BAD PRINT

ST AND LOAN COMPANY OF UPPER CANADA.

MEETING IN LONDON, ENGLAND.

The ordinary general meeting of the proprietors of this Company was held at their offices, 69 Moorgate-street, London, on Wednesday, the 31st ult., the Right Hon. R. Bouverie in the chair.

The Secretary read the report and statement of accounts for the six months ending the 31st of March of the current year. It was seen from these accounts that the net profit during that period amounted to £12 051 14s. 7d., which, added to the sum brought forward from September last, gave a balance at credit of revenue of £12 955 11s 2d. It was recommended that out of this balance a dividend at the rate of 7½ per cent. per annum, less income tax, be declared on the paid-up capital stock of the Company. This payment, after adhering to the reserve fund in accordance with the Royal charter, the sum of £3 542 16s 4d. and the round sum of £50 to the reduction of preliminary expenses, would leave a sum of £118 11s. 7d., to be carried to the credit of the next half year's accounts. The amount of the reserved fund would then be £20,721 13s

The directors had much satisfaction in referring to the general result of the company's operations during the period embraced in this statement. Although the occurrence of a deficient harvest last year had weighed heavily on the agricultural interests in Canada, and retarded that gradual progress which might otherwise have been anticipated, yet not only had the earnings of the Company steadily increased, but the amount of interest falling due during the last six months, although considerably in excess of that falling due at any former period since the formation of the Company, had been collected in the most satisfactory manner.

The Chairman referred to the retirement of Mr. Weynelin from the office of chairman since the last meeting. Considering that gentleman's experience in the Company, and his great knowledge of general business, he was afraid his own substitution would not be a beneficial one for the Company. At the same time he would say that as far as devotion to the interests of the Company were concerned, he believed that as long as he was retained as chairman the proprietors would have nothing to complain of. The meeting, he thought, would agree with him that the report to which his name was attached was of a satisfactory character. The business of the Company was steadily increasing. There was one anomaly in the affairs of this Company, often met with—that the larger their business within the statutory limit, the more prosperous they were; that is, that the more money there was lent to them for the purpose of investment, the larger really were the profits of the shareholders. These profits were the difference of the amount they received from their investments in Canada, and what they paid to those who lent them money to invest. The debts, at the same time, were secured by the properties upon which the money was lent, and they were also guaranteed by the highly responsible character of the shareholders. It was plain, therefore, that to increase the debt of the Company was really to increase its prosperity, as this depended upon the amount of money which the public generally were willing entrust to them upon the assurance they had to offer. It was gratifying to find, on a review of the last twelve months, that the public were becoming more alive to the advantages they had to offer, and were more willing to advance money to them. There had been a considerable increase in the amount realized, for which they had given debentures. He, for his part, viewed the state of things they might fairly look forward to a continued increase in the dividends, instead of a decrease, as was the case with some companies. Reference was made in the report to the disease on potatoes which had existed in Canada during the past year. He spoke from personal knowledge when he said that Canada was essentially an agricultural country. Any attempt by the population or the Government to make it a manufacturing one must, he felt convinced, prove a failure. (Hear, hear.) For many years to come it would be a grain producing agricultural country, and, as a consequence, a succession of bad seasons such as had been experienced would result in a great depression in the value of property. He would fain hope, however, that the present state of things in Canada was not likely to continue. There was a reasonable prospect of a good harvest, this year at any rate, and they might expect if this was realized, to share equally in the return of commercial prosperity, and improve upon their already highly satisfactory position. He would conclude by moving the adoption of the report.

Mr. Hindmarsh seconded the motion, which was carried unanimously.

The retiring directors, Charles Morrison, Esq., and W. G. Thomson, Esq., and the retiring auditors, Messrs. Laward and Anderson, were then unanimously re-elected.

A vote of thanks to the chairman terminated the proceedings.

Incidents of the War.

Five gun boats, so constructed that they can be taken to pieces, have been shipped at Toulon for the Adriatic; and a battery of rifled artillery from Marseilles for Genoa.

