THE LAWRENCE HEIRS

A LARGE MEETING OF THE BELLEVILLE CLAIMANTS IS HELD.

DORESS BY MR. STEWART-MARY TOWN-LEY'S ELOPEMENT WITH HER SAILOR LOVER, LAWRENCE - THEIR MAR-RIAGE AT THE HAGUE.

A crowd that very nearly filled city hall met in Belleville on Tuesday, in pursuance of the notice calling a meeting of all interested in the Lawrence-Townley estate. G. W. Ostrom was chosen chairman and introduced Stewart, of Toronto, who made a lengthy address, reviewing the history of the Townley family from the elopement of Mary with her sailor lover Lawrence. He stated a marriage certificate had been found at the Hague in Holland One of Mary's children was buried at Annapolis, Nova Scotia. Mr. J. J. Flint asked to what date they had traced Mary Townley. Mr. Stewart replied 1720. Mr. Flint asked if Mr. Stewart knew of a book printed by Mr. Usher, purporting to give a history of the Lawrence-Townley family, and asked if Mr. Stewart deemed it authentic. Stewart said he had read the book, an seemed to think it authentic, but stated that he believed Usher was getting \$20 000 a year from the Townley branch of the family to defeat the Lawrence-Townley branch. Mr. Flint asked Mr. Stewart had corresponded with Car ver and he replied that Carver had done much good work, but he could not approve of his mode of getting money AND NOT ACCOUNTING FOR IT.

Mr. Flint asked if Mr. Stewart bad read the Act of Parliament, recently passed in England with respect to the estate, and asked whether it contained future be would be allowed to go free. any limitation as to time when claim must be put in. Mr. Stewart said that the act had been obtained through fraud and suppression of the facts. Lord Iddesleigh was a claimant on the Lawrence Townley branch, and that branch knowing that fact, had supposed that he would see that the act was not unjust to that branch. It had since been found that Lord Iddesleigh was a claimant on the Townley side, and the Act had been passed in the interest of the Townley branch and would have to be annulled. Mr. Stewart stated that they were anxious to put the metter in the hands of the best American and English lawyers at once, that it was necessary to act promptly, now or never, that an association had been formed of highly respectable men in Toronto to push the matter vigorously and that the association meant to fight to the end Mr. Flint was called to the platform and stated that he was not a claimant but had acted in the interest of several for years, that he had listened to the address of Mr. Stewart with satisfaction and thought now was the first time the claimants had had an opportunity of

ACTING IN THE MATTER with intelligence. He moved that a branch society be formed, to be called the Belleville Lawrence Townley Association. The motion was carried.

G. W. Ostrom said he was delighted with Mr. Stewart's address, and the vast amount of information. He said it was now or never. If action was not taken by the August report, the average being 'Ichapod' might be written over their

THE CLAIMANTS HERE.

There are many claimants to the estate in Kingstor, but only one gentleman has any direct evidence of heirship, and he is the only one who has taken action in the matter. It will be some time before practical results are reached.

TRIAL OF THE WHITE REBELS. PROCEEDINGS AGAINST THOMAS SCOTT,

OF PRINCE ALBERT.

Winnipeg, Sept. 9.—Thomas Scott, the alleged white rebel from Prince Albert, was arraigned at Regina yesterday on the charge of treason-felony. Mr. H. J. Clarke, Q.C., and Mr. Maclise, Prince Albert, detended the prisoner. The indictment charged Scott with incitement to rebellion at various meetings beld in March last, and for writing a seditions letter to the half-breeds in

the vicinity of Batoche. Mr. Clarke entered a demurrer on the plea that he had not been served with a copy of the charge, and that the prisoner had not had a preliminary examination. The counsel, in a long speech, urged against the jurisdiction of the court, asserting that history had repeated itself. Now, as in 1774, when the obnoxious Quebec Act was passed, men were being flung into gaol, and justice became farcical in view of late events. He cited in support of the plea for the prisoner, the report of Sir George Cartier and Hen. Wm. McDongall in 1869. The demurrer by Mr. Clarke, was

