All alike will be interested in the following extract from a lotter which has just been received from Mr. Stanley, the friend. The letter is dated from Bunna friend. The letter is dated from Bunny a Point, at the mouth of the Gongo River, September 13, and says:—"All this year I have been very busy, and have worked hard. I have equipped one expedition on the East Coast; I have reconstructed the East Coast; I have reconstructed the East Coast; I have reconstructed to the East Coas whose unisfortunes we have heard so often; whose unisfortunes we have heard so often; and have explored personally several new districts on the East Coast. Having finish.

descent of the Livingstone. * * * And now I begin another mission seriously and deliberately, with a grand object in view. I am charged to open-and keep open, if possible-all such districts and countries as I may explore, for the commercial world. The mission is supported by a philanthrophic society which numbers noble-minded men of several nations. It is not a religious society, but my instructions are entirely of that spirit. N. vi dence must be used, and wherever tejected the mission most withdraw to seck another field. We have abundant means, and therefore we are to purchase the very atmosphere, if any demands be made up off us, rather than violently oppose them In fact, we must freely buy of all and every, rather than resent, and you know the sailor's commandment-"Obey orders if it breaks owners"-is easier to keep than stand upon one's rights. This is a principle which I have always attempted to follow, but frequently the demands were so extertionate that they exceeded the value of my property. However, this time a chief must have a large mouth indeed that cannot be filled with good things. A year's trial will demonstrate whether progress can be made and tolarance be granted under this new and tolarance be granted under this new system. In some regions experience tells me the plan may work wonders. God grant it everywhere! I have fifteen Europeans and 200 natives with me. It is too peans and 200 natives native peans and 200 natives native peans and 200 native peans an early yet to say much of them ; but most of the natives seem not worth their rations. However, patience! We shall see what time will make of us all, and how it will mould us all anew for the good work." Who is there in Great B it un that will not wish well to this new enterprise, which peacefully seeks to reap for commerce and civilization the fruit of the splendid discoveries effected in Central Africs by this illustrious traveller !--London Telegraph.
