

SOFT, MELLOW AND THOROUGHLY MATURED.

# DEWAR'S WHISKY

LEAVES NOTHING TO BE DESIRED.

## POLITICIANS UNITE

ON THE

# Souvenir Range

It is not often political parties find common ground on which to meet. Their differences are mostly rich in discord. But we have an exception in the case of the celebrated Souvenir Kitchen Range. Laurier and Tupper, Hardy and Whitney, are of one mind on this subject.

"And now Hardy, Tupper, and Laurier too, Use the Souvenir Range for political stew; All gases escape through its fine aeration, And good wholesome food now blesses the nation."

The strong point of the Souvenir stove is its aerated oven, which makes cooking a success under any circumstances; and the good nature of the politician—as well as the cook—is soon restored when a Souvenir stove is installed in the kitchen.

A neat booklet entitled "Kitchen Wisdom," with illustrations by J. W. Brough and J. S. Gordon, is yours for the asking, and it tells you a good deal about the Aerated Oven.

Sold Everywhere One will Last a Lifetime.

## KINGSTON DISTRICT NOTES

WHAT OUR INDUSTRIOUS STAFF OF CORRESPONDENTS WRITE.

**The Wreaths of the Week.** That concerns the residents of the Midland District—Little Scoopes Notice, and Each Locality Can Find Something of Interest.

**WILLIAMSVILLE, Oct. 9.**—Mrs. Rose, Wilton, is here on a visit to her daughter, Mrs. A. Card. Miss Cassie Fox has left to resume her studies at Queen's. Her sister, M. Fox, has taken charge of her school. Marshall Peacor is home from Michigan. A young lawyer has come to brighten the home of J. A. Oulter.

**ALTONVILLE, Oct. 11.**—A great many from here attended the Mabely exhibition. R. Kilpatrick is ill as present. Mrs. Bygrave returned last week after spending a week visiting in Ottawa. Mr. and Mrs. James Dier, Westport, called on acquaintances here last week. J. W. Ervine arrived home for a visit. J. A. Norris and W. Fitzgerald, Tichenor, also spent a few days here.

**IVY LEA, Oct. 10.**—Miss Minnie Shipman has returned from Rochester, N. Y., after spending a few weeks with friends in that city. Miss Ethel Shipman, left last week for Kingston where she intends taking a course in the Kingston business college. J. McCrea is improving his home by the addition of a kitchen. E. Shurtliff and wife have moved back to Oshanaque after spending the summer here.

**CALABOGUE, Oct. 10.**—Missionary services were conducted in the Methodist church Sunday, October 1st, by Rev. Mr. Meach. Deceased—Miss McKerron has returned from Pembroke. Miss Minnie Hunter has gone to visit friends at South Mountain. Miss Minnie McKerron left for Niagara Falls on the 11th. A painful accident occurred on Sunday morning when Stephen Dakson had the misfortune to fall and break his leg. Workmen have commenced laying the steel on the siding to the Caldwell mine.

**MILL HAVEN, Oct. 11.**—Mr. Regie, Sydney, visiting friends here, and Miss Bell, Waverley, are starting a J. O. Ferguson. Miss Frances Smith has returned home from Glenora, where she spent several weeks with her uncle, who is very ill. Mr. and Mrs. Smith, Bay View, spent Sunday with their son Stewart Smith. Miss Lillie Sprague, Westbrooks, was the guest of Ethel Fleming, last week. Mrs. Smith, Collins Bay, and Mrs. Nicholson, Bay View, called at James Plummer's recently.

**FERRISBURG FALLS, Oct. 11.**—The farmers are busy threshing around here now and the grain is turning out well. John Kelly is digging potatoes; he digs an acre a day. The funeral of Mrs. Closs, Lismark, arrived here on Monday morning, and the remains were interred in the Roman Catholic cemetery. Charles Nagle, Almonte, spent Saturday with friends here. We are pleased to see Charlie alive and well after a trip to the Klondike. He endured many hardships while away. We are pleased to see William Doyle able to be around again after a serious illness. Master Howard Robertson, second son of J. Robertson, is seriously ill with inflammation. Mr. and Mrs. Cooke and children, South Corners, spent Sunday at J. Morris'. Mr. and Mrs. Adam Morris, Mrs. and Miss Mills, Drummond, spent Sunday at J. Morris'.

