and patrons, and return thanks for part favors, and acknowledge my indebtedness to the public for the generous and ample porchases of the Machines of my manufacture. I desire also to make the acquaintance of all Farmers who have not experienced the luxury of owning and operating

a Dodge Heaper and Mower. as I feel confident that a careful examination of my Machine, as built for the season of 1871, will be sufficient to induce them to buy on for the coming haves'. I have ! spared no pains in obtaining the best material and the best workmen, and I now offer you a First Class REAPER and MOWER. warranted to do good work in tangle ! and lodged Grain or Grass, performing all that | can possibly be required of a Nower and Reaper, in fact accomplishing what a few years since was considered impossible. In selecting a Machine the purchaser 500 Barrels Cream of the should take this question into consideration: - "Ont of the many Mewers and Dealers and Bakers Call before Reapers now offered to the public which is the Cheapes and most economical for me is

To do this intelligently, a comparison of the principles of the different machines must be instituted.

gone mostly out of use for the reason that allow of that ease and freedom of action on riged or nneven ground that is obtained in the two wheel machines. Of the two wheel Machines those mostly in use in this Country are the Bu k-Eye and the Ohio. The Ohio has the geating attached to the drive-wheel. The m tion of the THE SUBSCRIBERS beg leave to anward or backward movement the gearing is hand a Large Assortment of Lumber of

of experiment has been condemied as an interior machine. The Buck-Eye has also two drive wheels with the Cutter in front, but while it holds its own as a Mower, in Reaping it is quite inferior. The Rakes in front are too close to the team and the grain is delivered too clo e to the rear of he Machine.

The Johnson R-ke is objectionable be cause the Rake is operated by a dog, placed so as to open the swit h whenever a bundle is delivered, thereby the grain is left, thereby the grain is left heiter skelter over the field without uniformity of row, compelling an extra hand to each machine in loading or cocking, and nust in this respect be improved or it will, like its predecersor, the Ohio.

ceased to be cons dered first class. The Machine I offer is the Dorige Self Etake Mower and Resper, and has been perfected and combined, taking from the Buck-Eye the principles that were found to be first clas , and Irom the ()hio those adapted for Reaping, and for this reason it is sometimes called the Buck-Ere dent wheels supporting the frame which are both Drive aut large diameter, thereby giving more power in motion and running teadier on uneven ground and is always out of gear in backing. I use the Dodge Hake as THE unprecedented success of this Combeing the best in my opinion, operating perfectly in tell or short, tangled and lodged comparison of the new transactions of grain, gathering Seed Clover with as great | each year : in building and operating Respets, I now 1869, 831 affirm as the result of that experience, that | 1870, 1,062

Self Hake. assert that the separate Reaper and a separate Mower, would supercede Combined of the fallacy of that assertion. I am satis require strong machines to resist the strain they are often subjected to; that the light prudence and safety can suggest. Machines alter a lew years wear on large and rough farms, will be laid aside for heavy fabor, and the cutting portion of the Reaper is also worn, compelling the owner

to replace them with a new one at a cost New take a Combined Machine at a cost of \$150. It is conceded generally, that the gearing will wear our both the cutting apparatos of the Mower. That the Combin. A SPRING SUIT. ed Mower will resist more strain than the Single Mower, consequently lasts longer, HAVE on hand a good assorted stock
