Constipation

is a universal and most troublesome disorder. It causes Headache, Mental Depression, impairs the Sight and Hearing, destroys the Appetite, and, when long continued, causes Enlargement of the Liver, Inflammation of the Bowels, and Piles.

For a number of months I was troubled with Constipation, in consequence of which I suffered from Loss of Appetite, Irritability, and a disordered Liver.

CURED BY USING

three boxes of Ayer's Pills. I have no hesitation in pronouncing this medicine to be the best cathartic ever made.

I suffered from Constipation, and, consequently, from Headache, Indigestion, and Piles, for years. Ayer's Pills, which I took at the suggestion of a friend, have given me effectual relief.

I suffered from Constipation, which assumed such an obstinate form that I feared it would cause a stoppage of the bowels.

Stray Bits of Entertaining Reading

Gathered from the Exchanges. A hospital for animals will soon be erected in London, and at the same time free dispensaries will be opened, where the horses, donkeys, cats, dogs and birds of the poor can be treated when ill.

The Swedes of Chicago are going to erect, in Lincoln park, a \$50,000 monument to Linnæus, the famous botanist. The monument will be the finest in Chicago, and is to be a fac simile of the Linnæus statue at Stockholm.

The Mercantile library of New York city was founded and is entirely managed by clerks. Any one, by paying the fee, may become a member; but to hold office, or even to vote, one must be a clerk or working on salary in some mercantile business.

A New York firm will manufacture watches which cannot be spoiled, as common watches are, by being magnetized when brought near electric wires or dynamos. They will have a palladium hairspring and a non-magnetic compensation balance.

A Tennessee mountaineer recently found, under a ledge of rocks, the sword of a Confederate officer. It proves to have belonged to a captain who was killed in a skirmish, and one of his command hid it that it might not fall into the hands of the Union forces.

The burning of the Paterson iron works is attributed to the English sparrow. The sparrows have been noticed carrying straw and other inflammable stuff and building their nests among the girders, and it is believed that the sparks lodging in these nests caused the fire.

A scheme is on foot to establish a home for Scandinavian emigrants in Boston. This is not to take the form of charity, but to encourage the Scandinavians to establish themselves in this country. It is estimated that \$50,000 will be needed for a building, and a nucleus of \$7,000 or \$8,000 is already available.

A remarkable drinking contest took place in a saloon in Carson, Nev., recently; remarkable because the liquid was water. The wager was \$20, and the man who won it drank eleven large glasses of cold water, and was none the worse for it.

Something new in contests over wills is reported from a Jersey court. The testator bequeathed all his property to the prospective children of his son, who is a youth of 15, and who, finding himself without means, has undertaken to break the will on the ground that his father was not entirely of sound mind.

A Frenchman recently rode into Waterville, Me., driving a big Newfoundland dog hitched to a small two wheeled cart, which the animal had hauled inside of three days from a town in Canada, a distance of about 150 miles.

An Iowa man has just shipped 300,000 young pine trees from Black River Falls, Wis., to Iowa to be transplanted. He has made a shipment nearly every year for the last thirty years, and says his experience is that these trees are the most thrifty and hardy and make the best wind brakes of any tree that has yet been tried on the Iowa prairies.

Some of the Buffalo sign painters have hard times with "etc." and "etc." One sign reads, "Groceries, provisions and etc." Another has it "etc." Still other forms are "and etc.," "alsoforth," "et&c," and "and cetera." One man, who believes in giving his customers their choice from a large stock, hangs out the sign, "Dry Goods, Et Cetera, Etc., &c."

The Philadelphia Crematory association has decided on plans for its crematory building, which will be 57 by 96 feet in size, 37 feet in height, and consists of a crematory chamber and over that a chapel. The latter will be 32 feet square and 40 feet high. Brick, Ohio sandstone and iron will be the principal materials used.

Enveloped by a Blanket Fish.

A few evenings since Mr. Jellerson was out bathing in the lake when something suddenly wrapped about him like a wet blanket. He was close to shore and got there pretty lively. When he climbed up the wharf the blanket, as it appeared to be, was all wrapped about him in a queer way. He rushed into the rear of the saloon, where there was a light, and was horrified to discover that the thing which was wrapped around him was alive. It held on with a terrible suction, and required several men to get it off.

It is dark brown in color, with black specks, and weighs about twenty-five pounds. When stretched out on the wharf it was about six feet long by five broad, and not over an inch thick. It was an object of curiosity all day. Mr. Emery, the stage driver, says he saw Jellerson when he came out of the water, and thought he was wrapped up in a blanket. This is the first ever caught in this section of the world.—Carson Appeal.

A Peculiar Kind of Coal.

A twenty-three foot vein of what promises to be a valuable kind of fuel has been discovered at Elsinore, Cal., and it is thought that the whole valley is underlain with it. It is described by The News of that place as quite soft, and easily worked when in the mine, but it gets hard when exposed to the air. It resembles slate somewhat in appearance, although of a somewhat lighter color. It is clean, leaves no marks or stains on the hand, does not crack or crumble in the use, can be split like mica into very thin sheets, burns freely, and needs only to be ignited with a match, smells like burnt rubber when being consumed, and leaves behind a jet black ash resembling lampblack in all its properties. It is said to be worth \$15 per ton for making gas.—New York Sun.

Faith Cure of Scurvy.

I heard such a droll thing about a clever litterateur the other day. This "litterateur" purposed sailing over the sea, and as the billowy deep always resented his riding over it he endeavored to provide against its usual remonstrances. Science had hitherto failed him in this emergency, so he hid him to a fair cure man and gave him \$7 good and lawful money of these United States to pay the demon of scurvy out of the way. The traveler is half seas over now—literally, I mean. I wonder if he finds his \$7 well invested.—New York Graphic

Present for the Twelfth Child.

Some years ago a wealthy citizen of Bahrenfeld, in the duchy of Holstein, promised a worthy married man of that town that he would give a house to the man's twelfth child, if he should have that many. In due time No. 13 arrived, and the proud father asked the wealthy citizen to make good his promise.
