BRITANNIA LIFE ASSURANCE COMPANY.

No. 1 Princes Street, Bank, London.

CAPITAL, ONE MILLION.

EMPOWERED BY SPECIAL ACT OF PARLIAMENT 4 Vic. Cap. 9.

THE great success of this Institution in Europe and the numerous Policies, issued by the different Agencies in Canada, evidently show that the advantages of Life Assurance are daily becoming more and more appreciated by those who feel the necessity of making some provision for their families, or securing the amount of debts due by or to them in case of premature death.—The rates of the Britannia are the lowest which can be offered consistently, with security to the Assured, and the subscriber begs respectfully to invite the attention of the inhabitants of Kingston to the numerous Tables of Rates, specimens of which may be seen at his office, or in the Montreal Herald, Montreal Gazette, and Montreal Courier as also in several papers in Canada West.

Assurances may be advantageously effected on the lives of others, either for the purpose of securing loans, or debts or in case where the party has an interest in the life of another, so as to be in any way prejudiced in the event of his decease. To creditors, a Policy of Assurance affords a certain and, in many cases, the only means of security. Also in addition to the [illegible] an extensive set of Tables has been computed for Assurance on Joint Lives, the survivor of two or more lives, and for contingent Assurances; also for Reversionary Annuities, Endowments for Widows and Children, and for every possible contingency affecting human life, against which it may be prudent or expedient to provide.

COMPARATIVE STATEMENT OF THE RATES OF THE FOLLOWING OFFICES:

Rate for one year, (whole of Life) for the Assurance of £100;

National Loan Fund	age 30	£2	4	4
Colonial Life Assurance Com'y	do.	2	3	2
United Kingdom	do.	2	3	10
British Commercial	do.	2	1	10
[illegible]	do.	2	1	9
Britannia	do.	2	0	8

The other Offices doing business in the Colonies are so much higher, that comparison is unnecessary.

The Income of the Company, independently of the large subscribed Capital, is between Eighty and Ninety Thousand Pounds, Sterling, per Annum, and of this the greatest part is continually accumulating for the payment of losses.

A party effecting an Assurance with this Company, may do so for a fixed sum, payable at his or her death, without participating in the profits, and thereby secure an immediate Benefit by not paying more than is absolutely required to provide for the risk—but if participation in profits is preferred by any party, there are "Mutual Tables" adopted by the Company, which offer an annual division of the Profits, and which being supported by the other Branch of the Institution, hold out a very safe and profitable inducement to the person wishing to Assure.

All claims payable within THREE MONTHS after proof of death. No proof of birth is required at the time a claim is made; the age of the Assured being, in every case, admitted in the Policy, cannot, under any circumstances, be afterwards called in question. Policies effected by parties on their own lives are not rendered void in case of death by duelling or the hands of justice. In the event of suicide, if the Policy be assigned to a bona fide Creditor, the sum assured will be paid without deduction; if the Policy be not assigned, the full amount of Premiums received thereon will be returned to the family of the Assured.

The subscriber begs to remark that the Britannia Company has been doing business in this Province for about ten years—and has been always found liberal, and prompt in the settlement of claims.

The necessary forms, and every requisite information, as to the mode of effecting Assurances, may be obtained either by letter or personal application to

THE BRITISH PERIODICALS AND THE FARMER'S GUIDE.

LEONARD SCOTT & CO.
NO. 54 GOLD ST., NEW YORK,

CONTINUE to publish the four leading British Quarterly Reviews and Blackwood's Magazine; in addition to which, they have recently commenced the publication of a valuable Agricultural work, called the

"*Farmer's Guide to Scientific and Practical Agriculture.*"

By Henry Stephens, F.R.S., of Edinburgh, author of the "Book of the Farm," &c. &c., assisted by John P. Norton, M.A., New Haven, Professor of Scientific Agriculture in Yale College, &c. &c.

This highly valuable work will comprise two large royal octavo volumes, containing over 1400 pages, with 18 or 20 splendid steel engravings, and more than 600 engravings on wood, in the highest style of the art, illustrating almost every implement of husbandry now in use by the best farmers, the best methods of ploughing, planting, haying, harvesting, &c. &c., the various domestic animals in their highest perfection; in short the pictorial feature of the book is unique, and will render it of incalculable value to the student of agriculture.

The work is being published in semi-monthly Numbers, of 64 pages each, exclusive of the steel engravings, and is sold at 25 Cents each, or $5 for the entire work in numbers, of which there will be at least 22.

The British Periodicals Re-published are as follows, viz:—

The London Quarterly Review (Conservative,)
The Edinburgh Review (Whig,)
The North British Review (Free-Church,
The Westminster Review (Liberal,)
AND
Blackwood's Edinburgh Magazine (Tory.)

