This is the heading of the two column account of the Bailie brothers, written by Carl Fechter for the WHIG two years ago, and now reproduced in the Dublin Irish Times. The article in question has had very wide publication, papers coming to the brothers from all parts of the globe. Not only that, but many offers have been made to them to go into the leading museums and side shows, while hundreds of visitors have climbed the stairs to their printing house toview them, or stood about the front door awaiting their return if out. No two citizens have ever had such notoriety, and they wear the honors meekly.

The accuracy of my statements about the voluminous diaries of Emperor Frederick is confirmed. All the volumes devoted to political and military comments have been given up by the Dowager Empress to the Government. She retains all those which relate to private affairs as well as the whole of her husband's correspondence, and desims at a future time to publish what she pleases, there being an implied understanding that nothing shall appear to which the Emperor or his ministers could reasonably take exception. Prince Bismarck has acted as the honest broker in billiging about this arrrangement, and has been untilling in his efforts to arrange a modus vivendi with the Empress.

The session, which has been productive of only one large measure and singularly barten of interest, has not brought forward among the rank and file of the House of Commons any man of more than average ability. None of the young members disunguished themselves, though they have the res, as the Chancellor of the Exchequer aded them at the Guildhall banquet last Angust, have been unmuzzled, but have not distinguished themselves. Only two men have increased their reputation; both Cabinet Ministers.

The suspension of the usual rule as to the duration of the Wednesday sitting at Westminster somewhat interfered with the success of the ministerial banquet at the Mansion House. The bishopric of Salisbury was said to have been offered him by Lord Salisbury and refused, but I have good reason to know it never was. The difficulty in proposing the appointment of Canon Liddon to the bishopric has always arisen with the Queen, with whom he is not popular. The reason assigned for his not being liked by. Her Makety is that on one occasion when he preached before her she was very much displeased at his style. Canon Lidden framed his style on that of the great French preacher, and as Massillon when preaching before Louis XIV, addressed the king as "sir," so (anon Liddon in his sermon addressed the Queen as "madam.
