CONCERNING ECHOES.

Effort to Find a Scientific Explana-

tion of Their Eccentricities. To the eccentricities of echoes there is no end. Some return faithfully to the sender of the original sound, but others are never heard by those who set them in I tinguish it from the original sound. The All penetrative power of the human voice is often affected in this way-much to the disgust of speakers-in churches and large buildings. Sometimes, again, one sound will produce several echoes, when it happens that there are several reflecting surfaces in the direction taken by the sound echoes when two sound reflecting surfaces face each other at the proper angle, The subject has been little studied, but is full of interest.

More attention has been paid to the behavior of water waves and light waves than to sound waves, yet the same characteristics are to be found in each form of wave motion.. What happens, for instance, when sound waves meet with obstacles is known to happen also to rays of light and may be seen to happen in the case of water waves. Thus, if an Atlantic roller were sweeping inshore, an isolated rock would form no protection. The big wave would simply swirl round the rock, enveloping it equally on was sides and passing on with very little decrease of force. A smaller wave, on the centrary, coming in with the roller, might e wholls checked and flung back by the rock, while a tiny wavelet could be stopped or reflected by a mere pebble.

So it is the same with regard to the phenomenon of sound, which is but another manifestation of wave motion. You may often notice when standing in a field skirted by a wood that a clap of the hands will awaken an echo, though you may shout ever so loudly without response. This is because a clump of trees cannot appreciably arrest the full, deep tones of the human voice or the barking of a dog, while at the same time the minute sound waves set in motion by a short, sharp clap are readily returned off every twig. The analogy might easily be carried farther.

Scotch Names. A gentleman inquired of a carter in

Maryhill the other day how far it was to Milngaire (pronouncing the name of the Stanley Allen, Chatham, are in the place exactly as it is spelled), relates The "There's no' a place of that name here-

abouts," replied the carter. "Oh, yes, it's out this way, but I would " 'Millingavee,' ye ca'd it?"

"Let me see, noo. There's Canniesburn, Bearsden, Stra'blanc, Mullguy. Na. I never heard of that place you

"How far is it to Mullguy?" asked the gentleman. "Mullguys jist oot aboot six mile, if that'll dae as weel," responded the carter.

The Mistakes of Our Friends. Venerable Dr. Thurston, who is much more at home in mazes of theology than in the amenities of social life, not long ago was introducing to a younger clergy-

man a handsome widow, a former parishioner of his own, no longer young and extremely sensitive to the fact. "My brother," said Dr. Thurston, leading the lady forward while his face beamed with genuine affection, "this is Miss Almeda Jennings, one of my old sheep.

Manifest Superiority.

"A poor excuse is better dan none, said the philosophic hobo. "I like it better dan a good one," remarked his companion. "It's more gentlemanly. It ain't so apt to work."-
