WHAT IS VITALITY ?-Some philosophers cail it Animal Magnetism, some Nervous Force, others Calorio, but by whatever name it may be called, the thing means is the main spring of existence; it is the principle we inherit, and which may be nourished by proper attention to the reements of the body and the avoidance of excesses; it is wasted or destroyed by overtaxing the mind with study or anxiety and intemperate indulgences; indeed, requires an expenditure of vitality for every thought or action equal to the magni tude of the thought or action. When the body and the brain are well balanced, the stomach is capable of restoring the waste, but when the brain is large in propertion the stomach is incapable of supplying in other words, the expenditure is too large or the income.
