# U.S. CONSUL CUBA ECZEMA

V UNITED STATES CONSULATE. BANTIAGO DE CUBA, Dec. 13th, 1897. PETTER DRUG AND CHEM. CORP.

BOSTON, U.S.A. Gentlemen: Whatever is the cash value of the difference between living on earth, and a place said to be much hotter than Cuba, I an indebted to the use of your CUTICURA GOAP and CUTICURA (ointment).

L'ezema is a provalent disease on this island. I had an attack of it, and ordered a box of oxide of sinc ointment. The first application a hanged the Eczema to hell-fire, which seemed 1 squenchable. The druggist had used a rane.d cerate and I was poisoned.

I have practised medicine over thirty years n il taken a special course in cutaneous di icases under Prof. John V. Shumaker of Phil., but I lost faith in the purity of Cuban drugs, as everything either failed to help my trouble or made it worse. I called in a local physician, but he did not help matters, and I was becoming desperate, when I thought of Curi-cura Remember, and dispatched my servant for a cake of Curicura Soap and a box of CUTICURA (ointment). The first application retirred me, and in three days I was well. PULASKIF, HYATT, United States Consul.

TORTURING DISFIGURING Humors whether itching, burning, bleeding, scaly, crusted, pimply, or blotchy whether simple, crof-ulous, or herealtary, speedily, permanently, and economically cured by warm baths with Curi-CURA SOAP, gentles anointings with CITICURA (aintiment), purest of emollient skin cores, and mild dozes of CTTICURA RE-OLVENT, greatest of blood purifiers and humor remedies.

Sold throughout the world. Potter Date And CHEM. Con. . , Soin Props., Boston. "How to Cure Every Kind of Eczema," frea.

PROF. GOODWIN'S SPEECH.

AT OPENING OF M'GILL'S NEW BUILDING.

The Proceedings Accompanying The Opening (of the McDonaid Chemistry And Mintog Building - The Distinguished Speakers-Lord Minto Present.

had recognized W. C. McDonald's benefi

cence by the honor of knighthood, and

Mr. Chamberlain had sent his personal

congratulations The other speeches were

also short and to the point. Professor

Richards, of the Boston institute of

technology, spoke of the building from

the seientific point of view, and indirectly

ing up as an ideal the lines of work actual-

ly pursued. Prof. Goodwin, Kingston, and

Hon. Sydney Fisher spoke on Canada's

indebtedness to Sir William McDonald

Dr. Parkin took the imperial point of

view, and his speech was not unworthy of

the lofey standpoint he adopted. Sir

William McD mald said not a word, and

the only part he took in the ceremony was

to hand to the governor-general a little

Prof. Goodwin, Kingston, sail: I' is

my pleasure to convey to you the congra-

tulations of Queen's university on the

opening of another of the series of build

inge, the election and equipment of which

we owe to the liberality of W. C. Me-

Donald. I say "wo owe," because al

though coming from another province,

and representing another educational

body, I think that there gifte should

be looked upon as gifts not mere

ly to McGill university, but to Cin-

ada. (Applause) Thus they come to

have a wider import and a deeper sig

ndicance in our development as a nation

It is freely acknowledged now everywhere

that modern civilization owes at least

many of its important features to the ad

that these nations which provide best for

scientific education become the most pros-

perous and powerful. While material

prosperity is not everything, it is yet very

In ore of the roome of this building I

stand that this label arose from the at-

tempts of the political economists of G.e.t.

Britain to discourage the importation of

artic es manutactured in Germany. 'Vheth-

er it has had that effect in England I leave

the English political economists to say,

but at any rate it has served as a splen-

did advertisement for articles of Ger-

man manufec ure, because wherever I

go I see this mysterious label. Now

what is the secret of this? It is that the

German nation recognized earlier than any

other the place which science should take

in the development of nations, and they

ties and governments to build up a system

of scientific education and to make pro-

vision for the application of theoretical

-c-ence to industry. As a consequence,

largest place in science, as Great Britain

The position of Canada has been ma-

ternally affected by the recognition by

a potent factor in the development of our

inoustries. If I may be allowed to descend

to a homely example, we owe our position

to-day in the front rank of the cheese

makers of the world, to the application of

he best scientific principles to coat indus-

try, and Conada is rapidly pushing her

way to the front in other agricultural pro-

ducts But Canada can hardly be consid-

ered a purely agricultural country. With

unlimited water powers, her future may

be hoped to lead her into all those manu

factures which depend upon min

ing, metallurgy, chemistry, and, in par

ticular, those industries which rest upon

the application of electrical energy. Many

of those industries, if not most of them.

rest upon chemistry as a basis, and when

look around this room and see the names

of eminent chemists engraved upon these

walls, I consider that this is a particularly

tortunate occasion for Canada, seeing that

in this building all branches of chemistry

are provided for, both pure and applied

(Applause ) I congratuiate you, Mr Chan-

celler, and I congratulate the university.

upon the acquisition of this building, and

the foundation of chairs which will, I hope,

lead to great prospenty through the de-

anopment of the allied industries. (Ap-

#### REDUCED TO A SHADOW.

A Fredericton Lady Tells of Her Sickness and Suffering and of Her Restoration to Health by Milburn's Meart and Nerve Pills.

