CHANCERY SALE

CITY PROPERTY.

Draper vs. Kelly.

TOURSUANT to an Order of Sale made in this cause, will be sold by Public Auction, with the approbation of James A: Henderson, Esquire, Master at Kingston, William Murray, at his Auction Rooms, in the city of Kingston,

On Saturday, the thirteenth day of April next,

at twelve o'clock, noon, the following Freehold Premises, in two parcels, viz:

PARCEL NO. 1.. All that part of Lot No. 2 on the west side of Cataraqui River, formerly in the township, now in the city of Kingston, lying west Montreal Street, containing 43 acres, more less; and that part of said Lot lying between Montreal Street and the old Montreal Road, containing about four acres.

PARCEL NO. 2. That part of Lot No. 3 on the west side of

Montreal Street, known as the Manahan Farm, containing 36 acres, more or less, and bound on the west by the Murdock Farm. The said parcels lie in close proximity to the

Grand Trunk Railway. The conditions of sale are the standing con-

ditions of the Court. For further particulars and conditions of sale, apply at the Master's office, or to the Vendor's Solicitors, Campbell & Macdonnell, Kingston, at whose office a plan of the property to be sold may be seen. Kingston, 18th March, A.D. 1872.

WEDNESDAY EVENING, APRIL 3 OUR SCHOOLS. We have never beer among the number of those who have tried to make political capital out of the exigencies of school legislation, and we shall always try to avoid any such actions in the annoyance have patent agents and their clients as brisk as it was last season. future, but this does not prevent us from become to manufacturers and the public gene. Forwarders tell us their business was much seeing many things in our late school legis- rally in England, that a total abolition of the retarded from vessels unnecessarily crowding lation which urgently demand rectification. laws is strongly advocated as the only remedy | round the docks, and that they had no means The law as amended in the last session of for the evil. Applications for patents are filed of compelling masters of such vessels to make the first Ontario Parliament is a good one. at the Patent Office at the rate of from twelve room for those which should have been lose. We say it with all emphasis, but it is unfor- to fifteen per day, while probably not more ing or discharging. tunate that the regulations issued under its | than one of them possess any public utility, or | In order to raise a fund for payment of harenactments have been calculated to prove most of them a rehash of old things or me- bour master's salary, and also for improving Kingston Bottling Depot most harassing to every friend of education. We cannot object to the act which secures us uniformity of text books in al our schools, but we can with truth affirm that the quantity provided is far in excess of the demand. We are fast drifting into an era of superficiality, in which we shall have to study everything by turns, and nothing long. The series of The Americans have discovered that Canada ports, not going over the Welland Railway, works upon which a pupil is now engaged presents a fine field for their "ring" of paten. and if our harbour is to be improved artificialwould demand half a lifetime to master, tees to operate in, and now that the alluring ly, there is no good reason why Kingston and the mind is perplexed by the tortuous | bait they have been angling with the last year | should be an exception to a general rule. variety. The necessities of an education are or two by admitting Canadians to their Patent I would object to any person being allowed subordinated to a too great variety of ob- Office on the same terms as their own people to build a pier on Point Frederick shoal; light jects, and the useful is either neglected or failed to accomplish their object, they are try. vessels can now beat over it to or from the made subservient to other things which will ing what virtue their is in a threat, and Ducks. The building of a pier would not onnever prove of any practical value. We through their agents who have their ramifica- ly stop that, but would materially obstruct hope to see a change soon and the sooner the better. Educationists are now agreed that it is better to study a few things, and study them thoroughty, rather than gain a something of all the arts and sciences and languages of the world. And such, with a sort of grim satire, is the programme laid down for the youth of this province. and enforced by a threat of withdrawing all government aid if it is not strictly and fully carried out. It looks well in print, and may be got up expressly to impose upon ignorant foreigners, but the unfortunate industries to the tender mercy of English and teacher and his distracted pupils soon find

tection from the designing schemers, and our make themselves thoroughly acquainted with patent laws as at present framed do this the nature and qualities of Nitro Glycerine, most effectually. We can submit to be taunted about illiberality, we can bear the imputations of slow goes, but we cannot consent to hand over our young struggling manufacturing American patentees. I of course draw a wide distinction between that there is no joke intended for them quasi inventors and real ones, but the latter We have always advocated an admix are so few when compared with the former that ture of branches of education to some they are almost lost in the crowd. No one, small extent, but when we are forced not even the most selfish, will grudge any reto train, in addition to the ordinary branward commensurate with the value of a real ches, in Botany, Physiology, Agriculture, invention that is proved to be of public utili Chemistry, Natural Philosophy, Christian ty, whether it is derived from royalty on pa-Morals, Civil Government, Telegraphy, and tents or a grant of public money; but the ten-Logic, the time for patient endurance must dency of the operation of the present law is to be well nigh exhausted. The fact is, the clog the wheels of industry, hamper manufac Council of Public Instruction must have tories, and defraud companies, for companies given their sanction to such a bill of fare having no eyes to see, ears to hear or conunder very peculiar circumstances, and are ciousness to feel, are generally selected to be now seeing the points of their insane operated upon, and every superintendent, by virtue of his position, becomes an inventor patentee, and member of the "ring." The present period seems to be as-barren of real inventelligent and unintelligent alike, at the tive talent, as the first half of the present utter folly and absurdity of expecting any. century and the latter part of the last were thing but "confusion worse confounded, prolific. The inventions of Arkwright, Crompfrom such an attempt at mixing the possiton and Watt revolutionised the industries ble and practical with the impossible and impracticable. The work is bad enough in youd computation. James Watt gave to the the Public Schools, but when we turn to world the steam engine as complete as it is the programme for High Schools, we are, now, and the locomotive is the same as when still more amazed. With all the subjects it le't the hands of George Stephenson, and no above enumerated, we have Latin and man can lay his hand on one radical improve-Greek, French and German, Trigonometry ment and say it is mine, and yet hundreds of and Astronomy, Electricity and Magnetism. patents have been granted both in Europe and Can anybody of intelligent men really have | America for so-called improvements upon the steam engine. True we have made marvellon supposed it possible for the youthful mind progress in improvements upon every kind to master even the merest principles of machinery the Jast twenty or thirty years, but all these subjects? The very enumerathat is due to the mechanical refinement introtion of them is fit to make us pause and duced by the eminent manufacturing firms of solemnly ask, "Whither are we drifting? the old country, and not to patentees. One These Solomons have actually printed in their announcement, "No departure from modern inventors.