Up to the 25th of May, 93,000 men and 5000 horses had landed at Genoa from Marseilles, Toulon and Algiers.

The Emperor Napoleon has ordered that all the wounded prisoners shall be restored to the enemy as soon as their condition admits of their removal.

The Dresden Journal of May 31 professes to be authentically informed that the negotiations between Austria and Prussia for the purpose of arriving at an understanding in the interest of Germany have during the last few days made satisfactory progress.

The Vienna correspondent of the London Times, who is in the interest of the Austrians, writing on the 26th of May, says:

Garibaldi with 8000 men, has entrenched himself at Varese, where he is closely watched by 2000 Austrian troops. Twelve battalions are advancing against him, and, if he is not very adroit, his retreat will be cut off. The tete of Count Clam's corps (the 1st) is probably now crossing the Brenner on its way to Botzen and Verona. A very cordial reception was given to the Austrian troops as they passed through Saxony and Bavaria. The 11th corps, under Lieutenant-General Baron Czorich, is leaving this city, via Nabresina and Casarea, for Italy. The splendid infantry regiment 'Hanover,' which formerly bore the name of Wellington, belongs to the 11th corps. As a consequence of its heroic conduct at Deutsch-Wagram, in 1809, it has the privilege of beating the Grenadiers' March.

Troops have been sent in all haste from Pesth to the Servian frontier, as it is believed that a storm is brewing at Belgrade. The Modenese government has retreated from Reggio to Brescello, on the Po, and the Piedmontese commissary had declared that Massa is incorporated with Sardinia.

LETTER FROM MUNICH.

The following is an extract from a private letter from Munich, dated the 27th of May:

Munich is now transformed into a vast camp; one sees nothing but soldiers, and troops are constantly dinning in one's ears. This small kingdom has called together an army of 100000 men, and youths of good family and education are daily joining the ranks as volunteers. 200 young men from the University have enlisted, and those who are called on by the conscription never think of getting substitutes, but go themselves.

The town has been enlivened the whole of this week by the passage of Austrian troops from Hungary on their way to Italy. About 20,000 have already passed on, and as many more are expected. Munich is behaving most generously to those allies who are on their way to fight the common enemy. Every soldier who arrives is treated to a good warm dinner, plenty of beer, lots of cigars and other little luxuries. At the expense of the town, a sort of camp has been fitted up at the railway station where the troops arrive, and the whole population is there from morning till night, receiving the different regiments with open arms, and treating them to a great deal more beer than the poor fellows can stand. At the same time the wealthy, burly Munichers, do not fail to set their Hungarian brothers a most laudable example. It is really a sight altogether, and amuses us vastly.

Imagine an immense crowd of ladies, gentlemen, officers, soldiers, working-men, children, &c., gathered upon an awfully dusty plain, and all drinking beer, except when a train comes in, when all begin to shout till they are hoarse, and then drink beer again, fraternizing most enthusiastically with the Hungarians! I was on the spot yesterday evening, and a regiment of Hungarians had just departed. They were not well out of sight when the municipality, the officers, the ladies and gentlemen, the soldiers, the policemen, the people and the children all sat down quietly and good humouredly, and directed their attention to their beer jugs once more with as much ardor as if they were only beginning. I suppose you will not expect me to say that they all were as sober as if they had been fresh and fasting, or as perhaps they ought to be; but there was no disorderly conduct.

THE BREAK ON THE WELLAND CANAL.—A serious break occurred on Thursday night on the Welland Canal. The schooner Quebec, of Kingston, ran against and carried away the gates of lock No. 25, just above Thorold. The rush from the higher to the lower level was so violent as to make a breach in the embankment, and the peaceful waters of the canal at once became a destructive torrent. They rushed into a part of the town, injured the machinery of a mill mear, left an inch of mud on the carpets of at least one house, then submerged the neighbouring country to the depth of several feet, and damaged the grain considerably. A large force of men has been set to work to repair the damage, but it will take at least a week to do so. It is estimated that property has been injured to the amount of $50,000.

