE.

ADVICE TO INVALIDS—If you wish to obtain quiet, refreshing sleep, free from headache, relief from pain and anguish to calm and assuage the weary aching of protracted disease, invigorating the nervous media, and regulate the circulating systems of the body, you will provide yourself with that marvellous remedy discovered by Dr. J. Collis Browne (late Army Medical Staff) to which he gave the name of CHLOROXYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLOROXYNE is the best remedy known for Coughs, Consumption, Bronchitis and Asthma.

CHLOROXYNE acts like a charm in Diarrhoea, and is the only specific in Cholera and Dysentery.

CHLOROXYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.

CHLOROXYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, &c.

From Symes & Co., Pharmaceutical Chemists, Medical Hall, Simla, Jan. 5, 1880. To J. T. Davenport, Esq., 33 Great Russell Street, Bloomsbury, London. Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindoostan, but all over the East. As a remedy of general utility we must question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and judging from their sale, we fancy that their sojourn there will be but evanescent. We could multiply instances "ad infinitum" of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhoea and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Cholera, Diarrhoea, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of the opinion that the substitution of any other than Collis Browne's is a DELIBERATE BREACH OF FAITH ON THE PART OF THE CHEMIST, TO PRESCRIBER AND PATIENT ALIKE.

We are, Sir, faithfully yours, Symes & Co., Members of the Pharmacy Society of Great Britain, His Excellency the Viceroy's Chemists.

CAUTION—Vice Chancellor Sir Page Wood stated that Dr. J. COLLIS BROWNE was undoubtedly the inventor of CHLOROXYNE; that the story of the defendant Freeman was deliberately untrue, which, he regretted to say, had been sworn to.—See "Times," July 13, 1884. Sold in bottles at 1s. 1d., 2s. 6d., 5s. 6d., and 11s. each. None is genuine without the words "DR. J. COLLIS BROWNE'S CHLOROXYNE" on the Government Stamp. Overwhelming medical testimony accompanies each bottle.

CAUTION—Beware of Piracy and Imitation. Sole Manufacturer, J. T. DAVENPORT, 33 Great Russell Street, Bloomsbury, London Eng. Aug. 9.
