cation?-Teachers' Magazine.

The feminine acrobat, trapeze performer and popular danseuse give us some idea of the ideal feminine figure in the bountiful curves and outlines where difference of sex is most marked. If an object lesson is sought to prove that muscular development tends to emphasize the evolution of sex differentiation, it can be found in such shows as Barnum & Bailey's in the beautiful bodies of both male and female acrobats. While if another is needed to demonstrate that want of muscular development produces an approximation to the type masculine, it can be found, alas, all Alligston Ladies' College, too ensily among women who either cannot take exercise (as overworked teachers
