The attitude of the of the United States or Europe. It is Roman Catholic Church towards civil libintended to have whatever samples of erty, prior to Confederation, is placed in this kind are shown from Ontario sent to contrast to what is experienced now, and a London after Centennial is over, there to reason advanced for the great change obremain as evidence of what we "know served. Sir A.T. Galt finds no difficulty Prairie Province:about farming."

The Ottawa Times says the investigation which has been carried on before Dr. Orton's Committee, the object of which is to redress the grievances of farmers, has been as ridiculous a fiasco as could well be imagined. Thus far not a particle of evidence has been adduced t show that there was the least necessity for such a Committee, but on the other hand every witness summoned has only confirmed the general opinion that the agricultural interests of the country are dition. A suggestion has been offered, made for an international interchange of seeds and other agricultural productions, and for statistical information thereon with the countries of Northern Europe. This, it is thought, would almost compensate for the defunct Reciprocity Treaty. There can be no doubt but that such an arrangement would serve an excellent purpose, and materially help to promote the interests of Canadian farmers, who have nothing to fear in a comparison with other and older states.