**JOHN'S FALLS, Oct. 9.**—William Nollan, Kingston, was in the neighborhood recently trying to organize a lodge of Maccabees. Our young people had a pleasant time at the home of H. Arrows last Wednesday evening. Robert York and wife spent Sunday at J. Morris'. Mr. and Mrs. Thompson, Smith Falls, and Mr. and Mrs. Gore, Bay, visited at Chester Cairns' last week. A large number of outsiders visited the gospel tent on Sunday. Louis Courcier had his arm broken recently. Mrs. Arrows, Smith's Falls, is visiting her brother Henry. Mrs. Sherwood, Elgin Station, spent Sunday with friends here. Miss L. A. Redick, late graduate of Brockville business college, was the guest of Miss Kennedy last week. Quite a number from this vicinity attended Lyndhurst fair on Tuesday.

**NAWANE MOUNTAIN, Oct. 9.**—Thomas Nelson, three from a house a few days ago and severely ill, is improving. James Kehoe is able to be around again after his recent illness. Joseph Morgan is able to sit up. Mrs. Harry Lather is slowly gaining; her friends have small hopes of her recovery. B. C. Lloyd surprised a midnight caller in his barn; the gentleman made his escape. His name is known, however. Miss Lettie McConnell, formerly of here, has been visiting. Miss L. A. Redick, late graduate of Brockville business college, was the guest of Miss Kennedy last week. Quite a number from this vicinity attended Lyndhurst fair on Tuesday.

**NAWANE MOUNTAIN, Oct. 9.**—Thomas Nelson, three from a house a few days ago and severely ill, is improving. James Kehoe is able to be around again after his recent illness. Joseph Morgan is able to sit up. Mrs. Harry Lather is slowly gaining; her friends have small hopes of her recovery. B. C. Lloyd surprised a midnight caller in his barn; the gentleman made his escape. His name is known, however. Miss Lettie McConnell, formerly of here, has been visiting. Miss L. A. Redick, late graduate of Brockville business college, was the guest of Miss Kennedy last week. Quite a number from this vicinity attended Lyndhurst fair on Tuesday.

His name is known, however. Miss Lettie McConnell, formerly of here, has been visiting. Miss L. A. Redick, late graduate of Brockville business college, was the guest of Miss Kennedy last week. Quite a number from this vicinity attended Lyndhurst fair on Tuesday.

**HARRISVILLE, Oct. 11.**—The Presbyterian church will be reopened next Sabbath. Rev. M. MacGillivray will preach afternoon and evening. No service in the Methodist church next Sabbath evening, the pastor having kindly given his services to his congregation. The church is reopening in the Presbyterian church. Monday evening the Rev. Dr. Smith, Queen's, will lecture in the Presbyterian church. There will be a musical programme. A big mistake was made in the report of the harvest festival at St. Paul's church, Sydney. It was stated that the harvest chorale were filled with the presence of Sydney girls. That is just like Sydney! The chorale that carried the protest girls carried Harrowmuth girls. William Miller is very ill at the residence of his sister, Mrs. Robert McLean. Last Saturday evening the tent in use by the Honorables was destroyed by fire. They are holding their meetings in the town hall. S. F. Stewart is having now heating apparatus put in his residence. Mrs. P. Myers is still improving. Miss A. Forsyth spent Sabbath with her parents near Wilton.

