The Advantages of Morse's Carbolated Cod Liver Oil.

It is believed that the not unfrequent and discouraging failures of plain Cod Liver Oil and other tonic and alterative treatment to cure consumption, grow out of the fact they have no positive power to arrest the decay of the lungs; that while Cod Liver Oil supplies the waste of adipose tissue and vitality that the disease has made, as no other known substance can, it does not exercise any controlling power over the disease itself; it only gives Nature a fair chance to work her own cure. Something more is wanted— SOMETHING TO ARREST THE DECAY THAT DESTROYS LIFE—some prompt remedial agent that shall act directly upon the disease to check it while the Cod Liver Oil is building up the system. This important addition we have in Morse's Carbolated Cod Liver Oil. The power of Carbolic Acid-to arrest decay-something marvelous. The destruction of

matter cannot proceed where it is administered. Its disinfectant, purifying and cleansing properties are truly remarkable, and have been of the greatest practical value to medical mon. It is palatable, and now put up in bottles holding a full pint. Price, \$1. Formula on every label.

DRUGS, FANCY GOODS, PERFUMERY, ETC. Also all the leading Patent Medicines, and a full stock of Paints, Oils, Etc. Met Prescriptions carefully dispensed. Good value guaranteed. Favor us with a call.

TEMPERANCE REFORM.

Work of the Women Elsewhere-The Wise

Sayings of Great Men.

Contributed by the W. C. T. U. The Bethesda mission restaurant, conducted by the Chicago W.C.T.U., gave, during December last, 9,000 meals and 6,000 night

lodgings. One Day is the name of a new magazine to be edited by the Rev. Joseph Cook in the interests of temperance, philanthropy

and social reform. Steps are being taken toward the organization of a prohibition party in England. Sir Wilfred Lawson, M.P., is one of the leaders in the movement.

"To sell rum for a livelihood is bad enough but for a whole community to share the responsibility and guilt of such a traffic seems a worse bargain than that of Eve or Judas." -Horace Greeley, in 1853.

"If the traffic in ardent spirits is immoral then of necessity are the laws which authorize the traffic immoral. And if the laws are immoral, then we must be immoral if we do not protest agaainst them. '-Gerritt Smith. Madame Sudersson Meijerhelm has intro-

duced the woman's temperance work into Scandinavia, and Charlotte Grey into Belgium and Switzerland. Margaret Baker will visit the Sandwich Islands, and go on to Australia. Very soon the "white ribbon" will belt the globe, uniting in its embrace the christian women of all nations and all lamguages.

Oregon, Michigan, Tennessee, West Virginia. They make a fine quartette and are singing very good music just now-though the rummies declare it is a horrible discord. They all have a prohibitory constitutional amendment now before the people for decision, though the time of voting is determined in Michigan alone. -- l'oice.

An Alliance Newscorrespondent points out an acute discrimination on the part of a Yankee on his visit to Dublin. He was first taken to St. Patrick's cathedral, then to a new school, and then to the St. James' brewery. He was told that the first was restored, and the second built at the cost of Guiness, out of the profits of the third. The visitor did not say, "Ah! he must be a queer man to restore a cathedral, build a school, and carry on a brewery at once." Looking to the effects of these, he exclaimed, "Well, this must be a clever man. I never knew a man in our country who could run a salvation, education and damnation business at once." I wish many among us on this side of the water had the same admirable power of discrimination; it would, in temperance reformation, be to our personal, social and national advantage in no end of ways. - The Reformer.

A Much-Abused Man.

Dansville Breeze. Adam was relieved of one great responsi bility. He didn't have to select a wife from a whole world full of women. It was done for him.

New Orleans Picayune. An eminent jurist of this city is authority for saying the decree that evicted Adam from the Eden plantation was an Appell-ate decision by the highest court. Kentucky State Journal.

Had Adam lived un il now he would be a few months over 5,890 years old. What a fool he was to die ! He could now get at least \$12 a week in a dime museum. Kentucky State Journal.

"Have parents an influence for good on their children?" We doubt it. Now, there was Mr. Adam, for instance. He didn't have any parents, and there wasn't a better young man in the neighborhood than he.