overruled by the judge, and the trial of

Scott was fixed for 9 o'clock to-day. Winnipeg, Sept. 9 .- A Regina dispatch says: Yesterday the following prisoners were brought into court and arrainged on charges of treason-felony -Louis Goulet, Chas. Bremner, James Bremner, William Frank, Henry Sayer, and White Blanket. Mr. T. C. John stone appeared for the prisoner. let was charged by Captain Young as being inculpated in the Frog Lake troubles. The prisoner pleaded not guilty. The prosecuting counsel stated that the Crown did not wish to prosecute harshly. Goulet would be discharged on his own recognizance. If he behaved himself in

Winnipeg, Sept. 10.—The trial of Scott from Prince Albert, was concluded at Regina to-day, B. B. Osler, Q.C., for the crown, and Henry J. Clark, Q.C., for the prisoner. The case has been a very exciting one, with several lively passages at arms between the counsel. The testimony for the defence was very strong in favour of the prisoner. Father Andre and Charles Molin were among the strongest witnesses. Judge Richardson charged the jury at length. He felt that cause existed for the prosecution of the prisoner, and that Scott was not persecuted as set forth by counsel for the defence. He asked that the prisoner be given the benefit of doubt. The jury retired shortly after two o'clock, and in twenty minutes returned with a verdict of not guilty. There was great cheering in the court when the result was announced. Man, Indian, pleaded not guilty, and was released on his own recognizance to appear for sentence when asked. Other half-breed prisoners were let off in the same way

ONTARIO'S CROP REPORTS.

They Have Just Been Issued-The Significance of Some of Th m Toronto, Sept. 11. - The report of the Ontario Bureau of Industries, based on the returns made under date Sept. 3rd, has just been issued. The yield of fall wheat is even better than it appeared 24.3 bushels per acre, as against an estimate of 23.3 by the last report. The crops have suffered far less than was expected by the heavy rains. In spring wheat the ravages of rust have turned out to be much more serious than they were at the time of the last report supposed to be. Throughout Western Ontario the crop is almost wholly destroy ed. Taking the province as a whole there will probably be a deficiency in the spring wheat product. The yield will only be 11.5 bushels per acre as against the estimate of 18. The condition of the barley crop, as indicated in the August bulletin, is varified in every Gainesville, Texas, Sept. 10.-About | particular. The growth of the straw

--- "Why! What's the matter?" Lady-(With face enveloped in roll of hot cloths)-"Oh! I'm crazy with that Neuralgia that continually troubles me." --- Well, how foolish ! Why don't you go to A.P. Chown's Drug Store and get a bottle of Fluid Lightning? It cared me in less that one minute. I always keep a bottle in the house. It only costs 25 cents

There is no Excuse. SELLOR'S VITALIZES IS What you need for sallow, weary looking females throughout our land, when Burdock Blood Bitters THE INTERNATIONAL YACHTRACE

SIR RICHARD SUFTON, BARC.

SPORTSMAN AND GENTLEMAN. As there is a universal interest felt in the great international boat race between the Puritan and the Genesta, the Englishman who had the hardihood to send a cutter in the hope to wrest from the America Cup, which the U.S. have held since 1851, becomes an interesting public character. But for his splendid yacht Sir Richard Sutton would never have been heard of on this side of the Atlantic, and on the other he is known chiefly because of his fondness for sport.

He is a country gentleman of inherited wealth and leisure, and the happy owner of two country seats, situated amidst lovely surroundings. Benham Park, Newbury, Berkshire, is a vast domain ornamented with a fine old mansion in the Grecian style of architecture. It is nobly wooded and has abundant waters well stocked with fish. A sportsman might well envy Sir Richard this magnificent heritage, but it is inland and affords no facilities for vachting.