Messrs. T. MILBURN & Co., Toronto,

GENTLEMEN. - A year ago last September my health became much impaired, and I suffered intensely from prostration of the nerves, neuralgic headaches and general debility. The pains would shoot up my neck and down my arms producing numbness and a sensation as if my arms were frozen, so that I almost lost the use of them. My heart would flutter and palpitate; and sometimes I awakened up out of my sleep with a smothering feeling as though I was suffocating !

"Before taking Milburn's Heart and Nerve Pills I was almost reduced to a shadow, and felt worn out, irritable, and melancholy. To add to my sufferings a partial paralysis set in, and, though I doctored a great deal, and took many medicines, I received no benefit. However, on trying Milburn's Heart and Nerve Pills, which I got through Mr. Geo. C. Hunt, our well-known druggist here, their curative powers manifested themselves almost immediately. I could feel every dose doing me good. They seemed to act upon the heart, and stimulate the circulation so that every tissue of my bedy received its due share of vigor and strength.

"The intense headaches with which I was so frequently afflicted have disappeared, and, instead of being weak, worn out and run down, I am now in my normal healthy condition.

"I give this testimony for the benefit of those suffering from similar troubles, so that they may know there is a remedy within their reach well worthy of a

REFORM CLOTHING

Knowing not guessing.

Instinct teils a man more, at a glance, that he needs to know, in the trying on of a ready-made hat, suit, or shoe, than his

tailor could guess for him in a century. The round-shouldered person instinctively recognizes (when trid on) the suitability of the quiet, loose-litting coat, which conceals the deforming curve of his back, even though he may not analyze the cause of such suitability, nor admit the deformity.

Slender men can look stouter, short men taller, sloping shouldered men squarer, and any man more dignified or jaunty, as he desires, by an intelligent selection of standard "Fit-reform" shapes, tried on before purchased.

This does not apply to ordinary readymade clothing, in which neither these distinctive shapes, nor the workmanship, which constitutes and retains lit, are obtainable.

### LETTERS TO THE EDITOR.

Dr. Evans' Oriticism Oriticized. Kingston, Dec. 21 - (To the Editor) In the Whig's report of Dr. Evans' ad dress of last Sanday evening there is the following: "Again Mr. Wood said Christ went down into hades and preached to the don't, but we want to catch captives. This is a deliberate and whole sale fateification of eccipture. Such scrip ture was not to be found except in Mr. Wood's fortile, fanatical cranium

lo seems to me that this is rathe "wholesale" of Dr. Evans, though not eavoring very much of the "deliberate" or charitable of her. The doctor will find scripture on this question in I l'eter un upon which bible erudents of most all the leading christian denominations have pronounced; and their interpretation with-Out wreating the word in the least is that BEST out wreating the word in the least is that At the time of his death he had not Here is the passage: "Being put to attained full growth, but was already death in the flesh but quickened in the seven feet two meher tall, two feet three spirit; in which He also went and preach inches around the head. four feet eight ed unto the spirite in prison"- verses 18 20, revised version; the ancient version has it that you ever saw, and if

the great majority of commentators, ancient and modern, I understand these words to McIadoo was of Scotch Irish parentage. say that our Lord, in His disembodied state, did go to the place of detention of departed spirits and did there announce you have never seen any-His work of redemption." Professor Tay lor Lawis observes : "We are taught that there was a work of Christ in hades. He descended into hades; He makes proclama tion in hades to those who are there in Overcoat and we will save ward." Rev. George Sexton, D D LL D. also eays : "It must be born in mind that you a snug sum. it is not said that He preached the gospel but simply heralded, that is, made announcement of His finished work, thereby confirming what had been said by Nosh, and declaring the condemnation of the antediluvians and its cause. In no soneo can the Romen doctrine of purgatory be found in the text. Purification by fire is not even hinted at, and the persons preached to are such as even Koman Catholics

would hardly place in purgatory at all." Then, it seems to me, Dr. Evans is a little unguarded in his criticism on the personahty of Gird. He argues that "to make God a person destroys His omnipre sance" Most everyone believes that in personality there is rationality, the power of self consciousness and self determina tion Surely in the nature of the Supreme Being, though omnipresent, there is all of there. Possibly Dr. Evans demes the carporeal personality of the Daity, which is quite another thing -PIBLE STUDENT.

W. S Jewett, president of the Lake Na tional bank, Wolfboro, N. H., embezzler of \$25,000, has been found guilty.
