MEN WERE TO BLAME.

For Trouble on Crow's Nest Pass Rail

TORONTO, Dec. 16 .- M. J. Haney, manager of the Crow's Nest Pass railway, was in the city yesterday and being interviewed concerning the recent alleged trouble there, said there had been no ill-treatment of the men. The original difficulties grew out of a number of men deserting a contractor named Neil Keith. They owed Mr. Keith and he had them arrested and the case came before the courts. The decision was appealed against by the contractor and the case brought before one of the territorial judges. This took a long time and meanwhile the company offered the men work. They refused and stayed around Fort McLeod sending Don't fail to see Cissy Fitzgerald in the "Foundling" at the opera house to-night. exaggerated reports to their friends in the east. Some person represented to the manager that the men were in want, and he gave them an open order to get what food they required from the camp. Some of them availed themselves of the opportunity, others did not.

Originally there were thirteen men concerned in it, and the crowd swelled to fifty. five. They were French-Canadians, many of whom came in to act as witnesses. The judge's decision was reserved, and the case stands the same as before. Finally all of the men, except two, decided to come home, and they were furnished with free transportation and enough money to pay expenses. There are 4,000 men at work, and outside of this there has been no reported discontent.

He reports the route perfectly feasible. The explorer was informed by partie- just out from Dawson City that administrator Walsh's party has lost its entire outfit and is now on equal terms with the distressed Dawson people as to food supplies.

SEATTIE, Wash., Dec. 16 -Passengers on the steamer Al-Ki, which has arrived here from Skaguay, report that according to a new ruling of the deputy United States collector of customs at Skaguay, goods purchased in Canada and brought to Skaguay must either pay duty or six dollars a day be given a customs official while the goods are in transit to the international boundary line. The collector has already collected duties on five outfits from British Columbia, the owners paying the duty rather than pay a customs official to travel with them to the line. Owing to the dispute over the locality of the boundary line it is feared that bad feeling may be engendered by the collector's interpretation of the customs laws.

WASHINGTON, Dec. 16 -Senator Davie, chairman of the foreign relations committee, called up the administration bill to prohibit American citizens engaging in the Behring sea fisheries industry. It occasioned a long debate. Mr. Pettigrew, South Dakota, criticized it sharply as another instance of truckling to Great Britain and offered an amendment providing for extermination of the seals if Great Britain did not by June 1st agree to a suspension of pelagic sealing. Mr. Pettigrew's amendment was defeated and the bill was passed by a vote of 370 to four-

the evening. Mr. Whitney addressed five questions to the government on the timber question, which had evidently been placed on the paper with the object of ascertaining whether there was collusion between the Ontario and federal authorities. Replying to these questions, the premier said : No representations or inquiries have been made by the government of Canada, of any member of it, to or of the government

of the province, or any member of it, regarding the policy of the latter government upon the question of restrictions in timber licenses heretofore issued by thedepartment of crown lands, now in force, or in licenses to be issued in pursuance of any future sale. I had a casual conversation with an Ontario member of the government of Canada relating to the question of the manufacturing condition shortly before or about the time of the first meeting of the Canadian lumbermen in Toronto. The member in a general way expressed his opinion upon the question. The government has no knowledge or information as to the atfriends say that he has become permeated titude of the Canadian government upon the question. To the question as to whether the government of the province had refrained from laying its policy on the question before the legislature in consequence of the attitude of the government of Canada, or in consequence of any request from the government of Canada to delay the an-

nouncement of its policy, the premier replied, "No; in no sense whatever." A bill of much importance to students throughout the province will be brought into the legislature later on in the session. The amount of fees which high school students from the county have to pay is difficult to determine. Now, many schools which are inefficient have higher fees than better-equipped institutions. It is proposed that the cost of various high schools throughout the province be figured up by the education department, and that the legislative grant be made there on an average rate for each pupil there determined, atter having some regard to the efficiency of the school.

It practically means the taking of the control of fees from the counties, and the placing of it in the hands of the department. Petitions to that effect have been

NORTHWEST BUTTER.

Output of Sixteen Creameries Was Nearly Half a Million Pounds.

OTTAWA, Dec. 16. - The total quantity o butter manufactured in the creameries of the northwest territories last summer amounted to 478,873 pounds. There were sixteen creameries in operation, where there had been but three the previous year. Arrangements are being made to pack the butter from these creameries for the Japan and Klondyke trade. West Indian trade will likewise be developed, and the butter from the Nappan farm in Nova Scotia will be shipped there.