At St. John's Park, Ryde, Isle of Wight, the Baronet's other home, this want is abundantly provided for, and here his passion for vachting is encouraged by all desirable condition for the enjoyment of the sport. As New York Harbor and the surrounding waters may be called the head quarters of vachting in this country, so are the bays and neighboring seas of the Isle of Wight, in England; and Sir Richard Sutton is among the foremost of British vachters.

The Genesta ran her first race and gained her first victory on May 31, last year. She was designed by Mr. Bea vor Webb, and built at Partick, on the Clyde, by Messrs. Henderson Brothers. Her record last season shows six victories in thirty four races, in one of which there was no contestant against her. Seventeen times of the thirty-four she was not placed. She was second eight times, and third, twice.

A VOODOO BOCTOR'S REVENGE.

SHE CURES A FAMILY OF SIX AND FOUR OF THEM DIE.

Hendersonville, N.C., Sept. 10.-At Brovare lived Henry McCorkle, colored, with his wife and four children, aged 4. 7. 5 and 2 years. Three or four days ago a colored weman named Carver call ed there, saving she was a voodoo doctress. They gave her shelter and she remained until yesterday, when she and McCorkle quarrelled and he ordered her to leave the house. She left in a rage. saying she would conjure the whole family. This frightened McCorkle who offered to let her come back, but she refused. She went to a stream near by and gathered some mud which she made into a ball, placing in it several bairs of her head and other things. She then returned to McCorkle's house, and, after pronouncing some gibberish, she fell on her knees and threw the "conjuror ball" against the house, where it adhered. McCorkle was half crazed with fear and begged the woman to remove the ball. but she refused and left the place. In a few hours McCorkle complained of feeling ill, and soon afterwards his wife was compelled to take to her bed. Before nightfall all the children were ill and complained of griping pains in the back and stomach. Two physicians were summoned, but when they arrived they found McCorkle dead and his wife dying. Before assistance could be rendered she was dead. Emetics were administered to the children, the physicians suspecting poison. Two died before midnight. The other two recovered. An autopsy was held, but no trace of poison or disease could be found.

FINED FOR UNDERVALUATION.

Mr. Cleveland, Pea Importer, in a Disput

With the United States Government. Mr. Daley, who represents the Cape Vincent seed firm of A. B. Cleveland & Co., says that the crop of peas and beans, grown about here, will total 14,000 or 16,000 bushels. Recently the firm made a shipment to Cape Vincent. The customs department alleged that the grain was entered at an undervaluation, and a fine of \$94 was imposed. The firm have protested, and, pending a settlement, no further shipments will be made. Some years ago a similar seizure was male and fire exacted, but the firm were successful in their protest. The seed grain is purchased here at \$1 per bashel, and the customs department claim that the entry should be made at the value in the United States market. A very large quantity of seed has been gathered at Picton, and \$5,500 have been paid to the farmers. Nearly 4,000 bushels will be retained at Picton, and a greater amount here to be used in seeding next year. The grain will be handpicked, and foul and foreign substances removed from it. The Gazette says the yield has been excellent. In one instance, from '10 bushels' sowing, 161 bushels were harvested. Most of the farmers who have grown peas for the above firm this season have been very much encouraged by the result, and the probability is that no difficulty will be experienced in distributing the 4,000 bushels retained here for seed among the farmers another season.

Cruelly Murdered. In the Province of Ontario every year thousands are being slowly murdered by taking unsuitable, untried nostrum for such complaints as costiveness, indigestion, liver complaint, kidney troubles, etc., who might easily gain lost strength and energy by using McGregor's Speedy Cure, To convince them that such is the case we will give them a free trial bottle at A.P. Chown's A cere of small-pex hes been deeped

NOTES FROM OTTAWA.

An Embarrassing Decision—The Orangemen in an Excited State.

