Spring is Here

BY IRA L. JENKINS.

From the land of the sweet south west, Airs of April bither wander, Over mountain, vale and moorland, Over rivers, on whose bosom Star of midnight was not mirrored, Since the Frost King of November, Laid his chilling hand upon them. And the coming days but lengthen, As the bright'ning sun arises High and higher, in the mid heavens, Till his scorching rays descending, Linger on the mountain summits, And along the river's margin; And from hills that sloping eastward, Disappear the drifted snow-fields,

That the surly month December Took unto her chill embrace. As the king of day arises, From beyond the mountains eastward. And the bill tops all aglow, With the glory of the morning, Comes the sweet and merry robin Comes the first great harbinger, Full of music, prophecying, From the swaying boughs above us, That the glorious Spring is here.
