WHAT SHALL WE WEAR?

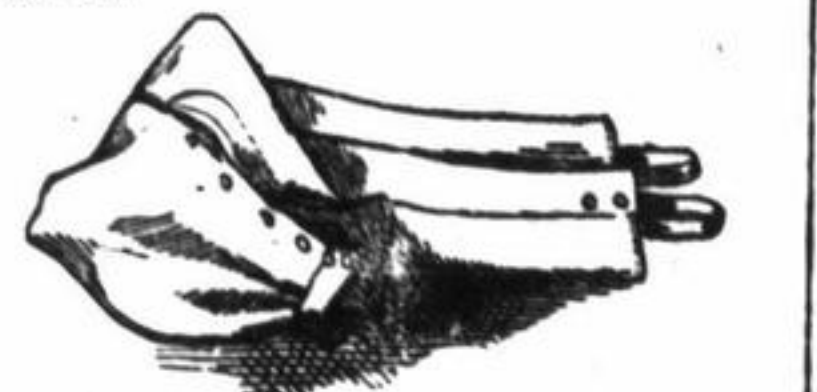

ARTICLES OF IMPORTANCE IN EVERY MOUNTAIN OUTFIT.

Opportune Suggestions About Picturesque Costumes for Lawn Tennis and Other Sports—English and New York Styles in Lady's Riding Habits.

Considerable latitude is allowed this season in the matter of riding habits. Black cloth, dark blues, invisible greens, grays and browns are all in fashion. The last two mentioned will perhaps prove the more popular during the summer months. Faced cloth, diagonals, corkscrew and ladies' cloths are all more or less employed in the making of habits. The habits are for the most part fashioned after English models and include a postilion bodice, high at the neck and without any kind of trimming, a short, skapt skirt and trousers. (See cuts.)

New York tailors have modified this season—in some cases—the style here illustrated by substituting a rolling collar for a standing one and thus exposing a linen chemisette and necktie. It must be said, however, that the high, close bodice, with plain linen collar and cuffs, can hardly be improved upon by equestriennes.

Lady equestriennes seen in Central park wear usually a high black silk hat, but for country wear felt Derby hats of the same color as the habit are in favor. In the selection of gloves one may choose between Swede glazed kid and dressed and undressed kid. A scarf pin or small brooch, representing a horse, a whip, saddle or similar device is appropriately worn with a riding habit.

Caps and Coiffures.

Caps and coiffures are, as a rule, little worn by ladies as long as they retain a good head of hair, but are reserved for service when the part becomes thin and the offensive bald spot near the back of the head appears. For morning, elderly ladies wear round crown caps of mull. There are many of them trimmed with oriental lace. For dress caps point d'Alencon and other lace is made up with fine net and gros grain ribbon loops of some becoming color. Black lace is but little used for these caps.

Where a coiffure of gray hair is preferred to the dress caps, the hair is, in some cases, dressed with high loops at the back and arranged in front a la pompadour. In other cases the back hair is arranged in a coil or knot, and the front dressed in three puffs at the side of the face.

Lawn Tennis Costumes.

Favorite costumes for lawn tennis and other out of door sports are those made of some white material, such as flannel or serge. These white dresses are in many cases finished with a collar, cuffs and sash of some plain color, red and blue being favorite hues.

A wide license is permitted in the selection of hats. Some ladies wear soft, white felt hats. Sailor hats of straw are also in demand to wear with tennis costumes. Canvas shoes are much worn, and show lacings of colored ribbons or cords. The regular tennis shoes have nails in the soles to prevent the players from slipping. Chamouis or dooskin gauntlets are appropriate gloves for tennis.

Feathers and Plumes for Hats.

Cock plumes, arranged in clusters, are very fashionable as a garniture for round hats. These plumes are attractively arranged in short curve clusters that retain their shape, not blowing about as the long straight feathers. Ostrich feathers will again serve as a trimming for many of the midsummer hats. A great many large hats are being prepared, many of them having a shallow rim at the back. Those made of undressed braids have no wire or facing in the brim. A new shape curves upward in front, droops close on the right side and is rolled upon the left to the middle of the back, where it is pointed against the crown.

