Constipation.

The meaning of this term is too well known to all to require explanation. When this condition maintains, the poisonous material which is no longer fit for use is absorbed into the system, causing a self-

The causes of constipation are many and varied. Among the more common may be mentioned a poor stomach digestion, a deficiency of bile in the intestines, a lack of secretion in the bowels, and a want of the natural muscular contraction of the intestines.

In this condition Abbey's Effervescent Salt is nature's best assistant. It stimulates and restores the stomach digestion, increases the flow of bile into the intestine, and causes a watery flow from the intestinal glands. Thus the natural downward action of the intestines is restored, rendering it easy to secure a free action of the bowels, which is one of the most important requisites to health. Thus Abbey's Salt helps nature to rid herself, in a natural way, of this condition, and does not act, as the ordinary laxatives do, as a false stimulant which reacts and leaves the patient in a worse condition than before.
