mising. There have been few failures. The chief reason for that is the fact that retailers have fewer bad accounts. Bradetreet's New York report says: General trade and industry continue at a maximum volume for this season of the

year, while prices as a whole manifest a strength unappreached in recent years. A smelter having a daily output of 250 tone of fron will be erected next spring at Ironsides, Que. Another smelter of similar capacity will be erected at Welland, on the Welland canal, the two to represent an outlay of \$1,500,000 capital.