THE ONLY ARTICLE UNRIVALLED IN MARKET,

WITH IMMENSE HOME AND EUROPEAN DEMAND.

The reason why, is that by Nature's own process it restores the natural color permanently after the hair becomes gray; supplies the natural fluids, and thus makes it grow on bald heads, removes all dandruff, itching, and heat from the scalp, quiets and tones up the nerves, and thus cures all nervous headache, and may be relied upon to cure all diseases of the scalp and hair; it will stop and keep it from falling off; makes it soft, glossy, healthy and beautiful, and if used by the young two or three times a week, it will never fail or become gray; then reader, read the following, and judge for yourselves:

New York, Jan. 8, 1858.

Messrs. O. J. Wood & Co.:—Gentlemen: Having heard a good deal about Professor Wood's Hair Restorative, and my hair being quite gray, I made up my mind to lay aside the prejudices which I, in common with a great many persons, had against all manner of patent medicines, and a short time ago, I commenced using your article, to test it for myself.

The result has been so very satisfactory that I am very glad I did so, and in justice to you, as well as for the encouragement of others who may be as gray as I was, but who having my prejudices without my reasons for setting it aside, are unwilling to give your Restorative a trial till they have further proof, and the best proof being ocular demonstration, I write you this letter, which you may show to any such, and also direct them to me for further proof, who am in and out of the N. Y. Wire Railing Establishment every day.

My hair is now its natural color and much improved in appearance every way, being glossier and thicker and much more healthy looking. I am, yours respectfully,

HENRY JENKINS,

Cor. Columbia & Carroll sts., Brooklyn.

Livingston, Ala., Feb. 14, 1858.

Prof. Wood—Dear Sir: Your Hair Restorative has done much good in this part of the country. My hair has been slightly diminishing for several years, caused, I suppose, from a slight burn when I was quite an infant. I have been using your Hair Restorative for six weeks and I find that I have a fine head of hair now growing, after having used all other remedies known, to no effect. I think it the most valuable remedy now extant, and advise all who are afflicted that way to use your remedy. You can publish this if you think proper.

Yours, &c., S. W. MIDDLETON.

Philadelphia, Sept. 9, 1857.

Prof. Wood—Dear Sir: Your Hair Restorative is proving itself beneficial to me. The front, and also the back part of my head almost lost its covering—was in fact bald. I have used but two half-pint bottles of your Restorative, and now the top of my head is well studded with a promising crop of young hair, and the front is also receiving its benefit. I have tried other preparations without any benefit whatever. I think from my own personal recommendation, I can induce many others to try it.

Yours, respectfully,

D. R. THOMAS, M. D.,

No. 464 Vine Street.

The Restorative is put up in bottles of 3 sizes, viz: large, medium and small; the small holds half a pint, and retails for one dollar per bottle; the medium holds at least twenty per cent more in proportion than the small, retails for two dollars a bottle; the large holds a quart, 50 per cent more in proportion, and retails for $3 a bottle.

O. J. WOOD & CO, Proprietors, 312 Broadway, New York, (in the great N. Y. Wire Railing Establishment,) and 114 Market St., St. Louis, Mo.

And sold by all good Druggists and Fancy Goods Dealers. 3m-d&w-180

DEAFNESS & SINGING NOISES IN THE EARS, NERVOUS HEAD & MIND COMPLAINTS. AN ENGLISH CERTAIN AND SPEEDY REMEDY.