**LANSBOWNE, Oct. 11.**—The many friends of John Smith, youngest son of William Smith, will regret to hear of his death, which occurred here yesterday. H. C. Malvaugh, after about three days' illness with appendicitis. Deceased was a bright, promising young man about twenty years old, a general favorite with all, and deep sorrow is felt at his untimely end. His family have the sincere sympathy of the community in their double sorrow, as their daughter, Mrs. Matthew Steacy, was buried Sunday, and now their son is being taken away. Thursday night he was confined with his sister, Mrs. Steacy, who died the next day. For some time he had been working for H. C. Malvaugh, and after returning here on Friday was taken ill, and though the best available medical aid was secured, nothing could be done to

**THE RING FLINGER.** To the question often asked why the marriage ring should be placed on the left hand many answers are given. Some say because the left hand is much less used than the right, and therefore the ring is less liable to get broken. In the British Apology of 1788 it is stated that for the same reason the fourth finger was chosen, which is not only less used than either of the rest, but is more capable of preserving a ring from bruises, being the next to the little finger. It is said that it cannot be extended by any pressure with some other finger, whereas the rest may be simply stretched out to their

## AN INTRICATE TASK.

THE JOB OF CONSTRUCTING A RAILROAD TIME TABLE.

Problems which the Transmitter has to solve and which call for a clear head, hard work and a generous fund of patience.

Very few people have ever seen a railroad time table in course of construction. As a matter of fact, comparatively few have seen a time table after it has been completed. About the only piece of literature of this kind that the average citizen has need of is the little book handed out to him by the ticket agent. But that is very far from being a complete time table. Only a small percentage of the road is shown in the road every day. The table prepared by every railroad division for the use of its engineers and trainmen and other employees in need of knowledge of the movements of trains is printed on a sheet of paper about four feet long and two feet wide. This contains information about every train, passenger or other, about every station, weekly or bi-weekly run or which is otherwise entitled to a place on the sheet.

The time table is in reality given in the general passenger agent's office. This official is responsible for the through trains and for those passenger trains which will travel over more than one road than is shown on the sheet. It is upon the time table that the trainmen and conductors rely for their daily work. They shall begin and finish their runs. Then he divides the proposed running time according to the divisions which the train will traverse and merely notices each division superintendent that after a certain date these trains will arrive at his division and tell him what will be expected of him in the way of providing the train with fuel, water, etc. He is also notified of any other matters which may be of importance to the division superintendent. Of late years each division has come to be more and more a separate concern, the general office being only the highest supervisory

This passenger train schedule is the general table of the roads of the division. It is turned over to the trainmen, who look it up in his office for two or three days and swears when he is satisfied. For the purpose of printing his time table, the transmitter of the railroad has to deal with a mass of material which is covered with numbers and figures. It is usually written in 284 spaces, each space being made to represent five minutes of the 24 hours of the day. The hours are printed in large figures at the top and are separated by heavy horizontal lines. On the sides are printed all the stations at which trains stop, and these are arranged upon a scale according to the distance which separates them.

The transmitter proceeds to tack threads upon the board in such a way that the leaving time at each station becomes apparent. Train No. 1, for example, is scheduled to leave A at 12 and to arrive at B at 4. The thread is tacked on the board under the figure 12, at the top and opposite the station A on the side; the other end of the thread is tacked on the board under the figure 4, at the top and opposite the station B on the side. The thread is also inserted opposite all intermediate stations at which the train will stop, the vertical lines indicating the time. The result is not always a perfectly straight line, for the transmitter knows that a train will make slower time on one stretch of track than on another of equal length. Grades and other physical conditions of the road must be taken into consideration.

This is an important detail in the case of trains of which the utmost safety and speed is required. After his passenger trains are all in place, the transmitter notes where the east bound and the west bound trains cross. This must not be in the vicinity of a station, for the sake of the trainmen. It is also necessary that the crossing be at a point where there are no other trains. The crossing of the lines is made by the transmitter by drawing a vertical line through the crossing point. The result is not always a perfectly straight line, for the transmitter knows that a train will make slower time on one stretch of track than on another of equal length. Grades and other physical conditions of the road must be taken into consideration.

