TUESDAY EVENING, OCT. 24, 1871.

paid their CITY TAXES are reminded to | fatherly advice, and expressed the assurdo so at once, and save costs.

In yesterday's issue we alluded to the spirit of revolutionary principles now prevailing in sundry parts of Europe. 1. is but fair to enquire whether this spirit has not been engendered by the "march, of the schoolmaster abroad," or in other Ford, and Mr. Woods closed the proceedwords, whether the universal education of , the masses in some of the countries in Europe has not had something to do with, the said 'march.' And it may be farther h inquired into, whether this unusual eduextion contributes to the happiness of the. many peoples among whom it is spread-

The countries in which the education, of the people most prevails are Prussia in Europe, and the United States in America. The British Islands are only becoming adicated on masse, while Canada is treading on the footsteps of the United States. In these four countries the people seem happy and contented; pleased with the liberal government under which they live, ostensibly they wish for no change. But is this real, is it substantial? We are sufficiently bold to think it is not. Just | Batt., Frontenac, and the 14th P. W. O. after a successful war, Prussia is quiet, Batt., Kingston. came off on Monday afbut for how long? Just so long as the ternoon. The following was the score, people can get breath to carry out what ranges 200, 400, and 500 yards, 5 shots at 1 they have of late again clamored for, the each range :-Reforms of 1848, nipped in the bud by the ill-judged violence of their promoters, In the United States, the open rascalities of their leading men, rascalities that the law will not touch nor juries punish, show anything but a healthful state of political existence. Tweeds, Halls and Connollys may be found to give their iniquities a higher range, and the Gov. ernment may be as readily upset, as the City Treasury of New York be plundered. We place no confidence in the stability of American Institutions. In England, where until very lately Education was general, towing to its numerous educational charities), but not universal, things do not look brightly. Mr. Bradlaugh, another William Cobbet, is now a power, which his predecessor was not, simply because by means of newspapers at every man's door, the people are more informed, though we won't say better. The end of all this cannot be foreseen, but we shall not croak about the downfall of the momerch, because really we do not stread it, although it may have to fight for its existence. Of Canada we shall say but this. Though the existing universal calucation may possibly cause some of the evils we dread, yet fortunately there is a safety valve in the Immigration, not composed of educated men and women, of the late Peter O'Reilly, Esq., which is While this continues, and continue it will to take place at 9 a.m., to morrow. mitil Immigrants become educated, For Fort Garry. - Intelligence

people who work so hard for their daily bread, and are yet so ready to share it with the needy, as those of the dramatic COPYBOOKS FOR The profession. From ne calling has there profession. From no calling has there come a more generous response to Chicago's call for relief, and none have given so freely according to their means. Com

Poor Paris, while yet struggling to get on her feet from her late terrible scourges of war, revolution, sieges, bombardments, incendiarism, and all the horrors of the Commune, comes to the relief of suffering Chicago, contributing 151,000 franca from mankind there are few nobler acts than Will those good people who insist that

Chicago was burnt up as a matter of divine judgment inform us in regard to latter were not notoriously bad -many of and some were remarkably good. I' takes an able man to account satisfactorily for these calamities, so far as they are controlled by a higher power.

The amount of money thus far contributed by the people for the relief of the Thos. McAuley York Times at five millions; and that paper makes a calculation, showing that \$200 / will be about the share for each family made homeless, if the money is equally divided. At the time the census was taken Chicago had a population of 297,977, and of these the homes of 125,000 were burned. Supposing there is an average of five persons to a family, this would make 25,000 homeless families.

The Horton.

We notice that the universal opinion expressed in official circles in the United States is that the E. A. Horton, the pirated fishing schooner, seized by the Canadian authorities for infractions of the law, and stolen by Gloucester fishermen, must be returned to the part whence she was taken. This, in face of the silly demon stration got up by the Gloucester people is so humiliating to them, that we can afford to forgive whilst laughing at them.
