CONSUMPTION CAN BE CURED

IS A FACT ATTESTED BY THE HIGHEST MEDICAL

AUTHORITIES IN THE WORLD. A careful observance of the laws of health, and the systematic and persistent use of Scorr's SMULSION OF COD LIVER OIL with HYPOPHOSPHITES OF LIME AND SODA will accomplish this result. This preparation has all the virtues of these two most valuable specifies, in a form perfectly palatable, and acceptable to the most delicate stomach, and we make the unqualified statement that Scott's EMULSION is being used with better results, and endorsed and prescribed by more physicians for Consumption—and the diseases leading to it, such as Chronic Coughs, Bronchitis, Scrafula, Ansemia, General Debility and the Wasting Disorders of children, than any other remedy known to medical science. The rapidity with which patients improve on this food medicine diet is truly marvellous.

See What Physicians and the People Say about it. MESONS. SCOTT & BOWNE.—Gertlemen.—Within the past year I have used in my own family and in my private practice prescribed very extensively Scott's EMULSION OF COD LIVER OIL with HYPOPHOSPHITES and found it a most valuable preparation, especially in diseases of children. It is agreeable to the most delicate stomach, which renders it a very reliable agent as a nutritive remedy in consumptive and scrofulous cases. Oct. 12, 1879 Yours respectfully. A. H. SAXTON, M.D., Baltimore.

MESSTS. SCOTT & BOWNE-Gentlemen-Within the last two months I have fairly tried Scott's EMULSION OF COD LIVER OIL WITH HYPOPHOSPHITES, and I candidly declare that it is the finest preparation of the kind that has ever been brought to my notice; in affections of the lungs and other wasting diseases we can consider it our most reliable agent, in a perfectly influence. elegant and agreeable form.

Very truly, J. SIMONAUD, M.D., New Orleans, La.

MESSEF. SCOTT & BOWNE:-Gentlemen-In September, 1877, my health began to fail and my physician pronounced it spinat trouble; under his care I got some relief from pain, but my general health did not improve, and early in the winter I began to raise blood and rapidly grew worse. In May last I was taken with a violent bleeding which brought me to my bed and my life was despaired of for many weeks; violent symptoms appeared, night and morning coughs, night sweats, short breath, and a return of the spinal trouble. My physician tions, but they did me no good. I lost all hope of hie, and was an object of pity to all my friends. Last September I purchased a bottle of your Empleion and before it was all taken I was better . I then bought a dozen bottles, and have taken all with the following results: Cough subsiding, night sweats stopped, appetite returned pans in spine disappeared, strength returning, and my weight increased from 118 to 140 pounds in sixteen weeks. I have taken no other medicine since commencing with your EMULSION, and shall continue its use until I am perfectly well. I frequently mees some friend on the street who asks what cured you, and I answer Scorr's Emulsion of Cop Liver Oil, &c. I have a friend who has not spoken aloud for 15 months and he is getting better. I gave him a bottle and he bought two more, then got a dozen and says it is food and medicine for him. He was given up to die a year ago, but he is improving now wonderfully. My recovery is exciting the surprise of many people, and I shall do all I can to make known your valuable medicine.

Jan. 20th, 1879.

Very truly yours,

H. F. SLOCUM, Lowell, Mass.

> MESSRS. SCOTT & BOWNE: Lynn, Randolph Co., Ind , July 2nd, 1878. About the 25th of last April I got a bettle of your EMULSION, and at that time I was so prostrated that no one who saw me thought I could live but a few days at most. I could retain nothing on my stomach and was literally starving. I commenced the use of the Emulsion in small doses; it was the first thing that would stay on my stomach; I continued its use, gradually increasing the dose, and from that hour I commenced mending, and now am able to ide and walk and am gaining flesh and strength rapidly. I have advised other parties to try it, and some two or three have already tried it. I am sure I shall enti.ely recover,

FRIDAY EVENING, DEC. 5. MEN, NOT PRINCIPLES.

This is a country which is truly free, air Where every sittzen a sovereign is; No would-be monarch, and no modern Jesar Can claim this mighty continent for his; But they who fain would keep the country Upset themselves, divide and disagree.

The highest blessings for the greatest number. Is still the theory of which we boast;
But petty matters all our actions cumber,
Binding great issues to the party post,
And daily putting principle to shame,
To sound the praise of some ignoble name. The many are supposed to join their voices, And thus to fully overcome the few; But still 'tis doubtful what the people's choices

Or if the echo of their words is true; For little men, who seek to catch their votes. Start simple tunes on many different notes.

Great principles the people soon would settle,
If once the issues could be clearly made;
But toey are not allowed to prove their met-By men who make of politics a trade, And principles, in spite of voice and pen, Serve but as stepping stones for seinsh men.

Thus we, as destiny decrees, are drifting, Quite aimlessly, to our appointed end; To this side and to that the rule is shifting. While matters change, but scarcely seem to

cone, either in the way of prospecting or mining. Phosphates, I was informed were so low in price that it would not pay to mine and export them, while those who had been prospecting certain iron locations had only a short time before quit work, for the time at least. The Frontenac Lead Mining and Smelting Company, who have expended a very large aum of money, are really doing next to nothing now, and I must say that with the present strong demand for lead in the English market, I was more than surprised that a mine on which English capitalists have spent so much, and smelting works which were so recently established, only with regard to thorough efficiency, should be lying idle and useless, only contracting a bill of expense for caretaking. Without attempting to fix the blame for this state of affairs upon the shoulders of any person or persons, I will merely give what I could learn of the true position of things from the manager and others. From the manager I learned that this Company had a mile and a quarter of vein on their property, varying from seven to uneteen feet in width-about eight per cent. of the weight of vein matter between the walls being pure galena. Two shafts had been sunk on the Company's property three-quarters of a mile apart, and to a depth of 350 feet,

MINING IN FRONTENAC

in the County of Frontenac, but on reaching here I was not a little surprised to find that I was either too late or too early, insemuch as nothing was being

been extended 200 yards. at 60 feet from the surface, and at every succeeding 60 feet below. The manager also informed me that as yet n storing had been done in the mine, so-that now it was just in the position for a large and profitable output. Beaides this, the mine was supplied with the most complete appliances for pumping, and for hoisting the ore, while two Cornish crushers which had been fitted up in the reducing works at the mine were capable of reducing 140 tons of ore in twelve hours. The mill was also supplied with juggers for concentrating Sir, -As the time is drawing near the galena and carrying off all particles when the first batch of cadets will leave of sand and quartz previous to shipping the latter to the smelting works at Kingston.