The Institution for the cure of Deafness, Head and Mind Complaints, 32, Spring Gardens, Charing Cross, London England. Consulting Surgeon, CHARLES HENRY COGHLE SLEIGH, Esq. Registered Pursuant to Act of Parliament. Secretary, JOHN POWELL, Esq. A new Discovery, being a positive method of self-cure, affording instant and magical relief to sufferers who may have been deaf for 40 or 50 years, by means of a compound medicated vapour applied to the external Ear. When the vapour is passing out, it is held by the sufferer for one minute to the ear affected, and instantly the Patient, who previously was deaf, is enabled to hear common toned conversation. A few nights use in a singular way will guarantee to cure the most inveterate case of Deafness and Noises in the Head. It is a step to Empiricism and exhorbitant fees. Sufferers extremely deaf, by means of this can permanently cure themselves in any distant part of the world, without pain. Thousands have been restored to perfect hearing, and for ever rescued from the snares of the numerous dangerous unqualified pretenders of the present day. Hospital and private testimonials and certificates from the most eminent Physicians and Surgeons in England to whose presence deaf persons have been cured, and many hundreds of private patients cured, can be seen or referred to. Any sufferer on the Continent, or resident in any of the Four Quarters of the Globe, can now be cured, as this discovery can be sent to them with necessary Prescriptions, Preparations, &c. that will enable them positively to cure themselves. Before he is the sent of the means of cure, a case must be sent to the Secretary John Powell, Esq. 32, Spring Gardens, Charing Cross, London, England; it can be sent either by Banker's Draft payable in England, or Notes of the Clearing, sufficient to cure 9 cases of Deafness & Noises in the Head £10 10s. ly-d&w

NURSERIES.

WE have now ready for sale a large Quantity of Apple trees in excellent condition, comprising all the kinds which have proved hardy and suitable for this Northern Climate.

Also, a large assortment of the Newest and Best Varieties now cultivated, of Pears, Cherries, Plums, Grapes, (hardy and exotic) Gooseberries, Currants, Raspberries, Blackberries, Strawberries, &c., all of which we will sell at prices as low as they can be got in America. Address

D. NICOL & CO.,

Lyn, near Brockville, C. W.

March 12th. 4w-8-w.

NOTICE

IS hereby given to Customers and others, who wish to be supplied with Summer Ale from this Brewery, that their Orders are required to be upon the Order Book of this Office, on or before Saturday the 7th day of May, in order that the Ale may be delivered as early as circumstances will allow.

The Summer Ale shall not be considered as being sold until it is paid for or delivered. All the Ale that may remain unsold on May 7th, shall be sold to the first applicant, for Cash. On and after Saturday the 30th Current, all Credit shall cease at this Brewery.

FARMERS, READ THIS.

'The Farmer's Own Paper.'

THE GENESEE FARMER,

A Monthly Journal of Agriculture and Horticulture, (Established in 1831.)

PUBLISHED for Twenty-Eight Years it is one of the finest wheat and fruit sections of America, it has attained an unrivalled circulation, and has able and experienced correspondents in every State of the Union and in the British Provinces.

Each volume contains Three Hundred & Eighty-four Pages, and is profusely illustrated with expensive wood cuts. It is sent to any address for FIFTY CENTS A YEAR!

In order to introduce the Farmer into districts where it has few readers, we will take subscriptions to the coming half volume (July to December inclusive) at the following rates. Single subscribers, 25 cents; five copies for $1, and a copy of our beautiful 25-cent book the Rural Annual and Horticultural Directory, prepaid by mail, to the person getting up the club; eight copies for $1.50, and a Rural Annual, prepaid by mail, to the person getting up the club; sixteen copies for $3, and a Rural Annual and an extra copy of the Farmer for a year, or two for the half volume, to the person getting up the club.

We also offer a liberal list of CASH PREMIUMS as a still greater inducement to form clubs. Full particulars will be found in the paper, and every one interested in the culture of the soil is invited to send for a copy, and, if pleased with the paper, to act as agent. Specimen copies sent free to all applicants. Address

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S,

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this taint in every where prevailing and fatal malady. It is compounded from the most active remedials that have been discovered for the expurgation of this foul disease, from the blood, and the cure of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Erysipelas and Skin Diseases, St. Anthony's Fire, Rose or Erysipelas, Pustules, Pimples, Blotches and Boils, Tumors, Tetter and Salt Rheum, Scald Head, Ringworm, Ringworm, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Dizziness, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "cleansing of the blood" is founded in truth, for scrofula is a degeneration of the blood, to particular purposes and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC.

