"Madam, would you please answer a "W-what is it?" she stammered. "Why did you avoid passing the door

of the druggist?" "Am I compelled to answer?"

"Well, no, but"-

"Then I would rather not," and she hurried on her way. The officer was perplexed. He had been standing there 15 minutes, and in that time three women had evaded passing the open doorway of the drug store. Presently a shopgirl was added to the trio. She glanced in and then made a circuit of the curb. There was an expression of relief on her face when she had passed. The puzzled bluecoat decided to investigate. He walked over and stared in the doorway. The only person in sight was a soda water clerk. Then the officer retraced his steps. A few moments later an old colored woman hobbled slowly along until she was directly opposite the druggist's. Something prompted her to suddenly change her route. The policeman met her as she crossed.

"Hold on, aunty!" She appeared too frightened to run.

" 'Deed, sah, Ah"-"Oh, I didn't say you did. I just want to ask you a question." "W-what, sah?"

"Why did you suddenly turn back when you were passing that door?" "Dah am a brac cat in de doah, sah, "Well, what of it if he did run out?"

Goldsmith's Heroines. It was the age of moral sentiments, and to have them at hand was the sovereignest thing against temptation from without and within. Heroines used to express them whenever the least danger threatened and sometimes when they were in perfect safety. Under instructions of the good Samuel Richardson they sought the welfare of themselves, their lovers and their correspondents in formularies prescribing the virtues for every exigency and praising right conduct with a constancy which ought to have availed rather more promptly than it did. But neither of the girls in "The Vicar of Wakefield" is very profuse of them, and this marks either a laspsing faith in their

efficacy or a rising art in the novelist. Goldsmith, at any rate, confines the precepts and reflections to the father of his heroines, as he might fitly do in the case of the supposed narrator. Richardson, or, rather, the epistolary form of his nevels, obliges his heroines to make them. Yet be was a great master and in spite of his preaching a great artist.
