ring the past two weeks, workmen have been the track did not suffer so as to prevent the rethedral, for the purpose of heating this part of We hear that a tree felt across the track of the structure. To carry out this work, it has the New York Central railroad, a short distance been necessary to dig a trench round the four this side of Lancaster, just as a freight train sides of the nave, about two and a half feet in had passed Eastward. Another train following depth by three feet in width; and, in the course | it, was stopped in time to prevent a disaster. of the operations, a large number of skulls and other remains of mortality have been brought to ight. Small portions of coffins have also been found, which have this reculiarity, that they show the timber to have been about two inches in thickness, the separate portions of which have been pieced together by wooden pins. In all about fifty skulls have been brought up, the great majority of which have been found close to the wall on the north side. Many of these mortal remains are in an excellent state of preservation, although it scarcely admits of a doubt that all of them must have been interred there previous to the Reformation. It would be a vain effort to attempt to fix, with any degree of accuracy, the identity of the men and women who animated these dry bones in the flesh; but it is highly probable that they were distinguished all firedest set of boys for g-g geese you ever people in their day and generation. Glasgow cathedral, it has been recorded, contained altar to almost every saint on the calendar. founded and endowed by the piety of noble and wealthy laymen. In this way the space between every column or pillar would be occupied by an alter, and it is not unlikely that the bones now discovered may have been those of the respective founders with the members of their families. A tradition has been long extant to the might justly be pronounced clear and unquestioneffect that the remains of the Bishop-cardinal Wardlaw had been interred in the porthwest corner of the nave. Strange to say, a skull was found in this very spot the other day; there were no other remains of mortality pear it, and we have the authority of those who were present at the exhumation for stating that the ground had every appearance of having been undisturbed since this interment took place. bones which were lifted from the nave have been carefully interred in the High Churchyard .-[Glasgow Herald.