Are so composed that disease within the range of their action can easily succumb to their influence. Their penetrating properties search, and cleanse, and invigorate every portion of the human system, correcting its diseased action, and restoring its healthy vitality. As a consequence of these properties, the invalid who is taking them will find his health or vicarity restored by a remedy at once so simple and certain.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: Costiveness, Heartburn, Biliousness, Dropsy, Dyspepsia, Stomach, Nausea, Indigestion, Foul Stomach, Bad Breath, Loss of Appetite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

MORE MEDICAL JUGGLING.

GREAT EXCITEMENT AT THE ACADEMY OF MEDICINE!

FALSE THEORIES EXPOSED.

MEDICAL INCOMPETENCY PROVED.

The Cause of Whitney's Death Shrouded in Mystery.

THE TRUE SCIENCE REVEALED.

CONDITION AND FEELING OF MR. WHITNEY BETWEEN HIS LAST TREATMENT BY DR. GREEN AND HIS DEATH.

"December 14, 1858—About one in the afternoon, I was called to see Samuel S. Whitney; I found him surrounded by several members of his family, in a state of the most intense excitement, suffering, and terror; in answer to my inquiries as to what had happened, he answered: 'Sit down, Beales, and I will tell you the truth; I was such a fool as to go to Dr. Green to operated upon, and the d—d villain has killed me!'"

See Dr. Beales' statement, before the Academy of Medicine in the city of New York, as published in the N. Y. Herald, Jan. 20, 1859.

The unfortunate death of Mr. Whitney is another evidence of the uncertainty and unreliability of the treatment, for the cure of the sick as practiced by the Medical Faculty. The death of this eminent and well-known citizen created an excitement of such magnitude, as to induce the Academy of Medicine to demand an investigation of the treatment the deceased had been under, and of the immediate cause of his death. Yet, after a thorough and searching post-mortem examination, by the most able skilled, and eminent Physicians of the Regular Practice—the Members of the Academy were unable to decide as to the immediate cause of death; and, in their report to the Congress of wise Physicians there assembled, admitted their incompetency of solving this difficult problem. The sad case presented to us, in the painful death of Mr. Whitney, is by no means an uncommon occurrence. Thousands of human beings, who trust their lives in the hands of physicians, whose treatment and practice is based upon the theories followed by the Medical Faculty, are suddenly hurried off to that undiscovered country, from whose bourne no traveller returns. From the testimony produced, before the Academy of Medicine we are not prepared to assert that the immediate cause of Mr. Whitney's death was produced by the application of the nitrate of silver, through the tube, or by the probang, but we do most emphatically assert that the death of the lamented Whitney was hastened by this treatment. We have always opposed this method of treatment; and, in our papers and Annual Almanac, warned the public against it.

See our Almanac, for 1857—page 4.

THE GREEN SYSTEM.

There is another system of practice becoming quite popular in the treatment of Consumption, namely that of the Green, or Burning method, which consists of syringing down the throat a solution of nitrate of silver for the purpose of burning the concretions that may be there formed.

We look upon this practice as dangerous as that of the inhaling; for, instead of healing the lungs, in removing concretions or ulcercies, irritates, and produces sores, ulcers, &c. It is a blind, unsafe, and dangerous method of treatment, and will kill more than it will cure.

It is not our design, in this article, to discuss the correctness of medication in the case of Mr. Whitney, under the treatment of Drs. Mott and Beales in the various symptoms exhibited from the 14th December to the time of his decease; but we do most religiously and sacredly believe, taking Dr. Beales' statement—who it appears, from the evidence given before the Academy of Medicine, knew more of the physical and constitutional condition of Mr. Whitney's system than any one else—that Radway's Ready Relief, Regulating Pills, and Renovating Resolvent would have saved his life.

STATEMENT OF DR. BEALES.

'Dr. Beales said: During the number of years that I have attended Mr. Whitney's family, I have not known Mr. Samuel Whitney to be seriously ill, so as to be confined to his bed; but he has for a long time been subject to various derangements of the digestive organs, such as want of appetite, torpidity of the bowles, deficiency of the bilious secretions, and occasionally a bronchial cough.

