The investigation of the Chapleau-Prentice scandal has commenced, and Mr. Prentice, at Mr. Irvine's instance, chas given some evidence of a damaging na. ture desirat the Government. It is to early as yet to give a decided opinion on the merits of the case, but in any even there is no danger that the Committee Investigation will report against the Government, since there is the usual ministerial majority upon it. The outside jury, however, will weigh the evi dence, and sequit or convict the Government upon the strength of it, no matter what the finding of the l'arliamentary Committee may prove to be.

While many in Canada, groaning under the borden of the taxation tariff, ar casting about for a commercial union with the United States as a means of deliverance from it, others are looking relief to the more rational and congenial method of establishing eloser relations between the colonies and the mother country. It is significant that the Agents General of Canada and Australia are arranging to meet for the purpose of devising some remedy for the difficulty. One of the objects of the conference is stated to be the arrangement of an intercolouisl tariff, designed to promote the interests of the entire Empire. The very first practical step in this direction would certainly have to be the rescinding of our protectionist tariff, which is in avowed hostility to the commercial policy of the empire

COVERNMENT HOUSE TO LET.

There seems to be an interregnum at Government House, Toronto. Ex-Lieut. Governor Macdonald continued in office till July 1, at the desire of the Government, but on that date he vacated the place and his successor has not actually sucreeded him. The appointment of Hon. J. B. Robinson has not even been gazetted, although it is now more than two weeks since the Mail publicly announced the selection of this gentleman for the position. Can it be that the Government is, after all, ashawed of his nomination, and hesitates to confirm it? If not the Government should act with more promptitude in the matter and give their nominee immediate orders to assume the duties of his station. Very moderate have been the eulogies which the new Lieuten ant-Governor's appointment has elicited from his warmest political admirers, while the Liberal press generally has

severely criticised it as being an unfortunate choice. It is proverpially a poor look-out for a man to be best known as somebody's husband; and yet this seems to be the case with the new Governor in connection with the official station he is being called upon to fill. According even to friendly notices of the appointment the fitness of the nominee's wife to fill the social station at Government House is specified as the principal advantage of selecting Mr. Robinson as Lieutenant Governor. It is, of course, a. far well that Mrs. Robinson should be equal to the occasion, but it is decidedly a left-handed compliment to himself thus to have his wife bepraised as the better man of the two. Whatever may be the new incumbent's shortcomings, hewever, it would be well for him to assume his position at once, so that the office should Why this unseemly delay in issuing not go as at present, untenanted, after it the write for West Toronto and North has been ostensibly filled by the appoints of renewed disturbances in Bulgaria, and

Technical Training.

To the Editor of the British Whig SIR,-It is of more than ordinary con sequence that we should have the mora supports of what is known as the "professional class," in any endeavour we may make to establish technical training in

our public schools. It is a most unfortunate circumstance, in connection with our social system, that so much prejudice should exist in the minds of a large number of the so-called educated classes against engaging in a purely mechanical occupation, as if education had no part in the training of those who engaged in such pursuits, but was confined to, and made available only business, the swish of the fan is heard in and theology.