## TAKING THE REINS.

Rubic, 2:30, is another new standard trotter to the credit of Danico, 2:10.

Armada Prince, 2:10, pacing, is one of the fastest of the hobbled brigade. Billy Andrews, 4:20, by Bow Bells, tops the list of new pacing performers. The name of Prince Wilkes, by Captain Cook, who took a 2-year-old pacing record last season of 2:15, has been changed to Stacker Taylor. Frank Harrington drove Han, Frank Fowler's young green horse Paclaries, by Patronage, 2:12, a mile in 2:17, recently at Davenport, Ia.

Marion G, 2:10, by Rockdale, who began the season with a record of 2:25, has paced 11 races so far this season, and has won seven of them. Much Ado, 2:13, the New England trotter, comes through the home stretch like a free-for-all, and wins most of his heats and races that way. Lakeside Prince, a young horse by Patten Wilkes, 2:20, recently won a race at Berlin, Germany, trotting nearly two miles at the rate of 2:28.

The Riverside farm (of Berlin, Wis.) black colt, Black Robert, who won with ridiculous ease in 2:14 at Davenport recently, is one of the best 4-year-olds of the year. Bantonia, 3:20, now 3, will not race this year. Tom Marsh has sent his horse to Maryland farm, Portmouth, N. H. He has sensational speed, but is a cripple. Split Sill won two heats in the 2:10 pace at Richy park, Chicago, the other day, lowering her record to 2:04, but was not up to connect with and lost the race. She is a goal to Joe Patehen.

Senator A, 2:10, recently won a race at Milan, Italy, beating Bantonia, American horse. Bantonia took the first race at the rate of 2:20, and Senator A the next two, rate of 2:18, 2:15. Horse Review.

## CURTAIN RAISERS.

Harry Monkhouse, seen here in "The Gypsy Girl," is to star in England in "Lark Rise to Wakefield." Miss Rose Stahl will present the role of Lark Rise in the first performance of "A Soldier of the Empire." Margaret Anglu will play Mimi with Henry Miller in Charles Frohman's production of "The Only Way."

Agnes Serna will act in Paris during the exposition of 1900. No German actress has attempted that since 1872. Miss Lamont's new play is to be called "The Degenerates." She will appear in it as the mother of a 16-year-old daughter. It is stated that only two of the characters in the "Children of the Ghetto" will speak in the distinctly Jewish dialect of the play.

Violent Vandenberg will take the role in the new Henry Lane melodrama which Ada Rehan had agreed to act before Arthur D'Ally's death. James M. Colville will play John Storm in the special "The Christiana" company, in which Ethel Elster will appear as Glory Quayle. This company will open its season in Bridgeport, Conn.

"The Gypsy," which Stuart Robson will give at Wallack's theater, New York city, beginning Sept. 16, is a dramatization of a novel of that name, written somewhat in the vein of Sardou's "Diana Requet." The company which has been engaged for "Mistakes Will Happen" is said to be strong. It is headed by Charles Dickson and includes A. H. Stuart, J. W. Standish, Ben Deane, L. R. Willard, Lansing Rowan, Elsie Edmond and Lottie Hays.

The transmitter proceeds to tack threads upon the board in such a way that the leaving time at each station becomes apparent. Train No. 1, for example, is scheduled to leave A at 12 and to arrive at B at 4. The thread is tacked on the board under the figure 12, at the top and opposite the station A on the side; the other end of the thread is tacked on the board under the figure 4, at the top and opposite the station B on the side. The thread is also inserted opposite all intermediate stations at which the train will stop, the vertical lines indicating the time. The result is not always a perfectly straight line, for the transmitter knows that a train will make slower time on one stretch of track than on another of equal length. Grades and other physical conditions of the road must be taken into consideration.