'There are thousands and tens of thousands, throughout the United States, who have been similarly afflicted, and relieved from their difficulties by the use of Radway's Ready Relief, Regulating Pills and Resolvent. In fact, every day we are visited by patients, complaining of the same ailments, who become speedily relieved from their difficulties by the medication of these remedies.

'Let us again refer to the statement of Dr. Beales, and endorsed by Dr. Mott, of the treatment in this case, from 1 p. m. of the 14th December. The case, as presented, is fully stated in the Herald of the 20th of January; and we find in this report, the patient, with numerous other symptoms, suffered severely from irritation and severe pain in the throat: his breathing was occasionally irregular, and almost spasmodic; coughing almost incessantly; speaking with great difficulty and pain, in a hoarse and unnatural tone of voice. Dr. Beales gave the patient medicine, for the purpose of producing a reaction; but the remedies given, it seems, utterly failed. Had he given, on the instant, Radway's Ready Relief, he would have secured the desired result.

Six hours later, the Doctor found his patient suffering severe pain, described to be in the larnyx down the course of the trachea to the chest, and round to the cervical vertebræ. Notwithstanding the great excitement, nervousness and terror, with pulse at 112, the Doctor administered a preparation of Antimony and Morphine, for the purpose evidently of soothing the pain, exciting the skin to a more natural action, and allaying the nervous excitability of the patient. Had he applied RADWAY'S READY RELIEF, he would have succeeded; his remedies, however, had the opposite effect. Eight hours after this medication, he applied to the throat of the patient an 'Anodyne liniment.' If Radway's Ready Relief was obnoxious to the Doctor, he should have applied the Anodyne liniment 24 hours earlier.

Dr. Beales states that he has for a long time been subjected to a derangement of the digestive organs, and torpidity of the bowels, which in other words simply a disordered condition of the Liver, and during this critical condition of the patient he had not a discharge from the bowls 'in three days.' As a remedial agent, an injection was given which failed; after which a tablespoonful of Castor Oil—this operation some hours afterwards, leaving the patient excessively exhausted.' Had Radway's Regulating Pills been given 12 hours after the previous operation of the bowels, the effect would have been different—the derangement of the liver would have been corrected, and a natural discharge from the bowels the result, without causing weakness, or in any manner exhausting the patient.

The sad and distressing case of Mr. Whitney, will, we hope and trust, serve as a warning to the public against trusting their lives in the hands of a clique who are licensed to lull the sick in the unconscious sleep of death on scientific principles. As we before stated, we are not prepared to assert that the cause of Mr. Whitney's death was directly owing to the treatment of the Green system; and, we furthermore believe, had Dr. Beales employed Radway's Ready Relief, Regulating Pills, and Resolvent in his treatment of the case, the life of Mr. Whitney would have been prolonged. As we have before stated, the case of Mr. Whitney is by no means an exception to the general rule that follows the medication as prescribed by the regular or official standard of medical law. Had the deceased been an obscure individual, his case would never have been brought to light. Thousands and thousands have been killed off through the ignorance of their physicians.

Let us again go back to the testimony of Dr. Mott, as regards the usual practice of physicians in making out their certificates of the cause of death to the City Inspector. If the doctor speaks truth, the greater part of medical certificates are medical falsehoods; and the perpetrators of these falsehoods deserve to be imprisoned like other criminals undergoing sentences for false pretences.

A warm debate then ensued during which Dr. Mott was pressed to state the cause of Mr. Whitney's death. In reply thereto, he stated that it was well known that the profession was at a loss to define the cause of death from the symptoms presented. Doctors were often puzzled now-a-days to fill the necessary certificates for the City Inspector. The ready manner in which Dr. Mott described these symptoms created a little merriment.—See remarks of Dr. Mott's defence, Academy of Medicine, Jan. 20, 1859.