Shoes and Gloves for Mountain Wear.

In every outfit prepared for mountain resorts there should be at least one pair of comfortable and at the same stout, substantial shoes. These shoes may be of either leather or canvas, but ought to have low broad heels and thick broad soles. Such shoes will add greatly to the comfort and health of everybody who tramps about during the summer.

It is a wise precaution to lay in a stock of dooskin or dogskin gloves; gloves heavy enough to protect the hands from scratches, and, above all, the attacks of black flies, mosquitoes and gnats.

Summer Dresses.

Sleeves for summer dresses are many of them made quite full, and some are confined by a band at the wrist. This style of sleeve is seen on imported dresses. Many corsets are also made full, being shired on the shoulders and confined at the waist by a belt. Blouse waists with yokes and belt also appear in summer gowns.

White wool dresses are being made up in large numbers by New York modistes for wear at the seaside, where muslins and other light weight fabrics soon lose their crisp freshness.

Silver Jewellery.

Silver jewellery does not in the slightest affect the popularity of gold ornaments. There is a place for each in every lady's toilet, the present style of dress affording opportunities for the wearing of silver trinkets when gold ones would be scarcely appropriate, and vice versa. It is the finest quality and most artistic finish in silver jewellery, however, that is fashionable.

ALL SORTS.

Gen. Sherman is booked for a visit to Bar Harbor.
 Sir Roderick Cameron will go to England and spend much of the summer there.
 Dr. McGlynn is mentioned as a possible candidate for the New York assembly, or senate.
 W. K. Vanderbilt, wife, three children and two guests have started on a voyage around the world in a yacht.
 Dr. Charles H. Thompson, of Hartford, Conn., is the oldest living graduate of the Yale medical school. He was graduated in 1822.
 Professor John Fiske has returned from Oregon to California and will deliver a number of lectures in the chief cities of that state.
 G. H. Boughton has lately been received into the Royal Institute of Painters in Water Colors by acclamation, without the formality of a ballot.

The Rev. Dr. Richard S. Storrs declares that he could under no consideration accept the presidency of the American board in succession to the late Dr. Mark Hopkins.
 George H. Johnson, of Newburg, N. Y., who was graduated at Harvard, is the first person who has received the degree of doctor of science from that university for special attainments in mathematics. His thesis was on "Surfaces of Minimum Area."

The Rev. Dr. McIlvaine has said farewell to his old congregation in the High Street Presbyterian church, Newark, N. J., preparatory to assuming the presidency of the Women's college at Princeton. He was formerly for ten years a professor at Princeton.

Ex-Mayor Carter H. Harrison, of Chicago, is going abroad. The winter he will spend in India. He hopes to visit the East Indian archipelago, and also cross the Himalayas and explore Tibet. Then he will come on to Europe and gradually complete his tour around the globe.

Yan Phen Yen, who was graduated at Yale a few days ago, was frequently interrupted by long and loud applause during the delivery of his commencement oration. He discussed the Chinese question from the Chinese standpoint and sailed into the United States with Oriental vigor. This young and able celestial is to be married on July 6 to an American, Miss Elizabeth Maud Jerome.

Holloway's Pills.

When first the nerves feel unstrung, and listlessness supplants energy, the time has come to take some such alternative as Holloway's Pills to restrain a disorder from developing itself into a disease. These excellent Pills correct all irregularities and weakness. They act kindly, yet so energetically on the functions of digestion and assimilation, that the whole body is revived, the blood rendered richer and purer, while the muscles become firmer and stronger, and the nervous and absorbent systems are invigorated. These Pills are suitable for all classes and all ages. They have a most marvellous effect on persons who are out of condition; they soon rectify whatever is in fault, restore strength to the body and confidence to the mind.

Skin Heat.

