FELLOWS' Compound Syrup of Hypophosphites. S ALL LIFE-ENDOWED BODIES, whether they be beasts, birds, reptiles, insects, or even zoophytes and subjects of the vegetable, kingdom, are egoverned by vital force, which binds all the springs of existence; and as nothing can save them from destruction when this principle leaves them,

the discovery of means whereby vitality may

be sustained in the living body is indeed

boon to the world. Modern chemistry has ventilated the question and discovered the ingredients constituting the brain, muscles and nerves, and finds that by introducing these ingredients in proper proportions the brain and nervous system are This, then, is substantially the basis on

which Fellows' Hypophosphites is built; its direct action is upon the blood, the brain and nervous system, and the muscles. Strength ening the nerves, it causes the rapid distribut on of vitalized blood in the muscular organs. of the body. Rousing the sluggish heart and liver,

strengthening the action of the stomach and bowels, and enabling the lungs to be fully inflated with oxygen. It is adapted for all cases of weakness and emaciation, whether arising from a sedentary life, a tropical climate, from fever or debility from any cause, and is efficacious in pulmonary consumption, many confirmed cases having

been cured, and all benefited, where its use

has been continued over a fortnight. In bronchitis it is a specific, and in asthma gives relief where every other remedy For nervous debility it stands unrivalled and may be used with confidence n all cases' As this is entirely distinct and different from every other preparation of Hypophosphites, be careful to ask for Fellows' Syrup,

Sold by Apothecaries. Price \$1 50; six for
