The unworthy attempt to steal a march so often. on the Government in the matter of the Speaker and the printing contract has been rebuked in the House by a vote of 111 to 72. The copy fair and proper course was then immediately taken by Mr. Casey, whose motion proposes to refer the whole matter to the Select Committee on Privileges and Elections for an impartial examination of the case in al its bearings. We shall take the liberty of returning to this subject in to-morrow's issue.

Notwithstanding the awkward way which the unemployed of Ottawa made their raid upon the Parliament Buildings last week, their demonstration of distress is bearing fruit and proving a success in its way. The Hon. Mr. Mackenzie handed to Mayor Waller the sum of \$50 to start a subscription list in their behalf, with a request to come again for more, if necessary. Then the Shaughran Company last night gave an entertainment the entire proceeds of which were to be applied to the same charitable object. A pleasing incident of this event, and one that must have lent it much additional interest, was the fact that the benefit was given under the joint patronage of the Hon, Alex. Mackenzie and Sir John A. Macdenald. It would, we facey, be very extreme partisan who would object to such a coalition.

The tyrannical and mechanical majorioutrage, this time by means of a decision obtained from the Speaker. By this most unfair and arbitary proceeding Sir John, Dr. Tupper et al have been prevented from consuming several days of precious parliamentary time, sweeping force the city to renew for 21 years. Ald. the whole horizon of political economy, Walkem pointed out the difficulties under and discussing the tariff question in all its varied bearings to prove that it is inexpedient for the Government to impose the enormous tax of two cents per pound on tea. From every point of view the stating that ten insurance companies had decision of the Speaker was a prudent replied to his requests for support in a and correct one in ruling that the ground system of fire investigation, and they which had been so well, or at least so were unanimous in declining to incur any much trodden in debate, should not be travelled over again. But very partial success has so far rewarded their keen look-out. It is with a considerable gush of satisfaction, though, that they have received Mr. President Cumberland's statement that the Railway paid Mr. Gordon Brown \$1000 for the patent right of a new nut-lock. Now we are not going to defend the transaction showing these totals: if the patent wasn't worth the money. If Mr. Brown thought was, there can be no suspicion of corrupt intent on his part. If there was any such intention, we hereby take the liberty of condemning it, but there is a doubt in the case of which we give him the benefit. There can be none, however, as to the motives of Mr. Cumberland and the Company. Thinking to make Council. a point against a Reformer, they brasenpurpose.
