This analysis shows that the etheres. principle of Wine (Onanthine) is present in considerable amount—that the peculie acid of Sherry Wine is also present, and that no traces of Fusil Oil can be detect-

From these reactions it is evident that Wine has been used in the manufactur of the "Italian Wine Bitters;" and that no whiskey—as this latter is usually sold (i.e., without high rectification), has been

used in the manufacture. The greater portion of the alcohol found certainly belonged to Wine present in the Bitters, and not to whickey. (Signed)