Some few weeks since, we invited the Medical fraternity to a trial of skill in the curative art, against our Radway's Ready Relief, Regulating and Resolvent, guaranteeing to pay the sum of $25,000 to the Mount Vernon Fund, if we were not more successful in the treatment and cure of disease, than all the remedies and medicines employed by the medical faculty. We now show the exposure of the professors, and we must add, trickery and deceptive practices of the medical fraternity, with in addition to the sum of $25,000 to the Mount Vernon Fund, pay the same amount toward building a Magdalene Hospital, if we do not, in a fair and just trial of skill with the Medical Faculty, in the city of New York, cure more cases to one, and in less than half the time occupied by any member of the Academy of Medicine.

A NEW CONTRIBUTION TO SCIENCE.

THE GREAT GRAND DISCOVERY.

R. R. R.

(No. 2.)

RADWAY'S REGULATING PILLS.

Dr. Radway & Co. have recently discovered a method for extracting from roots, herbs, plants and gums, a nutritious extract of such wonderful nourishing power—which they have combined with RADWAY'S REGULATING PILLS—that six of these Pills will supply the blood with the same amount of nutrition as one ounce of ordinary bread; so that, while the system is undergoing a thorough physicking and regulating process, it daily becomes strengthened.

Persons afflicted with Liver Complaint, Dyspepsia, Heart Diseases, Fullness of Blood, and all Females who are subject to Irregularities, Hysteria, &c., are particularly recommended to use these Pills. They are pleasant to take—elegantly coated with gum—free from taste, and will not gripe, sicken or weaken the system, or leave the bowels costive. Mothers nursing should likewise take one or two of these Pills once or twice per week. They will not only keep your system healthy and regular, but will protect your infants against Cramp and Pains in the stomach, and insure not only a healthy child, but will invest every child, thus suckled, with a sweet disposition.

RADWAY'S REGULATING PILLS

Regulate each and every organ of the system, and correct all derangements of the Liver, Bowels, Stomach, Heart and Kidneys.

THEY CURE

Costiveness,	Indigestion,
Heart-Burn,	Dyspepsia,
Biliousness,	Constipation,
Dropsy,	Headache,
Palpitation of the Heart,	Congestion, &c., &c., &c.

They are entirely vegetable and harmless; an infant at the breast can take them with safety, and persons who are subject to Fits of Apoplexy, Epileptic, Heart Diseases, &c., should always keep a box on hand.

Price 25 Cents.

Ask for Radway's Regulators, or Regulating Pills.

Belleville, March, 1859. 1m-w-53

DR. M'LANE'S CELEBRATED VERMIFUGE AND LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS. Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros. will do well to write their orders distinctly, and take care that *Dr. M'Lane's*, prepared by *Fleming Bros., Pittsburgh, Pa.* In those articles we give a trial, we will expend per cent, and pay the freight part of the United States, one box of Pills or Vermifuge, to any person who will write us, post paid, that they have purchased the above articles from any dealer, and have not found them as represented. All orders from Canada must be accompanied by Post Office order.

NORTHROP & MOSES,

Newcastle, C. W.

Wholesale Agent.

UNION HOTEL, SYDENHAM

THE SUBSCRIBER begs to announce that he has lately opened the above Hotel in Sydenham, Township of Loughboro'. He has constantly on hand the best of Wines, Liquors, &c. To the travelling public he offers accommodation of the First Class, and being provided with ample Stabling and other advantages, he can accommodate all persons who may favor him with a call. The Hotel is delightfully situated at a short distance from Sydenham Lake, and possesses a beautiful prospect of the lake and adjacent scenery.

Hostlers will be constantly on hand to attend to his customers, and the comfort of guests will always be studied.

H. McCARTY.

Sydenham, Dec. 1858. 1md-5mw-25

Another portion contains the signature of the Proprietors in red ink,

"A. ROWLAND & SONS."

ROWLANDS' KALYDOR,

AN ORIENTAL BOTANICAL PREPARATION

FOR

Improving and Beautifying the Complexion.