Ottawa, Sept. 10.-The decision of the Manitoba Court of Queen's Bench in the Riel case has greatly embarrassed the Government. The Orangemen here do not conceal their satisfaction, while the Frenchmen are greatly excited. The government will now interfere and grant a respite for the prisoner until his case is heard before the Imperial Privy Council, otherwise the execution will have to take place on the 18th inst.

Sir Alexander Campbell sent for Senator Clemow, Orange District Master, this morning, and had a long conference with him as to the best means of inducing the Orangemen to consent to a pardon for Riel. The Senator promised to consult his friends about it.

Ottawa, Sept. 11 .- Petitions are being received daily at the State Department, praying that Riel's sentence be commuted; other petitions, praying that the law be allowed to take its its course, are being received from the North-West. One of the latter says: "Your petitioners have been made aware that efforts are being put forth, and petitions are being signed in the Province of Quebec, for the purpose of having the death sentence on Louis Riel, for high treason. commuted. Your petitioners are convinced that the said Louis Riel had a fair and impartial trial, and should the verdict of the jury in any way be disturbed there will be great dissatisfaction in this country, and there will be grave danger of a recurrence of the treasonable acts of which the said Louis Riel has been convicted, and confidence in the government of this country will be greatly shaken. We think it absolutely necessary, in the interests of the North-West, of Canada, and of the world over, that criminals such as Louis Riel should be shown no leniency, as by his action in the past he has set the laws of the Dominion at defiance by an armed insurrection, resulting in great expense to the country and in the loss of many brave men's lives." Ottawa, Sept. 11.—There is one point

about the Riel case which does not appear to be generally understood, that is with reference to the action to be taken by the government in the event of an appeal being made to the Judicial Committee of the Privy Council. general impression appears to be that Riel would have to be respited until the Imperial Privy Council decides whether it will allow an appeal to be made to it or not. The fact of the matter is that the government simply takes no action at all if it is considered advisable that the execution should be delayed. The law governing executions in the North-West Territories is different from that in force in the provinces. In the latter, after a judge has pronounced sentence of death and fixed the day of execution, the sentence is carried out unless a respite or pardon is granted by the Governor-General. In the North-West after sentence has been passed and the date fixed, the execution cannot take place until the warrant of the Governor. General has been issued, ordering the sentence to be carried into execution. It may be remembered that last year two brothers named Stephenson were under sentence to be hanged at Regina. An appeal for the exercise of executive clemency was made to His Excellency. and an investigation ordered by the Minister of Justice, the order for the execution being meanwhile not issued. The day appointed by the judge arrived, but no warrant having been received the execution was postponed, somewhat to not had fair play from Great Britain. the chagrin of an enterprising Winnipeg On the contrary, she has been denied reporter, who knowing that no reprieve had been received and not knowing that none was required, published a graphic

THE LAW OF GRAVITATION.

take place until some months later.

account of the execution which did not

Lying beneath an apple tree Sir Isaac Newton saw an apple fall to the ground. His inquiring mind led him to investigate the cause, and the result was the promulgation of the theory now known as the law of gravitation-a system which at once won the assent of the learned world, and by means of which way. The landlord who draws the the motions of all the known heavenly rent cannot always enjoy it in Paris bodies are explained, and those of the and London. He must have part yet unknown can be determined. A in the fortunes of the people of singularly comprehensive principle is the country or quit. It cannot that propounded and carried into practice by Holloway. He divides all the to be oppressed. I think the day of usual diseases into two classes-those arising from inperfect action of the digestive organs, and those, preceeding from impurities of the blood. These two classes of disease he treats by means of his celebrated Pills and Ointment, two skilfully prepared remedies which have been most successfully used in all the habitable parts of the globe. His unparalleled success has made his name a household word not only in his native land, but throughout the length and breadth of the world. Countries where proprietary medicines are forbid den by law have relaxed their stringent regulations in his favor. True merit is always at length recognized. The rich and the poor, the learned and the ignorant, physicians, state smen, monarchs, a nation of enlightened freemen, have sanctioned, used, and extolled them. They are fixed facts in medical history. Is not this better than having light ununder a bushel? If anything is worth knowing it is worthy of being universally say as one man, "Local self-government known. So thinking, Holloway proclaims the virtues of his medicines through the press, and fortune, fame, and the gratitude of millions have been his reward. In making these statements, we are guided by an earnest wish to benefit the sick and suffering of all nations; and in directing their attention to the well-attested curative properties of Holloway's remedies, we only reiterate facts and opinions which are patent to three fourths of the civilized world .-The Indicator.

