for their transfautic service. A large assemblage of ladies and gentlemen congregreed to witness the launch. As the vessel left the ways the ceremony of sandtag her the "Bushos Ayreau" was gracefully performed by Miss Dunlop, daughpartners of Mesers James and Alexander Allan. The principal dimensions and particulars of the "Buenos Ayrean" are: -Length between perpendiculars 385 in breadth (moided), 42 ft; depth moulded to upper deck 27 feet, and to awning deck 34 feet 2 inches; gross tonnage, 4; 040 tons. It is noteworthy that up to the present time no attempt has been made to construct a steamer at all approaching the dimension of the "Buenos Ayrean' of mild steel, and no doubt her future movements will be watched with much interest by all concerned in the mercantile shipping of this country. Her construction is of the continuous cellular. double-bottom system, extending from end to end four feet deep, and capable of carrying 645 tons of sater ballast. Besides the ordinary frames up the sides.

24 inches apart, there are deep plate frames cory 12 feet, and intercostally arranged side stringers.
