We are told in the despatches from Philadelphia that the Pan-Presbyterian Council re-convened under the presdency of Dr. Crime. We submit that this is a most inappropriate and unfor tunate name for any divine, much less for one called to preside over such an angust body of christian men as compose the Universal Convention of Presbyter ian pastors. We recommend Dr. Crime to apply to the alliance over which he presides for a dispensation to change his name. It certainly does not look well to see Crime enthroned in the highest seat of a Christian Counc'l, 1

Neither has the public any apparent reprehension for that species of immorality of which Sara has a four-fold right to be considered the embodiment. We cannot understand an intimation of this sort appearing as if does in the columns of the leading N. P. organ of the adjoining Province. Nearly two years ago the new protective tariff, which was certainly understood to be a measure for the virtual abolition of bankruptcies, and for the establishment of universal pros perity-was adopted by the Dominion Parliament, of whose majority the proprietor of the Gazette is a member. And yet now at the distance of two long years the industrial of lists of sheriffs' sales "from time to time" is among the promises of a leading Tory journal in regard to the realizations of the future. Is it for this that the people have been weighted down with an intolerable burden of tariff taxation? Actual experience of the operation of the national policy only confirms the fact that the Tory proit were of the pie-crust order, and that they were only intended to help the men who dishonestly uttered them, tothe power and pelf from which the people had ejected them for political sins which in any other country would have been regarded as mortal and unpardon-
