A good many ladies have found out that our Cloth Jackets, in addition to being up to-date in style and finish, are decidedly lower in price and better value than those shown in Dry Goods stores. Our specialties being Furs and Mantles enables us so to concentrate our energies on these two lines that, as a rule, we are able to offer a little better article for a little less money than our competitors. No use quoting prices until you see the goods, but we do say that our New Cloth Jackets at \$1.35, \$5, \$6.25 and \$7.85 are unsurpassed in this city for style, materials or price.

Protectorate Over Egypt - Government Attempts to Suppress News of Waritke Preparations-The War Cloud Grows LONDON, Nov. 1 .- The Daily Mail this

Lospos, Nov. 1 .- Most of the papers are full of the alleged war preparations despression undoubted fact that the authorities are doing their best to provent publication, and even donying statements that have already appeared. Yesterday a sudden order was received at Dover for an experimental mobilization of the defence forces. All the heights and forts were smartly occupied in a manner giving full

The arsenal at Wool wich is working until eleven o'cl ck overy mght, the government having given large orders for guns, search I ghts and other naval equipment. The Butish channel squadron has cast anchor off Gibraltar.

The advices from Paris in the special despatches this morning add little to what was already known regarding the situation at Fashoda. It is believed that captain Baratiar is taking only verbal instructions for major Marchand.

The idea prevails at the French capital that count Muravieff, the Russian foreign minister, while there on his recent visit promised Russian support in re-opening the whole Egyptian question, and that major Marchand will be instructed to fall back and main am his occupation of all will not be considered unless made on a prin-Bahr El Ghazel posts.

The government hitherto has not admitted that any special warlike preparations were proceeding. It now finds that the newspapers are publishing too many details of these preparations, and the war office has accordingly appealed to certain editors not to publish anything that is likely to be useful to "a possible enemy." Col. Stopford, chief of the mobilization

branch of the intelligence department, in an interview animadverted severely upon the newspapers for revealing the preparations for war. He said : "The editors are doing enormous barm to the country by printing valuable military information which it is against our interests to communicate to France.'

This obvious confirmation of the reports of warlike preparations and open designation of the possible enemy will inevitably attract lively attention here and in France. It need not, however, be construed as meaning that anything has happened to render the situation more acute. Information received from the various dockyards | a slight chest ailment and will start im indicates that the naval activity continues. Orders have been received at Portemouth that the complements of crews of the first-class battleships Tratalgar and Alexandria and the first-class cruiser Aus-

tralia be filled immediately, and officers and men are being recalled from leave. Two torpedo boat destroyers at Chatham have been ordered into commission. Five battleships entered Plymouth har-

The knedive ranks at Constantinop'e as a mere provincial governor, and receives his investiture from the sultan and ranks after the grand vizer. This being the case the sultan has full legal right to dispose of his provinces as he sees hit, and I learn on the highest authority that, with the object of embargelistic work, had a narrow escape rassing Great Britain and revenging himself upon lord Saliebury for the affront to which he has been subjected in connection with the Cretan embroglio, he has signed a tirman granting to the French government a lease of the Bahr El Ghazui province, and conferring upon France the exclusive right to the military occupation of

the district. It is the knowledge of this intrigue at Constantinople which reflects no little inginuity on M. Delcasse, the foreign minister here, that is precipitating the proclamation of the protectorate over Egypt by Great Britain. Of course, there is not the slightest chance of England submitting tamely to the possession by France of Nile provinces which she has reconquered for Egypt at the expense of much blood and treasure, and it is doubtful whether the firman of the sultan will ever receive exe-
