COPY. Laboratory of Department of Agriculture

Washington, Dec. 28, 1869. A. M. F. Gianelli's (of Montreal)" Wine Bitters," tested in this Laboratory, yulded the following results: "Royal Italian Bitters' (2 bottles examined) specific gravity

Mean of several determinations Alcohol (by weight). 15.2-00 per cent

The extraction was abundant, and contained several aromatic odors. Upon evaperation, precipitation and, re-precipitation appreciable quantity and easily detected. Solution of Nitrate of Silver was not re duced by the liquid ("Bitters") nor was

of Fusil Oil. This analysis shows that the etherea. principle of Wine (Onauthine) is present in considerable amount-that the peculiar acid of Sherry Wine is also present, and that no traces of Fusil Off can be detect-

From these reactions it is evident that Wine has been used in the manufacture of the "Italian Wine Bitters; " and that () no whiskey-as this latter is usually sold (i.e., without high rectification), has been used in the manufacture. The greater portion of the alcohol found

certainly belonged to Wine present in the Bitters, and not to whiskey. (Signed) THOS. ANTICELL, M.D., Chief Chemist U. S. Dept. Agriculture

TO A. M. F. GIANKLLI, ESQ. DEAR SIR, -Alter a fair trial, I take pleasure in recommending your Royal Bitters. It is a very excellent stimulating tonic, aiding digestion and giving tone informed me of the ingredients. I think it | I required is a most admirable combination; a pleas-Yours truly,

R. T. COOKE, M. D., New York July MR. GIANELLI. From the World-renquened Tragediena
