the woods, were subsequently captured.

ing in the night and hearing burglars at work in your house. This was the case with Mr. Henry on South street, Friday night. As soon as he detected the noise which appeared to be down stairs, he softprowl around for a match. His wife was soon awakened by the same noise, and, believing that something was the matter Every time she rapped Lim, she shricked Chicory Mills, Bruges, Belgium,

for help, and in a brief space of time the children and Mrs. Davis, who lives down stairs, were on the scene. Mrs. Davis was not dressed for company, but in the excitement she didn't mind adornment She had a candle in one hand, and a large carving fork in the other, and was about to drive the latter into the legs of the villain, when recognition ensued. Then Mrs. Davis laid down her candle in one direction, and the fork in another, and immediately returned to her own apartments, her yellow flannel night-cap, as it shot down the stairs, being the first thing Mr. Henry saw on springing to his feet. The children were returned to their rooms and put to bed, but the parents did not resume their couch. It was so pleasant that Mr. Henry concluded to remain up and enjoy the scenery, and Mrs. Henry hought it best to stop up, so as to change the cloth on his head as often as pos-

une describes a new engine invented by a young German chemist, which is to be propelled by a combination of oxygen and hydrogen in presence of flame, producing extraordinary expansion at a trifling cost. The originator of this engine, like many other persons who have untried inventions in progress, is extremely sanguine as to his new motive power, and is confident it will drive a ship across the Atlantic in three days, or even less time. He also has a new appliance for prepulsion, which he thinks are as great an improvement over ordinary methods as his new motive power is over steam. The only Of parting words that were less than kind, difficulty apprehended in the way of com-From my friend se prompt to resent offense | plete success is finding means to control the excessive expansion to be produced. which amounts to very much the same thing as explosion, if, indeed there is any difference worth mentioning. If he can only manage this he will be all right, and And to hide the feeling I would not show, may then proceed to construct a still more powerful engine to be moved by the expansion of his gases as he would to accurately govern the expansion of nitro-gly-He thought to have known! But that is cerine, which although it could undoubtedly be made to govern machinery,

might not move it in precisely the way -The minority in the Spanish Cortes
