BELGIUM'S NEW PRISON.

HOW THE CONVICTS OF THAT LAND ARE TREATED.

They Are All Subjected to Solitary Confinement of the Most Rigorous Sort Even When They Are Being Preached To—Prisons in General.

Belgium has carried the system of solitary confinement to its farthest possible limits. Her scientists and administrators have apparently studied long on plans to preserve a prisoner in health and sanity, yet completely isolated from his fellow beings, and the result is seen in the cellular prisons, of which Belgium now has thirty.

EXTERIOR OF THE PRISON.

live rest in jail, while in another the horrors of prison life are such as to make the popular ear burn when they are told. In England all the authorities are now agreed that solitary confinement tends to insanity; so that form of punishment is now limited there to a few days in each year.

In Belgium, after long trial and consideration of both methods, they have decided in favor of solitary confinement for prisoners of all terms up to ten years. In 1860 M. Berden, chief of prisons, began the work of remodeling all the penitentiaries (as Americans call them), and now there are thirty such in the little kingdom.

PRISONER IN WORKING FAR as physical DRESS.

spacious, light and airy; he has a neat iron bedstead, a table, a comfortable chair, a carpet and gas light at night. The ventilation secures him pure air, and his food is scientifically adjusted to insure health and strength.

PRISON CHAPEL.

other, or whether insanity increases under it, we are not yet informed; we await the report of results. The prisoners do some work, but it is all subordinate to the idea of reformation.

GERMANY'S CROWN PRINCE.

Sketch of the Man Who Will Inherit Kaiser William's Throne.

Dire rumors have reached this country in regard to the cancerous growth in the throat of Frederick William, crown prince of the German empire and of Prussia. These rumors have been so conflicting in statement that it is hard to get at the truth.

CROWN PRINCE FREDERICK WILLIAM.

The great importance of Frederick William's illness is shown by the fact that his aged father cannot long be expected to survive. Prince William, eldest son of our subject and his natural successor, holds the confidence of the German people in a remarkable degree.

Since his father ascended the throne the crown prince has taken part in the most important affairs of state. He served in the Danish campaign in a subordinate capacity, but with such ability that the king intrusted him to an important task in the war with Austria in 1865.

In the Franco-Prussian war, 1870-71, the crown prince acted a very conspicuous part as commander of the troops of Bavaria, Wurtemberg and Baden.

FANEUIL HALL. The Famous "Cradle of Liberty" Briefly Described.

Peter Faneuil, the founder of Faneuil hall, in Boston, was born in New Rochelle, N. Y., in 1700. He died in Boston, March 3, 1743.

FANEUIL HALL.

was adopted by a majority of only seven. The "cradle of liberty" was first built two stories high, forty feet wide and 100 feet in length. It was nearly destroyed by fire in 1761, and in 1805 it was enlarged to eighty feet in width and twenty feet greater elevation.

The gallery is the only portion of the building provided with seats. Portraits cover the walls, among them Herby's picture of Webster replying to Hayne, portraits of the two Adamses, Gen. Warren, Commodore Preble, Edward Everett, Washington, Lincoln, and Governor Andrew.

The site for this building was reclaimed from the tide waters and \$150,000 was expended in the erection of Faneuil Hall market, or Quincy market, as it is often called, from the fact that the market grew out of a recommendation by Mayor Quincy in 1822.

Faneuil hall was used as a theatre during the British occupation of Boston in 1775. In revolutionary times it was the usual place of meeting of the patriots, from which it gained the name of the Cradle of American Liberty.

A New Form of Crime. One of the English journals recently dwelt at length upon a new form of crime which an ingenious person in that country had invented.

This was set down as something really remarkable, fairly entitling the inventor to a certain degree of homage. The new crime consisted in a series of burglaries perpetrated by a person who traveled from place to place in a yacht, thus preventing suspicion from attaching to him, and went ashore whenever he was in sight of a house worth cracking.

AN EVENTFUL WEEK

—AT THE—

GREAT BARGAIN CENTER.