SPAIN IS HOT FOR WAR.

A SPECIAL NOTE TO GERMANY ON THE PRESENT SITUATION

IF BISMARCK DOES NOT TAKE A BACK SEAT THERE WILL BE TROUBLE-MADRID IN A STATE OF TURMOIL-ALFONSO'S PERSONAL APPEAL TO THE GERMAN CROWN PRINCE.

Berlin, Sept. 11.-Crown Prince Frederick William has replied to a note from King Alfonso, assuring the King of the friendly desire of Emperor William not to encroach upon Spanish rights. A definite settlement of pending questions he says can only be had by a full agreement between the great powers.

A ROW UPON THE SHORK. The Spanish commander at Manila telegraphs that when it was found that the German flag had been hoisted at Yap the governor of the Carolines, Senor Babrilles, visited the commander of the German gunboat "Itlis" and accused him of piracy and a breach of International law. The German commander replied that he had simply obeyed orders. A hot argument ensued, ending in a scuffle when the German commander retired to his ship. The governor then boarded the Spanish man-of-war "San Quentin" and requested the captain to fire on the "Itlis." The captain refused, the go-versor of Phillipines having ordered him to avoid conflict. Babrilles ordered the crew to fire, whereupon the captain drew a revolver and threatened to shoot the first one who obeyed or repeated the order. Babrilles again ordered the men to fire, when the captain shot him in the shoulder. Babrilles was afterwards taken a prisoner to Manilla, where his trial is proceeding. The government formally deny that there an alterestion on shore, but they are silent in regard to what occurred on the ship. They admit that Babrilles ordered that the "Itlis" should be attacked.

SPECIAL NOTE SENT OUT. Madrid, Sept.11.—The government despatched a special messenger to Berlin, with an additional note to Germany regarding the serious question at issue between the two governments. The note, which was approved at a council of ministers held yesterday, requests Germany to renounce all intentions of establishing suzerainty over the Carolines and Pelew Islands. Without such guarantee Spain must decline to give satisfaction for the recent insults to the German embassy.

TALKING UP THE WAR.

Madrid, Sept. 11.—President Casta lar made, yesterday, a Lighly inflammatory speech at Corunna, to the Artisan Partisans' Club. He declared that the alliance between Germany and Spain would prove fatal to the latter, and that the Latin races must combine against the Germans. Preparations, he said, should proceed for war, but if war came the responsibility must rest wholly on Germany. In case of war he thought an alliance was indispensible to Spain.

MR. HENDRICKS' SPEECH

The Vice-President of the United States Endorses the Policy of Parnell.

