BEAUTY IN HOMELINESS.

Those Who Knew George Ellot Understood the Meaning of This Phrase.

Songa Kovaleosky, that remarkable Russian woman who has a genius 1878, testifies to Eliot's fascination in spite of exceptional plainness: I frankly admit, she says, that the first impression I had when I lifted my eyes to George Ellot was a vague hope that

I was mistaken, that it was not she, that It was some one else—for she seemed to me so homely and different from what had imagined her. I had never seen he portrait. Mr. Rallston had only sai that although she was not handsome she was very attractive. It had given me pleasure to paint her in my imagination such as I would like to have her-the reality was very different. An old, thin woman, with a nose which, although shaped, was disproportionately large for a woman's face, long English mouth. A black lace dress helped emphasize the thinness of the neck and the imperfect complexion. Such was George Eliot as she appeared to me a the first moment.

But the sound of the voice made difference. It "seemed to give me back my George Ellot," declares the Russian. than hers. When I read 'Othello's' fam iar words about 'Desdemona's' voice. always think of George Ellot's." And few minutes talk strengthened the at traction and made the visitor quite for get the impression of homeliness:-She asked me to sit down beside her me as if I had been an old acquaintance. It is impossible to recall the subject of only know that after a quarter

"God bless you, sir, God bless you."

The Germination of Nuts. It is a very common notion in the North that nuts-butternuts, for instance -will not grow until they are frozen, and that this freezing is necessary to open their shells. A moment's thought ought to recall the fact that many of our hardest-shelled nuts are native to regions where freezing is unknown. As for the Northern nuts, they drop with or before the foliage of the trees which bear them; and in the still air of the ferest or grove the snow lies level, while the dead leaves, with the snow, constitute, even here in northern Vermont and adjeining Canada, one of the most perfectly frost-proof coverings, habitually made use of in our gardens to protect our half-hardy and

tender plants in winter. Some-indeed, I think many, if not all our Northern nuts-retain their vitality, under favorable conditions, for many years. Having last spring a call for a let of young butternut trees, I planted a considerable quantity of nuts which had been kept in a shed loft for feur or five years. Every nut vegetated, and they all made a growth of from 10 to 12 inches during the season. These nuts have unquestionably been subjected to a temperature far below zero every winter since they were gathered, but none of their shells were cracked or loosened. I do not think their viatlity would have been preserved had this occurred. So far as my observation and experi-

ence have yet extended, in reference to the vitality of nuts (and these cover considerable extent of territory—from Canada to Tennessee), they rarely vegetate extensively near the trees from which) they fall. Perhaps this is chiefly due to the activity of boys and squirrels in harvesting the crop. Where the trees stand closely there may also be a lack of sunforce to start germination. If it were not for its rough shell the butternut would have a very extensive sale, for in quality it is decidedly superior to the se-called English walnut, and it will endure HOTEL REGISTERS English walnut, and it will endure a much colder climate.—Garden and For-

Beauty is as Beauty Dees, "You think the Ugly Duckling never becomes a swam?" writes Ruth Ashmore makes a specialty in April Ladies' Home Journal. "Rachel, who was said to have had the most expressive face of any woman in the century, and to have been the most graceful, was counted by her family an excessively ugly child. She adered beauty, suddenly one day, after leeking at her- or on small margins. self, she made up her mind that she would be charming. And she said, 'l studied every hour of my life to be ugly F. W. WAKEFORD, 4 Ontario Chambers no longer.' History tells how she suc-Coeded. Adelina Patti was the Ugly W. C. CONBOY, 20 Market Square. Tele-Duckling, it being thought by her parents that her sister, Carlotta, was the beauty. Mary Anderson, the ideal, classical beauty of the last two decades, was mathematics, and whose autobiography ward, ordinary-looking girl, rather quiet, has recently been given to English read. for she spent most of her time reading ers, left some very interesting reminis- Shakespeare. George Eliot never became cences of George Eliot. Her impression a beauty, but she forced those people who toria wanted five children's heads from A Boarding and Day School for Young of the novelist on their first meeting, in despised her lack of attraction as a child to recognize the great genius of the woman. The old mammies down South always scorned a pretty baby, and, oddly

> enough, there is wisdom in this." Kites That Carry Men. Five huge kites were used at Christchurch Park, Ipswich, by Lieut Powell a short time ago to demonstrate the possi bility of raising a man from the ground for recennoitering purposes in time of war. A wloker car was attached to the kites and held the aeronauts, During HANDSOME . . . the trial it was prevented from taking too high a flight by an anchorage rope held from below and paid out from a windlass. An ascent of about 50 feet was successfully made by three persons separ-It only required the letting out of more rope to have extended this distance.

Candy for the Children. A delicious and harmless candy for the children is ice cream candy. This is fiavored as it is pulled, and may be cut into sticks or small pieces if preferred. Beil three cups of sugar, a quarter of a temspoonful of cream of tartar and onehalf cup of water together, bit do not mittees. stir the syrup at all while boiling. Boil it can be handled pull it until it is white.
