## Che Prevention of Disease & &

Disease is a perverted action of some part or organ of the body or a poisoning of the system by the introduction into the blood, from without, of some specific poison or disease germs. When all functions are properly performed, no poison can enter the system and no disturbance of any kind can take place.

Abbey's Effervescent Salt, by keeping the action of the stomach, liver and bowels in a normal condition, and by eliminating all poisonous material from the blood, insures perfectly healthy nutrition for every part of the body, and thus prevents the development of any form of disease. Therefore we confidently assert that a teaspoonful of Abbey's Effervescent Salt taken every morning in a glass of water will insure perfect health and prevent disease.
