Kingston, 22ad March, 1855. REAPING & MOWING MACHINES,

Manufacturers, Belleville. ATHE Subscribers would respectfully in-. form the public, that they are engaged largely in the manufacture of Agricultural Implements, at the head of Main Street, Belleville, C. W., near the Rail-

We would call particular attention to our Combined Reaping and Mowing Machines, which we confidently reccommend to the public as possessing greater advantages for Farmers than any other machine yet introduced, among which we would enumerate, its perfect adaptation to uneven surfaces; its means of adjusting to various heights of cutting; Its treedom from side draft; the ease and facility of removing it from one field to another upon its own wheels, and changing it from a reaper to a Scott, Wharf, Amherst Island, or to J. J. mower. It is simple in construction, and not liable to get out of repair; is capable of cutting from 12 to 15 acres per day, and the grain is discharged in good shape for binding, entirely out of the way of the machinery-which admits of a whole field being cut without interruption. We use the very best of material-employ none but experienced workmen; and any person disposed to give them a trial, can depend upon having a durable machine, and one that will work to their entire satisfaction. We are also manufacturing Thrashing Machines from one to eight horse-power, with or without cleaners, either under or over shot, of the best description; and a general assortment of Agricultural Implements;-together with a complete assortment of.