Through the interior of the body retains a quite constant heat of 98 to 100 degrees, the temperature of the skin varies considerably in different parts. Prof. Kunkel, at Wurzburg, has just found that in the face in adult men it ranges from 85 to 86 degrees. The skin of the more exposed parts of the body, the nose and the ears, shows a lower temperature, seldom exceeding 75 degrees, and even descending to 71.5. The highest surface temperature appears in men in full vigor of life, and the remarkable fact is observed that the skin of children is cooler than that of adults—being from 77 to 84 degrees.

Important Testimonial.

From the pastor of the Olivet Baptist church, Philadelphia, Pa.; I have been troubled with Catarrh so badly for several years that it seriously affected my voice. I tried Dr. Ely's remedy without the slightest relief. One bottle of Ely's Cream Balm did the work. My voice is fully restored and my head feels better than for years.—B. F. LIEPNER, (A.M.)

We recommend Ely's Cream Balm where a cure for Catarrh is called for, and consider that we are doing the public a service by making its virtues known to those afflicted with this loathsome disease, for which it is in most instances a perfect cure. PECK BROS., Druggists, Grand Rapids, Mich.

A Living Miracle.

"My infant daughter was taken ill with cholera infantum, the doctor said she could not live. The Reverend W. McWilliams would not allow her head to be lifted when he baptised her, she was so weak. Dr. Fowler's Wild Strawberry gave immediate relief. She is a living miracle, hale and hearty. Since that time (7 years) our house has never been without that remedy." From a statement of George Johnston, Harwood, Ont.

Solidification of Petroleum.

Dr. Kaufman is making experiments for the Russian government, with the view of finding a process of solidifying petroleum used as fuel. His process consists in heating the oil and afterward adding three per cent of soap. The latter dissolves in the oil, and the liquid upon cooling forms a mass having the appearance of cement and the hardness of compact tallow. The compact is hard to light, burns slowly and without smoke, but develops great heat and leaves but two per cent of a hard black residuum.

To Avoid Baldness or Grey Hair.

Use Dr. Dorenwend's Great German Hair Magic. It keeps the scalp clean and free from dandruff, and promotes the growth of the hair. It prevents premature greyness and stops all falling out of the hair. On bald heads, where the roots have not perished, it will invigorate them and force a new growth of hair. Ask for Hair Magic. It is the only reliable. For sale by J. G. King, A. P. Chown, and all druggists.

Nature Makes no Mistake.

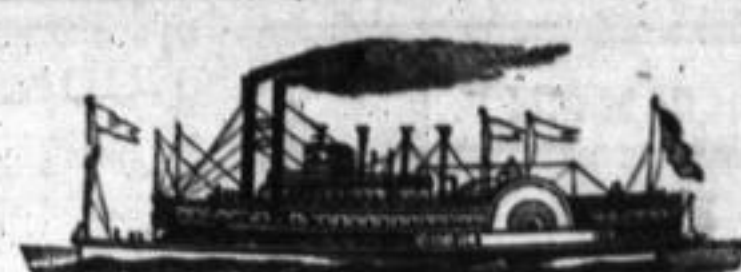

Nature's own remedy for bowels complaints, cholera morbus, cholera, cramps, vomiting, sea-sickness, cholera infantum, diarrhoea, dysentery, and all diseases of a like nature belonging to the summer season, is Dr. Fowler's Extract of Wild Strawberry, which can be obtained of all dealers in medicine.

Anesthetic Warfare.

A humane German chemist has hit upon a new, worth a dozen new explosives. He makes a bullet so brittle that it breaks when it strikes, and a powerful anesthetic being enclosed, that renders completely insensible any persons wounded by it. The insensibility lasts at least twelve hours, during which time the body may be comfortably removed to a hospital, with a great reduction of suffering on the battle field.

B. Laurence's Spectacles.

The only sure aids to perfect vision, at J. G. King's drug store. Buy none other. See every pair is stamped "B.L." Imitations abound. The frame may sometimes be close ly imitated, the lens never.