Although these works are distinguished by the political shades above indicated, yet but a small portion of their contents is devoted to political subjects. It is their literary character which gives them their chief value, and in that they stand confessedly far above all other journals of their class. *Blackwood*, still under the masterly guidance of Christopher North, maintains its ancient celebrity, and is at this time unusually attractive from the serial works of Bulwer and other literary notables, written for that magazine, and first appearing in its columns both in Great Britain and in the United States. Such works as "The Caxtons" and "My New Novel" (both by Bulwer,) "My Peninsular Medal," "The Green Hand," and other serials, of which numerous rival editions are issued by the leading publishers of this country, have to be re-printed by those publishers from the pages of Blackwood, after it has been issued by Messrs. Scott & Co., so that subscribers to the Reprint of that Magazine may always rely on having the earliest reading of these fascinating tales.

FIRE! FIRE!

Capital $300,000.

The St. Lawrence Insurance Company Chartered in 1836, continue to insure at as cheap rates as any other sound Company in New York. It insures from five to six millions annually, and presents the following advantages.

1st. Its total rates for five years do not exceed the rates of Stock Companies for two years on farm property.

2d. It does not insure buildings in blocks, nor extra hazardous risks, but ordinary and detached hazards only. In the several towns of Plattsburgh, Watertown, Corning, Port Hope, and Picton, lately destroyed, in each of which the Company had agencies, its total losses were less than $1000.

Such facts speak.

3d The Company is bound by the survey of the agents; and this is printed on all policies.

4th. The total liability of the member is the note, and the company cannot assess beyond that sum, as is the case in most Companies of the State.

5th. The capital of this Company is almost wholly unimpaired, as it has laid but one small assessment in FIVE YEARS, and the cash balance in favor of the Company, October 1, over and above all liquidated liabilities was about

$12 000 00

6th. The policy covers loss from 12 o'clock noon the day the survey is paid to the agent.

7th. The notes of the members of this Company are assessable to increase money, but a member can withdraw his note, and cancel his policy when he may please, by paying his share of loss to that date.

8th. The capital of this company is bona fide, not got up to answer the requirements of the law of the State by taking enormous notes, on extra hazardous property, but the notes are on safe property throughout.

This Company has twelve millions of Insurance—three hundred thousand dollars capital; the heavy surplus fund above stated—its risks are well and carefully chosen; and if prudent management, strict economy, small risks, and a large business can save the members from assessment it will be done. This Company regards it as dishonest, and an imposition for any mutual Company to countenance its agents in promising what cannot be foreseen, but it gives the facts, and parties must be their own judges.

We consider the past a good guarantee for the future. During the past year the Company paid its losses $33,417 [illegible] and its expenses were only $9 193 54 exclusive of the fees to the agency. It includes $2500 paid to the Officers, about $600 for postages, and the balance was for printing and other incidental expenses.

N. B. Agents have commissions signed by the Secretary, and parties paying monies will require their production and receipts. The company will not hold itself in any way responsible for the acts of any person not having its commission.

If the policy be not received, the party should mail his receipt to this office in thirty days, and the policy at once will be returned.

AGENTS, who can come well recommended for proper age, judgment and character, are wanted to whom liberal inducements are offered. Address the Secretary.

DIRECTORS.—Russell Vilas, President,—William Bacon, V. P.,—Ira Wheelock, D. Crabtree & Schroll, Jr. Walter Wilson, Allen Chaney, W. E. Guest, J. G. Hopkins, Ira Hale, Wm. E. Sterling, J. V. Kent, [illegible] Vilas.

THE CANADA LIFE ASSURANCE COMPANY.

Incorporated by Act of Parliament.

THIS COMPANY is prepared to grant *Assurances on Lives*, whether single or joint, to sell *Annuities*, to purchase *Reversions* and to transact all business in which the risk of Life is concerned.

Tables have been expressly calculated from the most accurate data; and the Company is enabled, from its small expenditure, and the high rate of interest that money commands in Canada, to offer terms of Assurance much more favourable than the low rate of interest attainable on investments by British Companies and their generally large expenditure can with any regard to safety admit of.

An exact statement of its receipts and expenditure is annually published by the Company and forwarded to all who may be interested.

Of no other Life Assurance Company can it be said that *it invests all its funds in Canada*, and that it does not consequently contribute to the immense sum of money which is yearly sent out of the Province to pay British or Foreign Companies for that, in which (and this is nearly a solitary instance) neither Great Britain nor the neighboring States can fairly offer competition.