It eradicates all Redness, Tan, Pimples, Spots, Freckles, Discolorations, and other cutaneous visitations. The radiant bloom it imparts to the Cheek, and the softness and delicacy which it induces of the Hands and Arms, render it indispensible to every toilet. It obviates all the effects of Climate on the Skin, whether with reference to cold and inclemency, or intense solar heat, and affords immediate relief in cases of sunburn, stings of insects, or incidental inflammation. Price 4s. 6d. and 8s 6d. per bottle.

SOUND AND WHITE TEETH

Are not only indispensibly requisite to a pleasing exterior in both sexes, but they are peculiarly appreciated through life as a blessing highly conducive to health and longevity by the proper mastication of food.

ROWLANDS' ODONTO,

OR PEARL DENTIFRICE,

Compounded of Oriental ingredients, imported at great expense, this Powder is of inestimable value in preserving and beautifying the Teeth, imparting to them a pearl-like whiteness, strengthening the gums, and in rendering the breath sweet and pure.

CAUTION.—The words "Rowlands' Odonto" are on the Label, and "A. Rowland & Sons, 20, Hatton arden," engraved on the Government Stamp affixed on each Box.

Sold by Chemists and Perfumers.

Beware of Spurious Imitations!!

July, 1856. 14y

Modern Style of School Furniture.

MANUFACTURED and for sale by N. JOHNSON, No 400 Hudson street New York. A large supply kept constantly on hand. Illustrative circulars forwarded on application as above. 3m-w-47

LEA and PERRINS'

CELEBRATED

WORCESTERSHIRE SAUCE.

PRONOUNCED BY

CONNOISSEURS

to be the only

Good Sauce,

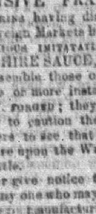
and applicable to

EVERY VARIETY

OF DISH

EXTRACT OF A LETTER from a MEDICAL GENTLEMAN at Madras, to his Brother at WORCESTER, May, 1851.

"Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome sauce that is made."



EXTENSIVE FRAUDS.

LEA and PERRINS having discovered that several of the Foreign Markets have been supplied with spurious IMITATIONS of their "WORCESTERSHIRE SAUCE," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the names of L. & P. ROSED; they have deemed it their duty to caution the public, and request purchasers to see that the names of LEA & PERRINS are upon the Wrapper, Label, Stopper, and Bottle.

L. & P. further give notice that they will proceed against any one who may infringe upon their right, either in manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation, by the Proprietors, Lea & Perrins, Worcester, Crosse & Blackwell, and other Oilmen and Merchants, London.

A. N. COLE,

Has Extension Bits capable of boring any sized hole from three-quarters of an inch to two inches and a-half. Mechanics and others desirous of obtaining Levels and Bits can do so by application to him at his factory, Main Street, opposite the New Town Hall, or by letter, post-paid, to his address.

ANDREW N. COLE,

Manufacturer and Dealer in Levels and Extension Bits, Main St.

REFERENCES.—Messrs. Benjamin Chaffy, Wm. Fitzsimmons, Builder, James F. Dowing, James M. Barr, George Reed, H. R. Black, McMullen & Fletcher, John Stacey, Architect & Builder, all of Brockville; and to Mr. John Power, Kingston.

Brockville, Jan., 1859. 29-1in.d. 6m-w

NEWLY INVENTED,

PLUMB AND LEVEL.

A. N. COLE has lately invented and obtained Letters Patent for an Instrument, named

COLE'S GRAVITATING PLUMB AND LEVEL,

which is far superior to Spirit and all other Levels. The advantages the Inventor claims over all other Levels are these, viz:

1st. It can be settled sooner than all other instruments for plumbing and leveling.

2nd. It indicates where any piece or part is out of plumb or out of level, and how much.

3rd: It gives correct angles and grades both vertical and horizontal.

4th. An Architect or Mechanic in laying out work, finds the number of feet and inches to the angle, according to the number of feet on the base.

5th. In laying out work it gives mitres and bevels at different angles.

CANCERS CAN BE CURED!

W. FORWARD, M. D.,

WILL be at the ANGLO-AMERICAN Hotel, Kingston, every Monday and Tuesday; and Napanee, Shaw's H
