Aug. 15, 1880.

MONEY TO LEND.

\$20,000 to lend on Farm security. Mac-

donald & McDonald, Clarence Street, King-

ston.

STORIES ABOUT ANIMALS.

Illustrating Their Friendship as Well as

Enmity to Man.

A HEN'S QUEER CRAZE.

A hen belonging to a gentleman of Raleigh, N. C., had been missed for days. When she made her appearance it was with twelve little terrapins. A terrapin that laid the eggs, deserted them, and the fowl converted them to her own use and sat on them.

A HEN WITH A SWEET TOOTH.

A candy-eating horse is the property of Dr. Pratt, of Albany, N.Y. Every morning he bolts across the street, and from the woman keeping a stand gets a stick of candy, eats it, and awaits the arrival of his master, who pays the vendor.

MATERIAL CARE.

In a tree at Mayor Fordwood's dwelling, Chester, Pa., a sparrow hatched four pretty birds. The mother bird carried the little sparrows from the nest to the corner of a window sill, away from the severe weather, and then carried the nest down, put the little ones in it and rested safely from the storm all night. She and her young were well cared for.

A CAT'S SACRIFICE.

A Colchester, Conn., woman was awakened at 8 o'clock in the morning by her cat, which was crying lustily. She got up, turned the animal out, and soon saw the reason of her distress. Her son, who was in an adjoining room, opened the door to turn the cat out, when flames burst in upon him. His mother and her four children had barely time to jump out of the second story window in their night clothes and down the whole upper story of the large farm house was in flames.

ALMOST HUMAN.

A box containing two monkeys was brought to San Francisco from Petaluma, and the box was stored away until it was opened, it was found that one of the monkeys had died of starvation and thirst, and the other sat hanging by the tail.

The loss of the families, she has lost her mind, and does not know anything save that she suffers. Shortly afterward, she lost control of her limbs, and also complained of great pain in her head. Her parents, thinking it would be easier if her hair, which was very heavy, and of a beautiful golden color, was cut short, applied the scissars. Over three years have elapsed since that time, but neither her hair nor her finger nor her toe-nails have grown a particle.

Three years ago last month they discovered that she could not swallow solid food, and since then she has not had a mouthful of solid food. For a week she lay in bed, unable to move a muscle.

Driving over bridge faster than walk.

Drunk and Disorderly.

Allowing cows to run at large.

Allowing horses to run at large.

Allowing dogs to run at large.

Allowing cats to run at large.

Allowing birds to run at large.

Allowing insects to run at large.

Allowing fleas to run at large.

Allowing spiders to run at large.

Allowing centipedes to run at large.

Allowing millipedes to run at large.

Allowing ants to run at large.

Allowing beetles to run at large.

Allowing wasps to run at large.

Allowing bees to run at large.

LIVING DEATH.

Extremes Endured by a Young Lady.

One of the saddest and most extraordinary cases of disease ever chronicled, which for four years has baffled the best efforts of skill of the medical profession, has just come to light, the victim being a young lady named Lizzie Duff, of Glenfield, Pa., who is placed in the position of a living corpse. There, lying on the bed, with her face, which would have been exquisitely beautiful had it not been for its marble whiteness, was the young lady. For three years she has been wholly without a mind, and, in addition to this affliction, is totally blind and has lost all the power of her body. Her face was quite full, and apparently debilitated, but her arms were terribly emaciated, were nothing but skin and bone in fact. Her body would have been exquisitely beautiful had it not been for its marble whiteness, was the young lady. For three years she has been wholly without a mind, and, in addition to this affliction, is totally blind and has lost all the power of her body. Her face was quite full, and apparently debilitated, but her arms were terribly emaciated, were nothing but skin and bone in fact. Her body would have been exquisitely beautiful had it not been for its marble whiteness, was the young lady.
