The Royal Canadian Insurance Company.

THE present rates of Fire Insurance throughout the Dominion (the result of combination among the various Insurance Companies) are, it is believed, not only excessive, but unnecessary; and however severe the losses to those Companies may have been in the late calamitous fires in Chicago, Boston, and other cities in the United States, the

(increase which has lately taken place in Kingston and elsewhere. The improvements for extinguishing fire by the recent introduction of Steam Fire Engines and other apparatus have been ignored. Hitherto the risks have not been sufficiently classified, and taking past experience into consideration, it is ample to justify the promoters of this Company in saying a most profitable business can be done in the City of Kingston at much reduced rates than are de nanded and enforced by the existing com-

which have hitherto been anumally sent abroad. Within a short period, the rates on special risks -- such as the Cathedrals, Churches, fospitals, &c , have been increased 100 per cent. while the mercantile community now pay from 100 to 150 per cent more on their stocks, than were the current rates of Insurance in the same premises one year ago.

1872 within the Lominion, this great increase would seem unnecessary, as the following table shows:-NAME OF COMPANY. PREMIUM FOR THE YEAR. Royal (of England) 8315,848 36 \$182,497 01. North British. 235,290 00 Agricultural..... 73,613 23
