NEW LOCOMOTIVES. - This morning the Canadian Engine and Machinery Company of this city dispatched to the main Grand Trunk Line three newly manufactured narrow guage Engines, very heavily and handsomely built, for freight. The branch track leading into the foundry premises was previously altered to marrow guage to allow the engines to be run out. There is on hand, in process being filled an order for fourteen engines. The new engines are of heavier construction than even those of the old broad guage, and are finished in a manner quite | Hay. creditable to the Foundry. One of the new engines of the company's manufacture was disabled yesterday by running off the track eastward.

SLIPPERY JACK .- If he is caught it will not be healthy for him. He will wish that he had attended a threshing machine when he was young, and had by accident fallen in where the straw goes through and met a sudden end. On Saturday night the prowling wretch was out again and was not caught. He takes good care not to commit hunself when a man is anywhere around, and when an alarm is raised he makes the best possible use of a nimble pair of legs. About 9 o'clock on Saturday evening a daughter of a most respectable resident of Wellington street. was passing along Wellington street from her house to a store not three blocks off when this man, who had been standing under the lamp post at the Congregational Church, followed her, and caught her up in his arms. This was opposite St and the assailant will be sought after in future most eagerly.
