The Loss by the Reguction-4 mounts to

\$700 a Year-this way of Charging

HE WAY MR DALY FIGURES IT

Officials' Salaries-A Question for aid. Kingston, Aug. 2 .- (To the Editor): I see by last night's report of the meeting of the city property committee that those whosattended are not willing to let the markets for the amount tendered. Now, Sir, who is responsible for the lowering. of the value of the markets? 1897 the city council-passed by-laws reducing tolls and weighing charges in the following manner: Single waggons they reduced from seven cents to five cents. Now what did that mean? Simply this—a loss on Tuesday of \$1.50, on Thursday the same, and \$3 on Saturday, making in all eight dollars per week. Now,

in the island market the loss on baskets on Tuesday at one cent per basket is seventy-five cents, the same on Thursday, and \$2 on Saturday. making for the week \$3.50. Then in the weigh house, the reduction amounted to about \$2 per week. Now the total loss each week is \$13.50, or by the year the city council reduced the value of market No. about \$700. Now let us make a comparison.

Phe last year the city collected the tolls they had the services of two police officers, clerk of market, scavenger and weigh man, five in all doing the work. Will any sane man say all those men worked for nothing, and that we have no right to charge anything to the market for their services. That would be queer reasoning. The police receive about \$500, we officers \$1,000; clerk of market \$500, scavenger \$315, weighman \$75, making in all \$1,890. Now in what the market is worth we will salary to the market, say \$900, What did they collect the last year for the city? Here it is: \$1,690, and nine hundred deducted from that leaves \$790 net for the city. Now 1 want to ask chairman White which is best for the city-my \$1,200 tender, or 8790 as collected by the city.

Prempeh, it seems, is at Congo Fown, just outside Freetown, occuoving a farm next to that of Bai the rebel chief. When Mr. Snelson had an interview with him he had about fifty people in his house, including many chiefs and the notorious "Queen Mother."

On being questioned through an interpreter, the deposed monarch said getting back to Ashanti to reign as king, but he fully expects to be taken to Kumasi when he dies, to be buried in the land of his ancestors. Prempeh seems to have a very plentiful supply of money, brought; it is from Ashanti by his former Bookbindery, subjects, who travel many hundreds to 20c. per dozen; blosters, 20c. to 35c. of miles overland for the purpose. It is understood that by this means he is also kept in touch with that is taking place in the Ashanti

Would Like a Change.

"I noticed in the Whig last night remarked a citizen this morning "that the police had about concluded their inspection of yards and pre-Thises and had, reported a great seems to me that this system of inspection is somewhat of a farce. policeman, only one at a time, mark you, spends three months going from house to house inspecting as being in a dirty condition. The of which the police act, cannot take any action to have these foul pits cleansed until the autumn, when really the time they are needed to be clean is during the warm weather, to prevent stench arising and keep down disease. Instead of having the pits cleaned out early in the spring, they are allowed to remain foul until the incoming of cold meather, when it does not make any difference whether or not they are then cleaned out. I think the board of health ought to remedy this oversight, and arrange to have the inspection take place at a time when should dirty places be reported, the owners may be compelled there and then to clean out the deposits. This could be done by having a greater number of inspectors put to work at once so that the task could be wound up quickly."

Prescott Water Works.

The work of laying the water mains at Prescott is well under way All the streets running parallel with the river have been pired. The ex cavation is being done by a gang of Italian workmen. In putting down the pipes over 4,000 cubic yards of rock will have been blasted out. Seven miles of pipe will be laid. There will be ninety hydrants for fire purposes. The contract calls for the completion of this work by December 1st. The water will be taken from the St. Lawrence river above the town and at this point the new pumping station is being erected The pumping station is a brick and stone structure 36x48 feet. The new pump is of Northey pattern and was built in Toronto. A steel water tower, ninety feet in height, which will rest the reservoir, holding 100,000 gallons of water, is also being built. It is also proposed to place a sewer system throughout the principal streets of the town, and work will be commenced in the near future excavating for the sewer