Omaha World. Poor Adam hadn't much of a chance after all, it seems. Any Mohammedan can show you the grave of Eve, near Djeddah, its length indicating that she was thirty feet high, quite tall enough to pick apples without a ladder, and do pretty much as she pleased about eating them.

Drinking in the Capital.

Drinking is, it seems to me, growing in Washington, and it is said that on New Year's day several ladies of the cabinet offered wine and punch to their guests. This has not been usual in Washington society, though there has always been a private decenter for such of the old stagers as are assustomed to have their liquor. Washington punch is used at the receptions as it was a year or so ago. It is the most "drunk producing," article I have ever seen put together. It is made of one part of sour lemonade, one half part of rum, one of claret, and one half part of the best of whisky. It is served in round, I road and deep glasses, each of which will head about as much as a teacure It is rest, and one drinks if he is not careful more than he can stand. Amid the expirement and heat of a big ball it is strange if some of the younger people do not now and then take a little more than they can easily curry, and if the Prohibitionists would devote themselves to a good work they sheald attack Windingstou society - Washington Letter.

Enameled Jewelry.

With the demand for jewelry of a highly decorative character it naturally follows that enamels in bright rich hues, gems of brilliant color and rococo effects, produced by a combination of processes and metals, are in requisition. But while the work in gems and precious metal is elaborated, effects are far from being obtrusive. In a word, all fine jewelry, while rich and oftentimes showy in character, is free from loud or commonplace

Fine enamel jewelry, especially that set with small gems, is largely worn, but inferior work in this direction is at a discount, and this is as good a place as any to tell of the wonderful improvement in the enamel work done in this country. The association of plat-inum and gold in jewelry for both sexes is on the increase, and is to be seen in new queen chains, fancy vest chains, cuff buttons and scarf pins.

Fashions in Jewelry.

Gold jewelry in many instances takes for its models insects, birds and flowers, as well as less realistic subjects. The surface is variously fluished; semetimes it is bright, sometimes dull, and often engraved or chased, the latter finish being the most popular one Much of the gold jewelry is made in open demgns, formed by graceful coils and intertwinings of rope, wire and bond patterns. Pierced work continues in favor, and of late have appeared some exquisits effects in gold fligree. The fight, lacelike appearance of flur filigree affords an admirable background for small gema

THE TEST OF HEALTH.

Diseases Overmatched By Medicine-Over Indulgence by Food Cured.

Sir Astley Cooper said that no man ought to know he had a stomach. Unfortunately, however, the two extremes of luxury and privation teach a considerable portion of mankind that they have stomachs, and very troublesome ones too. The diggers after gold in our gulches, the alluvial of our rivers and our dry plains, suffer much from diseases of this organ, and of the liver and bowels. At present, however, there is much less fear of these complaints than formerly. All intelligent miners are aware that they can be readily combated and cured by the timely administration of Holloway's celebrated Pills. One of the leading forms in which disease of the stomach and bowels exhibits itself in the interior -- and we may add in the cities too—is a debilitating diarrhoa. Nothing that has ever been tried either in dysentery and diarrhoa in this country has uniformly succeeded in curing those maladies except Holloway's Pills. It is stated that all cases in which they were administered at the Ballarat Diggings, they did not fail in one. The ordinary medical treatment of diarrhoa appears to be wholly use-less in the climate. Probably it is so in any climate. Be this as it may, it is beyond cavil that the pills arrest the complaint as certainly and almost as quickly as the brakes of a rail car arrest the revolution of its wheels. There are no ifs or buts about the matter; the cure is a foregone conclusion. Imagine what a Godsend such a medicine must be to the digger. Possessed of it he feels as if endowed with another right arm. The very fact that his chest or knapsack contains such a potent counterblast to disease, keeps up his animal spirits and renders him less susceptible of unhealthy influ-

Miners bound to the more unhealthy diggings usually provide themselves with an extra supply of both the pills and ointment, as they can always dispose of what they do not want at an enormous profit. It is said, and probably with truth, that the large importations of these medicines have seriously interferred with the profits of the drug merchants. Calomel and jalap, and all the purgatives, alteratives, soporifics, anodynes, &c., are sadly at a discount in the market. Holloway's Pills and Ointment fill their places in public estimation, and more than fill them in beneficial effect. - The Inquirer.
