MEDICINES.

The Advantages of Morse's Carbolated Cod Liver Oil.

It is believed that the not unfrequent and dis-couraging failures of plain Cod Liver Oil and other tonic and alterative treatment to cure consumption, grow out of the fact they have no positive power to arrest the decay of the lungs; that while Cod Liver Oil supplies the waste of adipose tissue and vitality that the disease has made, as no other known substance can, it does not exercise any controlling power over the disease itself; it only gives Nature a fair chance to work her own cure. Something more is wanted—SOMETHING TO ARREST THE DECAY THAT DESTROYS LIFE—some prompt remedial agent that shall act directly upon the disease to check it while the Cod Liver Oil is building up the system. This important addition we have in Morse's Carbolated Cod Liver Oil. The power of Carbolic Acid-to arrest decaysomething marvelous. The destruction of matter cannot proceed where it is administered.

Its disinfectant, purifying and cleansing properties are truly remarkable, and have been of the greatest practical value to medical mon.

It is palatable, and now put up in bottles nolding a full pint. Price, \$1. Formula on every label.

We have on hand constantly a fresh and complete stock of

DRUGS, FANCY GOODS, PERFUMERY, ETC.

Also all the leading Patent Medicines, and a full stock of Paints, Oils, Etc. ** Prescriptions carefully dispensed. Good value guaranteed. Favor us with a call.

A NEW TEXTILE PLANT.

The Herb from Which Mexicans Make

Pulque to Be More Useful. Mr. D. P. Burdon, of Sanford, began two years ago to experiment with the growth of an indigenous plant he discovered in the vicinity of Sanford, maguey, and a species like it, but of somewhat finer fiber, which he calls by another Mexican name, agave. Of this plant the beverage pulque is distilled.

Mr. Burdon came the other day to

Jacksonville to enlist our lending citizens and entitalists in the new industry, and has met with so much encours which that he will remain over for two ort ree days. He has a dozen or more stalls with the beautiful silvery gray fibers reparated into threads, any one of which is almost, or quite, strong enough to use as ere pary, sewing thread. The plant is percental, and when once it talled root become as firmly attached to the .ell a ... grass. Mr. Durden is out his new discovery. He say to out other labor than the has the attention, yield from 1.30 :acre. It will soon become agricultural industries of 15 on the sandlest and cheaper ! utilizing soil which last last held as almost worthles . It v. it place of hemp and dethrene hands over in very great part. Two years and le found the pants in Sanford and new has a good supply of shoots. It grows spontaneously without care or fertilizing. A cord made of the fibers twisted to the size of an ordinary lead pencil will restain 2,000 pounds suspended for any length of

Every one who has seen and handled the beautiful specimens becomes enthused over its possibilities and predicts that oranges will not long be our main product. We advise our readers to hunt up Mr. Burdon, examine the fibers and hear him discuss the merits of the new product. It will not be many years before we shall see gentlemen dressed in full suits made of strong and elegant cloth woven of Florida's own native plant, and then she will be in all respects more independent of the outside world than any other of the states of the Union .- Jacksonville News-Herald.

Gold in a Horse's Carcass.

"Say, what yer goin' to do with that old nag?" shouted a passing cart driver to a man who was superintending the removal of a lifeless horse on Willow street.

"Lots," answered the other. "We'll first of all ship the old hulk to the glue factory. There the hide will be taken off and sent to a tannery, and the flesh removed from the bones. The bones are very valuable, and when the frame is separated they are distributed into piles. Shin bones are worth \$40 a ton. They are used for knife handles. Thigh bones bring more. They go to Europe at \$75 a ton, and come back here after a while in the shape of tooth brush handles. The foreleg bones are made into parasel handles, collar buttons, trousers buttons, and other small articles of usefulness. Glue comes from the water in which the bones are boiled, while the dust from the sawing of the bones'makes excellent medicine for cattle and poultry. All the rest that can't be made into bone black is ground up into powder and sold for fertilizing

"Well, who'd thought that old carcass was wuth so much!" exclaimed the carter in surprise.-Philadelphia Bulletin.

Mystery About Dom Pedro's Health. The daily reports of the physicians in attendance upon his majesty the emperor have uniformly reported satisfactory progress toward recovery. He goes out driving and walking every day when the weather permits, and at times shows much of his former capacity for long journeys. At the same time it must be confessed that there is a very general and decided uneasiness in regard to the case. No one disputes the accuracy of the daily bulletins, but there is a very general impression that they do not cover all. There has lately been a noticeable effort to seclude his majesty and to prevent visitors from seeing him. This appears inconsistent with the reported improvement in his health. If slight restriction was put on visitors some weeks ago when he was so, aquickly yield to it. weak, why should they be enforced now when he is so much stronger? There is a very general belief that his majesty's mind has become affected, and that a knowledge of this is to be kept from the public for a time if possible. This belief we most sincerely trust is unfounded, but it must be confessed that the ministers and physicians are not proceeding in the right way to correct it .- Rio News.

Last of the Trade Dollars.

The assay office is about melting up the last 100,000 of 3,200,000 trade dellars received from the sub treasur . The silver is run into bara of about 1.1 chances each, and these are stored in the rass yelfler, requiring in this form about on this I the storage space required by the lars. The superintendent has taken the caution to a say the coins, and finds them remarkably close to the at adard, in no case varying more than ene-il ousantith of 1 per cent. —Boston Transcript.

A Treasured Music Dex.

Gov. Hill has just bought a musical clock, the mechanism of which is a portion of a magnificent music box which Frederick the Great presented to a favorite lady of his court. It is firmed of sweet toned wooden flutes mellowed by age, every one being more than a century old. The box was treasured in the lady's family for generations, but three years ago it came under the hammer in Berlin. -Philadelphia Times.

Pine Hills of the South.

Spots can be found all over the pine hills of the southern states as healthy as any forests in the world. Some invalids are beginning to understand this fact and profit by it. At least a million invalids and wealthy people in the north and west would winter in these southern pine hills and on the gulf shore if they knew the honest truth about the climate of the southern states.-Chicago Times.

A Prince Turned Shopkeeper.

A member of the Austrian aristocracy has gone into shopkeeping, and Vicuma is disturbed. Prince Alfred von Wrede has set up as a green grocer and fruiterer at Percholsdorf, near the capital. The prince was rained, and he there it that a good business was better then a small government appointment, as , undoubtedly is .- London Daily News.

A West Virginia Cave.

Near Alderson, W. Va., workmen dis-covered the opening to a cave, which has been explored for a mile. It contains all the characteristics of a well regulated cave—a stream of clear running water, stalactites, stalagmites and large chambers, and bids fair to rival the best known caves in the owntry.-Chicago Herald.

A Successful Remedy.

The best medicine writers claim that the successful remedy for nasal catarrh must be at nonirriting, easy of application, and one that will by its own action, reach all the remote sores and ulcerated surfaces. The history of the efforts to treat catarrh during the past few years obliges us to admit that only one remedy has completely met these conditions, and that is Ely's Cream Balm. This safe and pleasant remedy has mastered catarrh as nothing else has ever done, and both physicians and patients freely concede this fact. The more distressing symptoms

After the Fire. "What is the first thing to be done in case of fire?" asked the professor. "Sue the insurance company," promptly answered the boy at the foot of the class, whose father had been burned out once or twice and appeared to have made a good thing of
