should take this ques ion into consideration: - "Out of the many Newers and Reapers now offered to the public which is the Cheapea and most economical for me in to do this intelligently, a comparison of

in use in this Country are the Bu k-Eye and the Ohio. The Ohio has the gearing attached to the drive-wheel. The m tion of the

Rake Mower and Heaper, and has been perfected and combined, taking from the Buck-Eye the principles that were found to be first class, and from the Ohio those adapted for Resping, and for this resson it is sometimes called the Buck E, e deat wheels supporting the frame which are both Drive: sof large diameter, thereby giving more power is motion and running .tesdier on uneven ground and is always out of gear in backing. I use the Dodge Hak" as being the best in my opinion, operating perfeetly in tell or short, tangled and lodged: grain, gathering Seed Clover with as great facility as grain. After ten years experience in building and operating Respers, I now affirm as the result of that experience, that the Dodge Hake is a perfect working

to which I will a lade. I have heard age: to assert that the separate Resper and a separate Mower, would supercede Combined Machines. Experience has convinced me of the fallacy of that assertion. I am satisfied in our comparatively as w country we require strong machines to resist the strain they are often subjected to; that the light Mechines after a few years wear on large and rough farms, will be laid aside for stronger ones, as not being adapted to such beavy labor, and the cutting portion of the

paratus of the Mower. That the Combined Mower will resist more strain than the Single Mower, consequently lasts longer, and must tell at least \$50 in favor of Cou-Buy the DODGE SELF-RAKER, the only perfect Com-

NAPANEE, ONTARIO. WOULD through the medium of this L Circular, introduce myself to my friends and patrons, and return thanks for part fivors, and acknowledge my indebtedne a to the public for the generous and amp e purchases of the Machines of my manutanture. I desire also to make the acquaintance of all Farmers who have not experi-

spared no pains in obtaining the best material and the best workmen, and I now offer you a First Class REAPER and MOWER, warranted to do good work in tangled and lodged Grain or Grass, performing all that an pussibly be required of a A ower and Reaper, in fact accomplishing what a few

the principles of the different machines must be instituted. The old sty e one wheel machines, have gone mostly out of use for the reason that Dry Goods, some mostly out of use for the reason that allow of that case and freedom of act on on riged or uneven ground that is obtained in the two wheel machines.

Of the two wheel Machines those mostly

knife may be stopped, but in either the forward or backward movement the gearing to neces andy in motion and alterseveral years of experiment has been condemied as an interior machine. The Buck-Eye has also two drive wheels with the Cutter in front, but while it holds

itsown as a Mower, in Resping it a quite inferior. The Rakes in front are too close to the .eam and the grain is delivered too clo e to the rear of the Machine. The Jenneon R-ke is objectionable tecause the Rake is operated by a dog, placed so as to open the swit h whenever a bundle is delivered, thereby the grain is left, th. reby the grain is left helter akelter over the field without uniformity of row, compelling an extra hand to each machine is loading or cocking, and nust in this respect be improved or it will, like its predecersor, the Ohio.

cessed to be considered first class.

The Machine I offer is the Bodge Self

Belf Hake. There is another item of experience to

have constituted MESSES.