This is an important detail in the case of trains of which the utmost safety and speed is required. After his passenger trains are all in place, the transmitter notes where the east bound and the west bound trains cross. This must not be in the vicinity of a station, for the sake of the trainmen. It is also necessary that the crossing be at a point where there are no other trains. The crossing of the lines is made by the transmitter by drawing a vertical line through the crossing point. ## THE TURF RECORD.

Joseph Davidson, Wilmington, Del., will act as starter at Lebanon, Pa., during the September meeting. Meteor, 2:17, by Commodore Belmont, now 20, will be raced in the fall in Oregon and Washington. Vance Nuckles gave the green gelding Sid Durfee a record of 2:20 1/4 in the 2:20 trot at McKees Rocks the other day. Eddie Bass had the opples on McJoe in the 2:12 pace at Old Orchard, Me., for the first time since the gelding has been in the east.

Tomita F, 2:13, is a member of the hobbled brigade. She is a small chestnut mare, looks like a thoroughbred and has very little action. At Rushville, Ill., Berwin, by Bernal, 2:17, recently took a winning race record of 2:20 1/4 in the 2:40 trot and also won second money in the 3:00 trot. At Portland, Or., July 28, Decele, 2:16 1/4, and Alta Dell, 2:18 1/4, reduced the state record for pacing teams from 2:26 to 2:19, the last half being paced in 1:05 1/4.

Tecco, 2:12 1/4, who has been the sensation of the season in New England, is to try conclusions with the grand circuit cracks in the \$10,000 Massachusetts at Roadville. C. H. Burch, trainer for Empire farm, Corahe, N. Y., has driven two pacing stallions, owned at the farm, into the 2:10 list this season—Billy Andrews, 4:20, and Theodore Steacy, 2:09 1/4. Fanny Putnam, 2:15 1/4, is eligible to again start. She has been estimated by the National Trotting association, the sum necessary having been paid by her owner, W. G. Stevenson, Victoria, B. C. The black filly Spide, by Oh So, 2:25 1/4, who trotted to a record of 2:19 1/4 at the recent Freeport meeting, is a 4-year-old, pacing, being out of Mand Archibald, 2:27 1/4, by Glenwood.

Directoire jackets fashioned from rich patterns in cream renaissance lace. Pearl gray golf hats trimmed with huge wings and brilliantly colored scarfs. Trenches of gray velvet having two large wings extending outward on either side. Trenches of soft liberty silk finished with ruffles of the material edged with rich yellow lace. Broad trimmed Neapolitan straw hats trimmed profusely with roses, tulle, ribbon and egret. Electric blue duck skirts trimmed with strappings of the same material and small pearl buttons. Dinner gowns of black crepe de chine lavishly trimmed with festoons of deeply tinted renaissance lace. Five point purses completely covered with imitations of rich lace with puffings of chiffon between.

Not and silk muslin all over elaborately decorated with garlands of applique lace outlined with seed pearls. Gowns of pearl gray mousseline de soie furnished with a garland of flowers and foliage of mauve tulle outlined with gold cord. Faded costumes with a draped fringed sash of velvet and deep circular lace collar opening over a glimpse of white starched shirt. Walking gowns of black cloth with striped seams, accompanied by a short, pointed jacket of tulle tulle finished with white stitched revers—Dry Goods Economist.

A blind bat avoids wires and obstructions as easily as if it could see perfectly. A French scientist says a caterpillar cannot see more than two-thirds of an inch ahead. The hairs on the body are said to be as much use as its eyes in letting it know what is going on around. Hawks have been seen to follow in the wake of a moving railway train and sweep down on small birds that were suddenly disturbed and frightened by the noise and therefore for the moment were out of their guard.

In Fall there is a curious sea worm which arrives in myriads on the coast on a certain day. The worms are so full of venom as to resemble verminelli worms. After having their eggs nothing is left of the larva empty skins. An ostrich cannot kick backward. When the time has come for the bird to be despoiled of its feathers, its head is inserted in a bag and the plucker stands behind his victim. A blow from its foot has vigor enough to kill a man.