To parties who may at any time feel disinclined or unable to continue the payment of their premiums, this Company will grant Policies, payable at death, fairly representative of the value of such payments as they may have made, and it further engages to purchase policies for an equitable consideration after five or more full premiums have been paid thereon.

Three-fourths of the profits realized in the Mutual Branch are yearly divided amongst the policy holders thus assured.

A peculiar feature of the Company is that it is not desirous to make profits by lapsed Policies.

Tables of Rates, forms of proposal, and all other information may be obtained at the Head Office and Agencies.

Artist, the Amateur, the Manufacturer, and all who desire beautiful

WORKS OF ART.

THE Proprietors of the *Art-Journal* presume to recommend that Publication; and direct their attention to the following Prospectus for the year 1851: inasmuch as a New Volume will be commenced in January, and the occasion is favorable for New Subscribers.

Moreover, the *Art-Journal*, during the year 1851, will contain upwards of a Thousand Engravings on Wood, of the rarest, most beautiful, and most suggestive, of the Works of Industry of all Nations, to be exhibited in London, in 1851: comprising the most extensive, and the most perfect, of the Illustrated Catalogues of the Great Collection of the Art of the World.

With the First of January, 1851, will be commenced a new volume of THE ART-JOURNAL, with such improvements as have been suggested by experience, the advanced intelligence of the age, and that augmented power which results from increased prosperity. The circulation of this Journal, during the past year, has approached 18,000 monthly; its conductors are consequently enabled to obtain the co-operation of accomplished writers and eminent engravers, and to avail themselves of all the advantages which industry and capital may place at their command.

The engravings from pictures by British Artists, comprising the Vernon Gallery, will be continued; of these, as heretofore, two will be issued with each number, engraved on steel by the most eminent British engravers. Among the Pictures to appear during the year 1851 are the following:—

The Death of the Stag	Sir E. Landseer, R. A.
The Crown of Hops	W. F. Witherington, R.A
Rebekah at the Well	W. Hilton, R.A.
The Cover Side	F. R. Lee, R.A.
The Meadow	Sir A. W. Callcott, R.A
The South Sea Bubble	E. M. Ward, R.A.
The Golden Bough	J. M. W. Turner, R.A.
Spaniards & Peruvians	H. P. Briggs, R.A.
Cupid Bound	T. Stothard, R.A.
The Flower Girl	H. Howard, R.A.
The Battle of Trafalgar	C. Stanfield, R.A.
Cupid and the Nymphs	W. Etty, R.A.

The Works of Sculpture for the coming year have been selected, for the most part from the ateliers of the Sculptors of Germany; of these will be engraved the leading works of Professors Rauch, Wichmann, and Kiss, of Berlin; Professor Reitschel, of Dresden; Schwanthaler, Dannecker and Thorwaldsen.

Moreover, His Grace the Duke of Devonshire has been pleased to place at the disposal of the Editor, for engraving in the *Art-Journal*, the whole of his Gallery of Sculpture at Chatsworth.

The Editor has also arranged in Germany for a series of Twenty-four drawings—"Episodes in Life"—drawn expressly for the Art-Journal by Moritz Retzsch: these will be engraved on wood, of large size and in the highest style of Art.

A series of illustrated articles on "Early Costumes," from the pen and pencil of Professor Carl Heideloff, produced expressly for the Art-Journal, the engravings to be on wood.

A series of Twelve drawings of figures representing the "Cardinal Virtues," drawn expressly for the Art-Journal by Professor Mucke of Dusseldorf.

A series of selections (of which four will be issued monthly) from the Illustrated Bible of Baron Cotta; the drawings, engraved on wood, by Overbeck, Bendemann, &c. &.

In addition to these, other interesting works are in preparation; among them may be mentioned a series of Lives of the Great Painters, with illustrations of large size, procured from the Proprietors of the "Vies des Peintres," of Paris; a series of Illustrated Articles, exhibiting "the Domestic Habits of the Early English," by T. Wright, F. R. S., and F. W. Fairholt, F. S. A.; a series of original designs for furniture after the [illegible] the middle ages, by Carl Heideloff; the continuation of a "Dictionary of Terms in Art," illustrated; the continued series of Dr Braun's Papers on the Art-Manufacture of the Ancients; and also those of Mr. Robert Hunt, on the "Application of Science to the Fine and Useful Arts, and various matters interesting and instructive to the artist, the amateur, the manufacturer and the public.

Among the authors whose valuable assistance is given to the *Art-Journal*, and whose names the Editor is free to mention, are—Dr Waagen, Mrs. Jameson, Dr Braun, Dr. Forster, Professor Heideloff, R. Wornum, Mrs. Merrifield, T. Wright, F. S. A., Robert Hunt, Mrs S. C. Hall and F. W. Fairholt F. S. A.

