the trunks of young trees, about eig inches in diameter, they form cylinders, by scooping out almost all except the bark; and then; closing the extaemities with plaster or mud, they place them horizontally, piled one upon another, in the gardens for hives. - They often open these cylinders to give their guests fresh honey; and the bees are detuched merely, by being held over a piece of burning paper, without any aid of sulphur. The honey of the Crimea is of a very superior quality; abe bees, as in Greece, feeding on blossoms of the wild thyme of the mountains and such flowers as the gardens spontaneously afford. Every Tartar cottage has its garden, in the cultivation of which the owner finds his principal amusement. Vegetation is so rapid, that in two years, vines not only shoot up so to laden with fruit. They delight to have their

houses, as it were, buried in toliage. These, consisting only of one story, with low, flat roofs, be neath trees which spread numerous branches quite over them, constitute villages, which, at a distance, are only known by the tufted grove in which they lie concealed .- When the traveller tion of the wainut, the mulberry, the vine, the fig, the olive, the pomegranate, the peach, the apricot, the plum, the cherry, and the tall black poplar; all of which, intermingling their clust in produce, form the most beautiful and fragrant canopies that can be imagined. Through this beautiful valley, now devastated by contending armies, the bigh road, called the Woronzoff-Road, -leads past the villages of Miskomia and Arnoutthe road was made, was only accessible by stone Provisions.—Pork firmer; sales 200 bbls at stairs cut in the rock, perilow alike to man and

Lyon's KATHAIRON. - The present immense sale of this article, is almost fabulous in amount which shows the public appreciation of a preparation which rests its claims entirely upon its own merits.
