THE DAILY WHIG. "Opifer per Orem Dico." IN FEAR AND TREMBLING. When the liberals took office Hon. George E. Foster was quite satisfied, and said so, that the liberals would not dare to alter or reduce the tariff. Now he is very much afraid they will do something, and at Corcoran's bar he condemned the commission which was now consulting the business men as to the manner in which the tariff affected them.

REPEATING THEIR MISTAKE. The conservative party, judging it by the performance of the men who presume to lead it in Sir Charles Tupper's absence, have not learned anything from the recent election. As the news of defeat reached him, and subsequently, in his first address in the commons, Sir Charles admitted that a great mistake had been made in attaching so much importance to the school question, to the obscuration of other questions in connection with which the electors might think better of the conservative party.

It stands To Reason. That a man who gives his whole and undivided attention to one particular subject acquires a greater proficiency in it, than one who engages his attention in different directions. This is true of the medical student, and his staff of assistants, at Lakehurst institute, in their treatment of alcoholism and kindred ailments. Every fresh case of the disease gives up the drink habit almost unconsciously, and from that moment, takes the first step on his upward career, commencing life with a brighter complexion. For pamphlet and terms address The Manager, Lakehurst institute, Oakville, Ont. Toronto Mail.

SCIENTIFIC EDUCATION AND GERMAN TRADE. Lord Rosebery rendered great service to England when he expressed some fears regarding the prosperity of British trade, and in asking for a governmental inquiry into such matters as German competition, will prove to be of the greatest advantage to British manufacturers, though they will do not order this inquiry eighteen months ago, when he was at the head of affairs, passes the understanding of ordinary minds.

ALL TO HAVE SAME RIGHTS WHAT RUSSIA GETS, OTHER POWERS TO HAVE ALSO. The Alleged Project is an Absurd Fantasy. The Russian project has followed close upon the statement published yesterday by the Daily News to the effect that the six great powers would shortly commence project, in the shape of a treaty, for the occupation of Russia of the northern corner of Turkey. In official quarters here it is declared that the alleged project is an absurd fantasy. The truth is there is no complete pause in the discussion of the question affecting the Dardanelles.

THE BLESSING OF THE AGE. HAMILTON, Aug. 10, 1896. DR. S. R. RYKMAN. My dear Sir, I am under the greatest obligation to you for a statement regarding my case of rheumatism with which I was afflicted for over thirty years. The pain had gradually approached my knees and had become so severe that I could not stand on my feet. Another trouble I had was a kind of dry skin, known as psoriasis, which had covered my back and chest. I had almost given up hope of my recovery.

FOURTEEN FOOT NAVIGATION. Kingston is the Best Point For Transportation. Montreal Herald. It is a commonly entertained opinion that the deepening of the St. Lawrence canal to fourteen feet would be of material aid to the commerce of this province that might in time assume enormous proportions. Strange to say, one of the heaviest shippers in the dominion, a resident of Montreal, is in possession of a very original, holding that the deepening of the canal would not result in the expected increase of lake traffic. The reasons he gives for his conviction are not unimportant. In the first place, the large and expensive class of steamboats by which freight can be most economically carried from Duluth to Fort William, cannot afford to be delayed by the slow progress incident to the use of the canal. As it is to-day, shippers find it preferable to transport their freight at Kingston, carrying it down in barges to the city. The cost of transportation is but small, and is insignificant when compared to the expense occasioned by the delays of canal navigation. The fast steamer can make far more money for its owner by unloading at Kingston and returning to Fort William immediately without waiting for the slow freight train by coming down the canal or by waiting at either Kingston or Montreal for a return cargo. Another of his contentions is that the St. Lawrence canal would be a very costly undertaking to be deepened to accommodate vessels that would require fourteen feet in the canal. For instance, when an east wind is blowing the river near Puy-Prasle, sometimes not more than eight feet deep. As a consequence, heavy expense would be incurred in completing the St. Lawrence system.

A NOVA SCOTIA CASE. Suffered Without Help—Eighteen Years Getting Worse—Cured by Dodd's Kidney Pills. BRIDGEVILLE, N.S., Nov. 30.—(Special). There is no man in this town better known than J. S. Moran, himself, who for eighteen years has been going from bad to worse without being able to get hold of the right treatment. He says: "I began with backache, pains in the limbs, and finally settled down as rheumatism. I was treated by several doctors, but they only made me feel worse. I was finally cured by Dodd's Kidney Pills. I feel like a new man now, and my strength has returned. I can do any kind of work I wish to do."