To the atelier of the *Artist*; to the library of the *Amateur*—to the desk of the *Student*—to the workshop of the Manufacturer—and to the drawing room table of the Admirer of Beautiful Engravings, the ART-JOURNAL is recommended as a companion and counsellor, at once agreeable and instructive—as 'ably and impartially conducted' as 'stimulating the manufacturer to the production of excellence, and the public to appreciate his improved works'—and as having worked out with 'industry, integrity and ability,' its high purpose of 'supplying to Artists and Amateurs, accurate and useful information upon all subjects in which they are interested, and to the public the means of justly ascertaining and estimating the progress of Art both at home and abroad.'

The year 1851 will be memorable in the History of the Industrial Arts in Great Britain. 'The Exhibition,' to be commenced in May, will be of the highest interest to every civilized Nation of the world; it is, above all things, essential that the Exhibition should be properly reported; and this can be done only by a very large number of engravings. The Editor of the ART JOURNAL has therefore announced his intention to issue, in May, June, and July, Supplementary Parts [or double numbers,] each Part to consist of at least Fifty-two pages of letter press, and to contain between 250 and 300 engravings, exhibiting the best and most suggestive objects contributed to the Exhibition. This project cannot fail to be received with favor by all subscribers to the work. The Reports thus supplied will become—as a Catalogue of the most beautiful and valuable contents—a permanent record of the Exhibition and a key to the most meritorious manufactures of all parts of the world.

The Volumes, handsomely bound, of the ART JOURNAL for the years 1849, and 1850, containing each, Twenty-five line engravings (on Steel) of the Vernon Gallery, Twelve Engravings [on Steel] of Works in Sculpture, above Eight Hundred Engravings on Wood, and Four Hundred pages of Letter-press, may be purchased, each for the sum of Thirty-one shillings and six pence. These volumes therefore contain Fifty Engravings of pictures in the Vernon Gallery, which began with the volume for 1849, when a New Series of the ART JOURNAL was commenced.

In order to meet the wishes of those who require copies of the Engravings for the portfolio or for framing, a limited number of *proofs* and impressions on large paper are issued; for these early application will be necessary, as they are taken only for Subscribers.

To the Sick and Afflicted.

DR. SHERIFF,

RESPECTFULLY informs his friends and the public generally, that he has removed to the Stone dwelling belonging to Mr. E. Donoghue, situated at the west end of Ontario Street, where he is prepared to receive and prescribe for patients afflicted with diseases of long standing. Dr. S. has, during his short residence in the City of Kingston, been the means, through the hand of Providence, of restoring to health over two-hundred individuals, after they had been abandoned as incurable, and considered out of the reach of hope, by their physicians. And he intends for the future, to give his attention only to such cases as may be considered beyond the reach of medical aid from every other source. And he feels confident that he will be enabled as heretofore, to give relief to the majority of such cases as may come under his care. By way of reference, it may not be amiss, at the present time to mention one case that has been successfully treated by Dr. Sheriff, within the last three weeks.—Mr. Henry Leavens, a respectable farmer, who resides near the first toll-gate, sent for Dr. S. about three weeks ago. When he went to him he was confined to his bed, in the last stage of Dropsy, and at the same time labouring under a severe affection of the Lungs, from which he had been raising profusely of blood. In this hopeless condition his physician had left him, and said that he could do no more for him. He then commenced taking medicine, under the direction of Dr. S. and in two weeks time was able to ride out. He is now daily attending to the business about his farm as usual.

Latin Classics---Cheap Editions.

THE success which attended this experiment to improve and render uniform the Books used in the Common Schools of Canada by issuing the National School Books, has emboldened the Publishers to undertake the publication of the Classical series for the use of Colleges, High Schools, District and Grammar Schools. The first numbers of the series consist of the following:—

Excerpta from Cornelius Nepos, 1s. 6d.; the First Four Books of Cæsar, 1s. 9d.; the Georgics of Virgil, 1s. 6d.; the Fasti of Ovid, 1s. 6d.; the Third and Fourth Books of [illegible] Curtius, 1s. 9d.; Cicero de Amicitia, 1s.; Cicero de Senectute, 1s.; Taciti Agricola, 9d.; Excerpta from Horace, 1s. 9d.; the Three First Books of the Æneid, 1s. 6d.

Or the above can be had handsomely bound in two vols—price 6s. 3d. for the Prose and 5s. 6d. for the Poetry.

The Trade, Teachers, and Country Dealers supplied with Circulars, Prospectuses, &c., relating to both of the above series of Books, which are now in general use in the Province.