Indianapolis, Sept. 9.—In his speech

at the Parnell demonstration last night

Vice-President Hendricks said: It is

known the world over that Ireland, from

the days of Henry I, until this hour, has

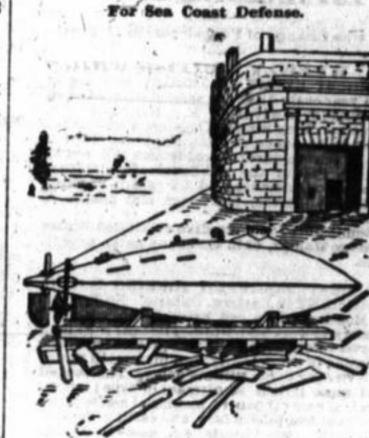

the rights of equal citizenship and been despoiled of her lands. Forty-five years ago the population of the "Green Isle" was 9,000,000, a large population for a region of country only the size of Indiana. To-day that population is only 5.000,000, a loss in less than half a century of 4,000,000 of people—almost an entire half of the entire population gone from Ireland. I know the famine of 1843 had much to do with this, but bad government and cruelties by her landlords have done more than famine and pestilence to depopulate the beautiful isle. It cannot remain always this always be that the people of Ireland are tyranny is soon to pass away, and that the day is soon to come when all men will be blessed with good government and just laws. There are this antumn 100 members of parliament to be elected from Ireland, and Mr. Parnell expects that of this number his cause will carry 80 or 85. They will go to parliament for the purpose of asserting the right of local self-government for Ireland. The great trouble in Ireland to-day is the land. Much has been done in Ireland to make better the condition of the tenant, but the land trouble still exists, and it must be regulated. It must be regulated as we regulate such matters in Indiana -by legislators from the soil. not reasonable that in London the relation of the landlord and tenant in Ireland shall be fixed. It is against reason and justice that such a practice shall permanently prevail. When the men to be elected by the friends of Ireland come to parliament, it-will be well to in Ireland." You are asked to help in this election. There are to be no mistakes made at this election. There will be no shams, no frauds. Ireland is tremendously in earnest. The friends of

your country in Ireiand rely upon the dif ferences between the two great English parties, the Whig and Tory or Radical and Liberal. Not greatly different are they in numbers and force, and Mr. Parnell relies upon this; and if Ireland in thoroughly united in the struggle between the two English parties, Ireland will be placed where she ought to be in her political relations with the world. Each party, seeking strength from the Irish vote, will help to place Ireland where she has the right to stand. I think this cause will go further than has been yet mentioned. It will result in just what we have in Indiana, a written constitution. You remember in the Declaration great foundation idea of America, and is

now being applied in Ireland, a cause to which you are to give your sympathy and support—the right of man to govern himself and to abolish laws that are inimical to his welfare. In hope that principle was asserted at Bunker Hill, and in glorious triumph was proclaimed at Yorktown. (Great applause.)

If you have to work early and late, and get little or no exercise, take Hanington's Quinine Wine and Iron to give you strength. See that you get "Hanington's" the original and genuine.

THE NEW WAR AGENT

The illustration which we present of a new engine of warfare is invested with a peculiar interest at this time, when that terrible substance, dynamite, is being adapt 1 to military uses. We show a new submarine boat now lying at Fort Lafayette, Now York harbor. She was invented by Lieut. Zalinski, the gentleman who also invented the dynamite gun and exploded the theory of Keely of motor fame. This beat is of wood thirty-two feet long. As torpedo, and will sail wholly under water when required. She is driven by a powerful screw, has a rudder for horizontal steering and two other rudders to steer her up or down. The dome-like structure forward is a sort of pilot-house. It contains a camera obscura, by which the men in the boat. which may be wholly submerged, can scan Jules Verne wrote of his famous fish boat that went 20,000 leagues under the sea, exsuch a boat that would "go." Lieutenant Zalinski has combined in this boat all the strong points of a submarine boat, and no doubt she will perform some surprising feats when floated and tried. Nothing would put an end to naval warfare so quickly as the perfection of the dynamite gun and the submarine boat. This latter would be a consummation more important in its results than Ericsson's invention of the monitor. It would revolutionize naval construction, and would be an added protection to the seacoast cities and harbors of the United States. This question of seacoast defense will likely be a prominent one during the coming session of congress, a fact which is stimulating inventors to provide cheap and effective weapons for the

At the launching of this craft she proved herself to be a genuine submarine boat, for by an accident a hole was punched through her three-inch planking, and she went straight to the bottom. She has since been brought to the surface and repaired. and it is expected that Lieut. Zalinski and her crew will most any day lock themselves up in her water-tight interior and test her qualities by an extended tour under the waters of the harbor.
