wished to refer to; that was the appointment of General Statement Or THE AFFAIRS OF THE from any Court or authority elsewh re, (should Canada,) having the requisite powers in such matters, shall be sufficient authority to the Directors for paying dividends, and allowing transfer of shares, in pursuance of, and in conformit) with such documents. This will save much delay, trouble and expense, to the heirs of deceased Shareholders (particularly to those resident in Great Britain, and whose stock is registered. in London,) and is a valuable amendment to the Charter.

The clause giving power to the Bank to have its shares transferable, and Dividends payable in the United Kingdom, has been reproduced in the new Charter, with the provise, that at no time shall more than one-half of the Capital Stock be registered in the Book to be kept there for that purpose. This matter has for some time past engaged the attention of the Directors. They have been of opinion, that to Shareholders in Europe, it would be a great convenience to have their Shares transferable in London, and to receive Dividends there, while the facility of moving Shares from Canada to London, and vice versa, could not fail to enhance the value of the Stock. Arrangements have therefore been completed with the valued correspondents of the Bank in London (the London Joint Stock Bank), by which the Register and other London Stock Books, will be taken charge of by that Institution, under the Trusteeship of six of the Directors thereof, and under such precautionary regulations as will fully secure the Bank from risk by the loss of documents in transitu, should such a contingency occur. A circular detailing the steps necessary for removing Shares from one Register to the other will be prepared, and with the forms required, transmitted to such Shareholders as desire to move their Shares.

The Directors also considered it desirable, in view of the additional Banking Capital required_ by the Province, that the remaining unissued Shares should be offered in London under the above arrangement, and gradually as the interests of the Bank called for additional Capital. They have therefore authorised the issue of a part of these Shares, of which a considerable amount has been taken up, and paid in full with premium, and they are led to believe, that the remaining part can be placed when required by the business of the Bank.

The Directors trust that all these proceedings will meet with the approval and concurrence of the Shareholders.

The position of the money market generally during the last six months, has been such as to call for more than ordinary care, in the many agement of Banking Institutions. In former Reports, at the request of the Cashier, no allusion has been made to his services, but on the present occasion the Directors cannot refrain from expressing their high appreciation of his constant and zealous attention to the interests of the Bank. They desire also to state their satisfaction with the Cashier's Report of the efficient co-operation given to him by the other Officers of the Institution.
