IMPORTANT LETTER

From a Distinguished Physician.

No single disease has entailed more suffering or hastened the breaking up of the constitution than Catarrh. The sense of sinell, of taste, of sight, of hearing, the human voice, the mind, one or more and sometimes all yield to its destructive influence. The poison it distributes throughout the system stacks every vital force, and breaks up the most robust of constitutions. Ignored because but little understood by most physicians, impotently assailed by quacks and chariatans, those suffering from it have little hope to be relieved of it this side of the grave. It is time, then, that the popular treatment of this terrible disease by remedies within the reach of all passed into hands at once competent and trustworthy. The new and hitherto untried method adopted by Dr. hanford in the preparation of his Radigal Curr has won my hearty approval. I believe it likely to succeed when all the usual remedies fall, because it strikes at the root of the disease, viz., the acidified blood, while it heals the ulcerated membrane by direct application to the nasal passages. Its action is based on certain fixed rules, and unless the vital forces are too far exhausted, must, in the great majority of cases, effect a cure.

GEO. BEARD, M. D. NOBSCOTT BLOCK, SO. FRAMINGHAM, Oct. 1, 1874. SANFORD'S RADICAL CURE

MAY safely claim to be one of the few popular remedies receiving the approval of medical gentlemen, who, in private, not only freely recommend it but use it in their families in preference to say of the preparations usually prescribed by physicians.

"You are aware," said a distinguished city physician, "that my obligations to the Mass. Medical Society are such that I cannot publicly recommend or prescribe the Radical Cure; but since I received so much relief from the use of it myself, after a thorough trial of the usual remedies, I have privately advised its use, and presume I have sent to your store no less than one hundred of my patients for it."

UNIVERSAL SATISFACTION.

GENTLEMEN. - We have sold Samford's Radg-candidly that we never sold a similar preparation that gave such universal satisfaction. We have to learn the first complaint yet.

We are not in the habit of recommending patent medicines, but your preparation meets the wants of thousands, and we think those afflicted should be convinced of its great merits o that their suffering will be relieved. We have been in the drug business for the past twelve years constantly, and sold everything for the transfer. and sold everything for Catarrh, but yours leads all the rest. If you see proper you can use this letter or any part of it that you wish. Very truly yours, S. D. BALDWIN & CO. Wholesale and Retail Dealers in Drugs, Books and Stationery, Washington, Ind., Feb. 28, 1876.

Rach package contains Dr. Sanford's improved inhaling Tube, and full directions for use in all cases. Price, \$1.00. For sale by all wholesale and retail druggists and dealers throughout the United States and Canadas. WEEKS & POTTER, General Agents and Wholesale Druggists, Boston, Mass.

An Electro-Galvanic Battery combined with a highly Medicated Strengthening Plaster, forming the best Plaster for pains and aches in the World of Medicine.

ELECTRICITY As a grand curative and restorative agent is not equalied by any element or medicine in the history of the healing art. Unless the vital spark has fied the body, restoration by means of electricity is possible. It is the last resort of all physicians and surgeons, and has rescued thousands, apparently dead, from an untimely grave, when no other human agency could have succeeded. This is the leading curative element in this Plaster.

BALSAM AND PINE. The healing properties of our own fragrant bal-sam and pine and the gums of the East are too well known to require description. Their grateful, healing, soothing, and strengthening properties are known to thousands. When combined in accord-ance with late and important discoveries in phar-many, their healing and strengthening properties are increased tenfold. In this respect our Plaster is the best in use without the aid of electricity.

TWO IN ONE. Thus combined we have two grand medical agents in one, each of which performs its function and unitedly produce more cures than any limiment, lotton, wash, or plaster ever before compounded in the history of medicine Try one. Paics, 25 Canta,

Sold by all Wholesale and Retail Druggists throughout the United States and Canadas, and by WKERS & POTTER, Proprietors, Boston, Mass.

serious than before. As we walked along he tried to huna tune but he could remember no air, and I saw how matters went with him. However his pride would not suffer him to retract, and we went on together, he quite silent when he found music im-

That night we passed on the summit of La Cote between the two glaciers of Bossons and Taconey. I wrapped Dr. Paccard in my blanket so that he passed a tolerable night; bu: as we ate our bread before saying good night I could hardly help referring to the chick he had ordered for supper Still it is cowardly to

insult the unfortunate, even when they are themselves to blame, and I was never a coward. At two o'clock, on the first sign of daybresk I woke him, and we started. The sun was clear and bright; there was now no fog, and the head of the old mountain shone white in the aun light. 'ah! thought I, 'the day is come at last.' When we come to the glacier of Taconey the poor doctor turned pale at the night of the immense crevasses and precipices we had to cross upon narrow bridges of too that crack beneath our feet, and which had they given away entirely, would have carried us with them into nofathomable abyeses, where the eye even could never reach us. He got batter as we advanced, but whed we had passed the Grand Mules, and I showed him where I had slept the first night, he trembled again. I tried to rouse him with a little brandy, but a gust of wind came, blowing his hat far away into Piedmont, and obliging us to crouch in the snow to escape being blown away ourselves from the slippery ledge where

we stood, while we were in continual terfor lest the huge blocks of snow detached by the wind should fall on us and bury us alive. Great lumps as big as chalets the furious wind tore up, and now the bour when I had told my Martha to look out for us, I was anxious to go on, but I could only get him to follow on allfours like a goat-or rather like a pig. for he could neither spring nor climb. In this way we proceeded until we reached the Dome de Gonter, whence by the aid of my glass I could see my dear Martha in the valley. She was not alone; quite a number of the village s were with her, and among them I recognized Jesoph Carrier and Christophe fourner, two guides who had made fine sport of my failures. They had a glass and saw us, and my dear waved her pink
